Assessing Judgment Proficiency in Army Personnel Hannah Foldes, 2010 Because of the unpredictable nature of the Army s current conflicts operational requirements demand that Soldiers and leaders become proficient in military judgment and decision making This research presents an analysis of military judgment proficiency MJP which is judgment and decision making in environments characterized by cultural legal ethical and tactical complexity We reviewed relevant literature in the areas of judgment decision making and problem solving to present a sound theoretical foundation for the MJP construct We defined MJP as a complex skill and argued that in ambiguous novel rapidly changing situations in which there is limited time information and resources Soldiers demonstrating MJP are more likely to select an effective course of action by appropriately identifying the nature of the situation recognizing relevant situational factors and forecasting the best overall outcome s given the situation We describe also the initial stages of development of an assessment tool that will distinguish among Soldiers on MJP and lay out future plans for test validation with Special Forces and non Special Forces Soldiers

*Data Analysis in Forensic Science* Franco Taroni, Silvia Bozza, Alex Biedermann, Paolo Garbolino, Colin Aitken, 2010-03-19 This is the first text to examine the use of statistical methods in forensic science and bayesian statistics in combination The book is split into two parts Part One concentrates on the philosophies of statistical inference Chapter One examines the differences between the frequentist the likelihood and the Bayesian perspectives before Chapter Two explores the Bayesian decision theoretic perspective further and looks at the benefits it carries Part Two then

introduces the reader to the practical aspects involved the application interpretation summary and presentation of data analyses are all examined from a Bayesian decision theoretic perspective A wide range of statistical methods essential in the analysis of forensic scientific data is explored These include the comparison of allele proportions in populations the comparison of means the choice of sampling size and the discrimination of items of evidence of unknown origin into predefined populations Throughout this practical appraisal there are a wide variety of examples taken from the routine work of forensic scientists These applications are demonstrated in the ever more popular R language The reader is taken through these applied examples in a step by step approach discussing the methods at each stage     An A to Z of Critical Thinking  
Beth Black,2012-02-02 This definitive A to Z guide provides precise definitions for over 130 terms and concepts used in critical thinking Each entry presents a short definition followed by a more detailed explanation and authoritative clarification
