Statistical And Neural Classifiers

Michal Haindl, Josef Kittler, Fabio Roli

Statistical And Neural Classifiers:

Statistical and Neural Classifiers Sarunas Raudys, 2001-01-29 The classification of patterns is an important area of research which is central to all pattern recognition fields including speech image robotics and data analysis Neural networks have been used successfully in a number of these fields but so far their application has been based on a black box approach with no real understanding of how they work In this book Sarunas Raudys an internationally respected researcher in the area provides an excellent mathematical and applied introduction to how neural network classifiers work and how they should be used

Combining Pattern Classifiers Ludmila I. Kuncheva, 2004-08-20 Covering pattern classification methods Combining Classifiers Ideas and Methods focuses on the important and widely studied issue of how to combine several classifiers together in order to achieve improved recognition performance It is one of the first books to provide unified coherent and expansive coverage of the topic and as such will be welcomed by those involved in the area With case studies that bring the text alive and demonstrate real world applications it is destined to become essential reading

Multiple Classifier Systems Terry Windeatt, Fabio Roli, 2003-08-03 The refereed proceedings of the 4th International Workshop on Multiple Classifier Systems MCS 2003 held in Guildford UK in June 2003 The 40 revised full papers presented with one invited paper were carefully reviewed and selected for presentation The papers are organized in topical sections on boosting combination rules multi class methods fusion schemes and architectures neural network ensembles ensemble strategies and applications

Multiple Classifier Systems Michal Haindl, Josef Kittler, Fabio Roli, 2007-06-21 This book constitutes the refereed proceedings of the 7th International Workshop on Multiple Classifier Systems MCS 2007 held in Prague Czech Republic in May 2007 It covers kernel based fusion applications boosting cluster and graph ensembles feature subspace ensembles multiple classifier system theory intramodal and multimodal fusion of biometric experts majority voting and ensemble learning

Neurocomputation in Remote Sensing Data Analysis Ioannis Kanellopoulos, Graeme G. Wilkinson, Fabio Roli, James Austin, 2012-12-06 Since 1994 the European Commission has been supporting activities under the Environment and Climate programme of research and technological development with the aim of developing cost effective applications of satellite Earth observation EO for both environmental monitoring and research This action has included support to methodological research aimed at the development and evaluation of new techniques forming part of the chain of processing needed to transform data into useful information Wherever appropriate the Commission has emphasised the coordination of ongoing research funded at the national level through the mechanism of concerted actions Concerted actions are flexible and efficient means to marshal efforts at the European level for a certain period They are proposed by groups of researchers active in a given field who have identified the added value to be gained by European cooperation whilst continuing to pursue their own individual projects In view of the rapid developments in the field of neural network over the last 10 years together with the growing interest of the Earth observation community in this approach as a tool for data

interpretation the Commission decided in 1995 to support the concerted action COMPARES following a proposal from a group of acknowledged European experts

Multiple Classifier Systems Fabio Roli, Josef Kittler, 2003-08-02 This book constitutes the refereed proceedings of the Third International Workshop on Multiple Classifier Systems MCS 2002 held in Cagliari Italy in June 2002 The 29 revised full papers presented together with three invited papers were carefully reviewed and selected for inclusion in the volume The papers are organized in topical sections on bagging and boosting ensemble learning and neural networks design methodologies combination strategies analysis and performance evaluation and applications
