The Moon And The Ghetto Fels Lectures On Public Policy Analysis:

Planning in the Public Domain John Friedmann, 2020-06-16 John Friedmann addresses a central question of Western political theory how and to what extent history can be guided by reason In this comprehensive treatment of the relation of knowledge to action which he calls planning he traces the major intellectual traditions of planning thought and practice Three of these social reform policy analysis and social learning are primarily concerned with public management The fourth social mobilization draws on utopianism anarchism historical materialism and other radical thought and looks to the structural transformation of society from below After developing a basic vocabulary in Part One the author proceeds in Part Two to a critical history of each of the four planning traditions The story begins with the prophetic visions of Saint Simon and assesses the contributions of such diverse thinkers as Comte Marx Dewey Mannheim Tugwell Mumford Simon and Habermas It is carried forward in Part Three by Friedmann s own nontechnocratic dialectical approach to planning as a method for recovering political community

Reconstructing Sustainability Science Thaddeus Miller, 2014-12-05 The growing urgency complexity and wickedness of sustainability problems from climate change and biodiversity loss to ecosystem degradation and persistent poverty and inequality present fundamental challenges to scientific knowledge production and its use While there is little doubt that science has a crucial role to play in our ability to pursue sustainability goals critical questions remain as to how to most effectively organize research and connect it to actions that advance social and natural wellbeing Drawing on interviews with leading sustainability scientists this book examines how researchers in the emerging interdisciplinary field of sustainability science are attempting to define sustainability establish research agendas and link the knowledge they produce to societal action Pairing these insights with case studies of innovative sustainability research centres the book reformulates the sustainability science research agenda and its relationship to decision making and social action It repositions the field as a science of design that aims to enrich public reasoning and deliberation while also working to generate social and technological innovations for a more sustainable future This timely book gives students researchers and practitioners a valuable and unique analysis of the emergence of sustainability science and both the opportunities and barriers faced by scientific efforts to contribute to social action

Micromotives and Macrobehavior Thomas C. Schelling, 2006-10-17 Before *Freakonomics* and *The Tipping Point* there was this classic by the 2005 Nobel Laureate in Economics Schelling here offers an early analysis of tipping in social situations involving a large number of individuals official citation for the 2005 Nobel Prize *Micromotives and Macrobehavior* was originally published over twenty five years ago yet the stories it tells feel just as fresh today And the subject of these stories how small and seemingly meaningless decisions and actions by individuals often lead to significant

unintended consequences for a large group is more important than ever In one famous example Thomas C Schelling shows that a slight but not malicious preference to have neighbors of the same race eventually leads to completely segregated populations The updated edition of this landmark book contains a new preface and the author s Nobel Prize acceptance speech **Responding to New Realities in Funding** Larry L.
