The Hidden Order of Art. A Study in the Psychology of Artistic Imagination. [With Plates.]. Anton EHRENZWEIG, 1967 **The Hidden Order Of Art** Anton Ehrenzweig, 2011-05-12 A revealing study into the relationship between psychology and the arts Anton Ehrenzweig's tour de force describes nothing less than the psychology of artistic creativity Focusing on the visual arts and music he shows that in addition to conscious intellectual critical powers both the child and the creative artist rely on an unconscious intuitive critical process to give shape to their view of the world

Hidden order of art; a study in the psychology of artistic imagination A. Ehrenzweig, *The Hidden Order of Art* Anton Ehrenzweig, 1967 **The Hidden Order of Art** ton Ehrenzweig, 1967 *The Life and Art of Lee Aguinaldo*, 2011

Beyond Pleasure: Freud, Lacan, Barthes, **Thinking Through Art** Katy Macleod, 2013-01-11 Focusing on a unique arena Thinking Through Art takes an innovative look at artists experiences of undertaking doctorates and asks If the making of art is not simply the formulation of an object but is also the formation of complex ideas then what effect does academic enquiry have on art practice Using twenty eight pictures never before seen outside the artists universities Thinking Through Art focuses on art produced in higher educational environments and considers how the material product comes about through a process of conceiving and giving form to abstract thought It further examines how this form which is research art sits uneasily within academic circles and yet is uniquely situated outside the gallery system The journal articles from eminent scholars artists philosophers art historians and cultural theorists demonstrate the complexity of interpreting art as research and provide students and scholars with an invaluable resource for their art and cultural studies courses *The Aesthetics of Emotion* Gerald C. Cupchik, 2016-07-28 Gerald C Cupchik builds a bridge between science and the humanities arguing that interactions between mind and body in everyday life are analogous to relations between subject matter and style in art According to emotional phase theory emotional reactions emerge in a perfect storm whereby meaningful situations evoke bodily memories that unconsciously shape and unify the experience Similarly in expressionist or impressionist painting an evocative visual style can spontaneously colour the experience and interpretation of subject matter Three basic situational themes encompass complementary pairs of primary emotions attachment happiness sadness assertion fear anger and absorption interest disgust Action episodes in which a person adapts to challenges or seeks to realize goals benefit from energizing bodily responses which focus attention on the situation while providing feedback in the form of pleasure or pain regarding success or failure In high representational paintings style is transparent making it easier to fluently identify subject matter **Variable Conditions** Adam Lauder, 2023-11-15 Variable Conditions recovers and explores early Canadian encounters between computational media and contemporary art in the late twentieth century charting a network of

developments linking meteorology computation and the arts that arose long before the age of cloud computing Essays uncover the material conditions that shaped the emergence of computational arts in Canada from projects executed by mainframe to digital paintings and analog synthesizer performances A surprising number of institutional circumstances granted access to early computer hardware government nuclear and hydroelectric infrastructure agencies as diverse as the National Film Board and the National Research Council and a myriad of university settings across the country and creative conditions varied from benign administrative neglect to the artistic exploration of randomness or a distinct emphasis on thematizing transformation as a motor for graphic visualization and auditory exploration Interviews featuring leading artists give first hand insight into artistic practices and the historical moment in which they occurred The book provides valuable new perspectives on computer art pioneers such as Leslie Mezei Robert Adrian X Suzanne Duquet Roger Vilder and Vera Frenkel as well as new contexts for understanding Michael Snow and IAIN BAXTER Not limiting their explorations to art generated using computers contributors outline the integration of computational techniques and concepts into artistic methods across disciplines and trace computation's emergence as a matter of interest and concern for a range of contemporary cultural producers Combining historical analyses with theoretical approaches to computation and its entanglement with contemporary cultural discourses and social movements *Variable Conditions* excavates the origins of computational arts and in the process sketches a new landscape of interdisciplinary creation and surprising connections between scientific and artistic institutions

Musicality in Theatre David Roesner, 2016-04-29 As the complicated relationship between music and theatre has evolved and changed in the modern and postmodern periods music has continued to be immensely influential in key developments of theatrical practices In this study of musicality in the theatre David Roesner offers a revised view of the nature of the relationship The new perspective results from two shifts in focus on the one hand Roesner concentrates in particular on theatre making that is the creation processes of theatre and on the other he traces a notion of musicality in the historical and contemporary discourses as driver of theatrical innovation and aesthetic dispositif focusing on musical qualities metaphors and principles derived from a wide range of genres Roesner looks in particular at the ways in which those who attempted to experiment with advance or even revolutionize theatre often sought to use and integrate a sense of musicality in training and directing processes and in performances His study reveals both the continuous changes in the understanding of music as model method and metaphor for the theatre and how different notions of music had a vital impact on theatrical innovation in the past 150 years Musicality thus becomes a complementary concept to theatricality helping to highlight what is germane to an art form as well as to explain its traction in other art forms and areas of life The theoretical scope of the book is developed from a wide range of case studies some of which are re readings of the classics of theatre history Appia Meyerhold Artaud Beckett while others introduce or rediscover less discussed practitioners such as Joe Chaikin Thomas Bernhard Elfriede Jelinek Michael Thalheimer and Karin Beier

Introduction to

Social Dreaming W. Gordon Lawrence, 2018-05-08 This book explains social dreaming by situating it in the context of thinking culture and knowledge and distinguishes how it differs from conventional therapeutic dreaming making the case for how it can be used in systems like business organizations educational institutions and hospitals Constructing Realities Marilyn Charles, 2004-01-01 One of the challenges in psychoanalytic work is to find ways to enliven the space when working with individuals whose thinking is highly constrained and who have little capacity for play This incapacity often signals a split between valued and devalued aspects of self In cases such as these self protection becomes paramount and may profoundly impede growth as whatever is not known is perceived as dangerous rather than being a challenge that invites further development For the therapist who must create aliveness within the consulting room we are caught by the very real threat that this aliveness poses to the defensive structures on which the patient's equilibrium rests Movement thus can be quite precarious In this volume Marilyn Charles considers how notions of play and myth as brought into the literature by Winnicott and Bion can help to provide an interim space in which impossible realities can be constructed at a safe enough reserve that we can more actively consider them and thereby create possibilities rather than foreclosing on them Earthworks Suzaan Boettger, 2002 Her examination of Earthworks relationship to the ecology movement perceptively corrects a popular misconception about the artists goals while acknowledging the social and cultural complexities of the period *Found Sculpture and Photography from Surrealism to Contemporary Art* Julia Kelly, 2017-07-05 Taking its departure point from the 1933 surrealist photographs of involuntary sculptures by Brassa nd Dal Found Sculpture and Photography from Surrealism to Contemporary Art offers fresh perspectives on the sculptural object by relating it to both surrealist concerns with chance and the crucial role of photography in framing the everyday This collection of essays questions the nature of sculptural practice looking to forms of production and reproduction that blur the boundaries between things that are made and things that are found One of the book's central themes is the interplay of presence and absence in sculpture as it is highlighted disrupted or multiplied through photography's indexical nature The essays examine the surrealist three dimensional object its relation to and transformation through photographs as well as the enduring legacies of such concerns for the artwork's materiality and temporality in performance and conceptual practices from the 1960s through the present Found Sculpture and Photography sheds new light on the shifts in status of the art object challenging the specificity of visual practices pursuing a radical interrogation of agency in modern and contemporary practices and exploring the boundaries between art and everyday life

Wittgenstein in Translation Dinda L. Gorfée, 2012-04-26 Apart from the Tractatus Wittgenstein did not write whole manuscripts but composed short fragments The current volume reveals the depths of Wittgenstein's soul searching writings his new philosophy by concentrating on ordinary language and using few technical terms In so doing Wittgenstein is finally given the accolade of a neglected figure in the history of semiotics The volume applies Wittgenstein's methodological tools to the study of multilingual dialogue in philosophy linguistics theology anthropology and literature Translation shows how the

translator's signatures are in conflict with personal or stylistic choices in linguistic form but also in cultural content. This volume undertakes the impossible task of uncovering the reasoning of Wittgenstein's translated texts in order to construct rather than paraphrase the ideal of a terminological coherence.

After Modern Sculpture Richard J. Williams, 2000 Stars are central to the cinema experience and this collection offers a variety of fresh and informed perspectives on this important but sometimes neglected area of film studies. This book takes as its focus film stars from the past and present from Hollywood its margins and beyond and analyses them through a close consideration of their films and the variety of contexts in which they worked. The book spreads the net wide looking at past stars from Rosalind Russell and Charlton Heston to present day stars including Sandra Bullock Jackie Chan and Jim Carrey as well as those figures who have earned themselves a certain film star cachet such as Prince and the martial artist Cynthia Rothrock. The collection will be essential reading for students and lecturers of film studies as well as to those with a general interest in the cinema.
