Questions for Class

In class, I'll be prioritizing discussion. I'll post some questions here that I expect we will discuss in class. It would be good for you to give these some thought. I'll put in **bold** the questions that I think are most important for us at the moment. (Note that the questions might not make sense before you read the lecture. Be sure to come back to them after you finish.)

1. **What do you think about the presumption of liberty** as I've stated below? Do you think it is an appropriate prima facie (default) policy for healthcare? If so, then why is it an appropriate policy for healthcare? What values support it? If not, then why not?
2. Try to think about the slippery slope objection to physician assisted suicide in its most plausible form. As I understand it, the objection is not merely the logical and empirical argument independently from one another. Rather, the logical argument is meant to bolster the empirical argument and *vice versa*. What do you think the best expression of the slippery slope objection(s) is?
3. **Do you think we should, as a matter of policy, permit physician assisted suicide for patients suffering from treatment resistant depression?**

Overview

As we've discussed, autonomy is the psychological capacity of a person to regulate their actions with reason. And we've seen different views on the value of such a capacity: from it being the ultimate value (as in Kant) to it having a weak instrumental value (as with paternalists). But what does it look like for a policy to respect a person's autonomy? In this lecture, we begin to make progress on that question starting first with a concrete example.
