Sun Circles Human Hands The Southeast:

Sun Circles and Human Hands Emma Lila Fundaburk, Mary Douglass Fundaburk Foreman, 2001-02-22 From utilitarian arrowheads to beautiful stone effigy pipes to ornately carved shell disks the photographs and drawings in Sun Circles and Human Hands present the archaeological record of the art and native crafts of the prehistoric southeastern Indians painstakingly compiled in the 1950s by two sisters who traveled the eastern United States interviewing archaeologists and collectors and visiting the major repositories Although research over the last 50 years has disproven many of the early theories reported in the text which were not the editors theories but those of the archaeologists of the day the excellent illustrations of objects no longer available for examination have more than validated the lasting worth of this popular book

Early Art of the Southeastern Indians Susan C. Power, 2004 Early Art of the Southeastern Indians is a visual journey through time highlighting some of the most skillfully created art in native North America The remarkable objects described and pictured here many in full color reveal the hands of master artists who developed lapidary and weaving traditions established centers for production of shell and copper objects and created the first ceramics in North America Presenting artifacts originating in the Archaic through the Mississippian periods from thousands of years ago through A D 1600 Susan C Power introduces us to an extraordinary assortment of ceremonial and functional objects including pipes vessels figurines and much more Drawn from every corner of the Southeast from Louisiana to the Ohio River valley from Florida to Oklahoma the pieces chronicle the emergence of new media and the mastery of new techniques as they offer clues to their creators widening awareness of their physical and spiritual worlds The most complex works writes Power were linked to male and sometimes female leaders Wearing bold ensembles consisting of symbolic colors sacred media and richly complex designs the leaders controlled large ceremonial centers that were noteworthy in regional art history such as Etowah Georgia Spiro Oklahoma Cahokia Illinois and Moundville Alabama Many objects were used locally others circulated to distant locales Power comments on the widening of artists subjects starting with animals and insects moving to humans then culminating in supernatural combinations of both and she discusses how a piece s artistic language could function as a visual shorthand in local style and expression yet embody an iconography of regional proportions The remarkable achievements of these southeastern artists delight the senses and engage the mind while giving a brief glimpse into the rich symbolic world of feathered serpents and winged beings

Prehistoric Indians of the Southeast John A. Walthall, 1990-01-30 This book deals with the prehistory of the region encompassed by the present state of Alabama and spans a period of some 11 000 years from 9000 B C and the earliest documented appearance of human beings in the area to A D 1750 when the early European settlements were well established Only within the last five decades have remains of these prehistoric peoples been scientifically investigated This volume is the product of intensive archaeological investigations in Alabama by scores of amateur and professional researchers It

represents no end product but rather is an initial step in our ongoing study of Alabama's prehistoric past. The extent of current industrial development and highway construction within Alabama and the damming of more and more rivers and streams underscore the necessity that an unprecedented effort be made to preserve the traces of prehistoric human beings that are destroyed every day by our own progress.

Beliefs and Rituals in Archaic Eastern North America Cheryl Claassen, 2015-06-15 Claassen's work focuses on the American Archaic period marked by the end of the Ice Age approximately 11,000 years ago and a geographic area bounded by the edge of the Great Plains, Newfoundland and southern Florida. This period and region share specific beliefs and practices such as human sacrifice, dirt mound burial, and oyster shell middens. This interpretive guide serves as a platform for new interpretations and theories on this period. For example, Claassen connects rituals to topographic features and posits the Pleistocene-Holocene transition as a major stimulus to Archaic beliefs. She also expands the interpretation of existing data previously understood in economic or environmental terms to include how this same data may also reveal spiritual and symbolic practices. Similarly, Claassen interprets Archaic culture in terms of human agency and social constraint, bringing ritual acts into focus as drivers of social transformation and ethnogenesis.

Ceramics, Chronology, and Community Patterns Vincas P. Steponaitis, 2009-05-06 Moundville, located on the Black Warrior River in west central Alabama, is one of the best known and most intensively studied archaeological sites in North America. Yet in spite of all these investigations, many aspects of the site's internal chronology remained unknown until the original 1983 publication of this volume. The author embarked on a detailed study of Moundville ceramics housed in museums and collections and hammered out a new chronology for Moundville. This volume is a clearly written description of the analytical procedures employed on these ceramic samples and the new chronology this study revealed. Using the refined techniques outlined in this volume, it was possible for the author to trace changes in community patterns which in turn shed light on Moundville's internal development and its place among North America's ancient cultures. Historical Process Kenneth E. Sassaman, Donald H. Holly, 2016-10-01 The remains of hunter gatherer groups are the most commonly discovered archaeological resources in the world and their study constitutes much of the archaeological research done in North America. In spite of paradigm shifting discoveries elsewhere in the world that may indicate that hunter gatherer societies were more complex than simple remnants of a prehistoric past, North American archaeology by and large has not embraced these theories, instead maintaining its general neoevolutionary track. This book will change that. Combining the latest empirical studies of archaeological practice with the latest conceptual tools of anthropological and historical theory, this volume seeks to set a new course for hunter gatherer archaeology by organizing the chapters around three themes. The first section offers diverse views of the role of human agency, challenging the premise that hunter gatherer societies were bound by their interactions with the natural world. The second section considers how society and culture are constituted. Chapters in the final section take the long view of the historical process, examining how cultural diversity arises out of interaction and the continuity of ritual practices. A closing commentary by H. Martin Wobst underscores the promise of an archaeology of foragers that does not associate foraging with any particular ideology or social structure but instead invites inquiry into counterintuitive alternatives. *Hunter Gatherer Archaeology as Historical Process* seeks to blur the divisions between prehistory and history, between primitive and modern, and between hunter gatherers and people in other societies. Because it offers alternatives to the dominant discourse and contributes to the agenda of hunter gatherer research, this book will be of interest to anyone involved in the study of foraging peoples.

Prehistoric Copper Mining in Michigan John R. Halsey, 2018-01-01 Isle Royale and the counties that line the northwest coast of Michigan's Upper Peninsula are called Copper Country because of the rich deposits of native copper there. In the nineteenth century, explorers and miners discovered evidence of prehistoric copper mining in this region. They used those ancient diggings as a guide to establishing their own, much larger mines, and in the process destroyed the archaeological record left by the prehistoric miners. Using mining reports, newspaper accounts, personal letters, and other sources, this book reconstructs what these nineteenth century discoverers found, how they interpreted the material remains of prehistoric activity, and what they did with the stone, wood, and copper tools they found at the prehistoric sites. This volume represents an exhaustive compilation of the early written and published accounts of mines and mining in Michigan's Upper Peninsula. It will prove a valuable resource to current and future scholars. Through these early historic accounts of prospectors and miners, Halsey provides a vivid picture of what once could be seen. John M. O'Shea, curator of Great Lakes Archaeology, University of Michigan Museum of Anthropological Archaeology.
