considered one of the great successes of the developing world India has more recently experienced growing challenges to political order and stability Institutional mechanisms for the resolution of conflict have broken down the civil and police services have become highly politicized and the state bureaucracy appears incapable of implementing an effective plan for economic development In this book Atul Kohli analyzes political change in India from the late 1960s to the late 1980s Based on research conducted at the local state and national level the author analyzes the changing patterns of authority in and between the centre and periphery He combines rich empirical investigation extensive interviews and theoretical perspectives in developing a detailed explanation of the growing crisis of governance his research reveals The book will be of interest to both specialists in Indian politics and to students of comparative politics more generally **Democracy and Civil Society**

in Asia: Volume 1 F. Quadir, J. Lele, 2004-03-31 This edited volume brings together a number of well known scholars and activists from various parts of the world to present critical perspectives on recent and long term trends in the economic socio cultural and political life of the people of Asia and examines the policies and constraints faced by the nation states of the region It contributes to and enriches the current debates on globalization the prospects for democracy and sustainable human development The book offers an incisive assessment of the role of civil society in creating a democratic political

culture in Asia **Religion and Regimes** Mehran Tamadonfar, Ted G. Jelen, 2013-11-26 This work is a collection of essays that describe and analyze religion and regime relations in various nations in the contemporary world The contributors examine patterns of interaction between religious actors and national governments that include separation support and opposition In general the contributors find that most countries have a majority or plurality religious tradition which will seek a privileged position in public life The nature of the relationship between such traditions and national policy is largely determined by the nature of opposition A pattern of quasi establishment is most common in settings in which opposition to a dominant religious tradition is explicitly religious However in some instances the dominant tradition is associated with a discredited prior regime in which a pattern of legal separation is most common Conversely in some nations a dominant religion is for historical reasons strong associated with national identity Such regimes are often characterized by a lazy monopoly in which the public influence of religion is reduced **The Madhesi Upsurge and the Contested Idea of Nepal** Kalpana Jha, 2017-03-20 This book is set against the burning issue of ethnic uprisings in the Madhes region of Nepal and analyses debates on the idea of contemporary Nepal The limited view of Nepal as a primarily hill nation with Nepali speaking people ignores the vast ethnic and linguistic diversity of the country It has particularly rendered stateless the Madhesi community which inhabits the plains bordering India and shares closer cultural affinity and marital ties across the border Increasing demands for ethnic and territorial autonomy by the Madhesis suggest the need for redefining the idea of Nepal and establishing Madhesi identity as Nepali identity while at the same time addressing the deeply contested idea of regional versus social identity in the region This book uses narratives from the Madhesi community including from prominent Madhesi analysts and activists to define their identity as well as their aspirations in a democratic Nepal It also provides a perspective on the internal dynamics of caste and language of this region and their possible impact on consolidating ethnic identities in Nepal **The Rise and Fall of Modern Empires, Volume II** Saul Dubow, 2016-12-05 This volume reproduces key historical texts concerning colonial knowledges The use of the adjective colonial indicates that knowledge is shaped by power relationships while the use of the plural form knowledges indicates the emphasis in this collection is on an interplay between different often competing cognitive systems George Balandier's notion of the colonial situation is an organising principle that runs throughout the volume and there are four sub themes language and texts categorical knowledge the circulation of knowledge and indigenous knowledge The volume is designed to introduce students to a range of important interventions which speak to each other today even if they were not intended to do so when first published An introductory essay links the themes together and explains the significance of the individual articles **Democratizing Democracy** Boaventura de Sousa Santos, 2020-05-05 The major conflicts between the Global North and the South can be expected to result from the confrontation of alternative conceptions of democracy mainly between liberal or representative democracy and participatory democracy The hegemonic model of democracy while prevailing on a global scale guarantees no more than low

intensity democracy In recent times participatory democracy has exhibited a new dynamic engaging mainly subaltern communities and social groups that fight against social exclusion and the suppression of citizenship In this collection of reports from the Global South India South Africa Mozambique Colombia and Brazil De Sousa Santos and his colleagues show how in some cases the deepening of democracy results from the development of dual forms of participatory and representative democracy and points to the emergence of transnational networks of participatory democracy initiatives Such networks pave one of the ways to the reinvention of social emancipation This is volume 1 of the Reinventing Social Emancipation project edited by Boaventura de Sousa Santos
