Sun Rhythm Form:

Sun rhythm form R.L. Knowles, Sun Rhythm Form Ralph Knowles, Ralph L. Knowles, 1985-03-01 While solar technology for individual buildings has become an accepted part of architectural design Knowles takes the next innovative step In this book he proposes solar access in urban environments with a novel design method called the solar envelope Ralph L. Knowles is Professor of Architecture University of Southern California Los Angeles **Ritual House** Ralph Knowles, 2006 Celebrated architect Ralph Knowles Distinguished Emeritus at USC s School of Architecture has carefully crafted a book for architects designers planners anyone who yearns to reconnect to the natural world through the built environment He shows us how to re examine a shadow a wall a window a landscape as they respond to the natural cycles of heat light wind and rain Analyzing methods of sheltering that range from a Berber tent to a Spanish courtyard to the cityscape of contemporary Los Angeles Ritual House shows us the future by coining the concept of solar access zoning he introduces a radical yet increasingly viable solution for tomorrow s mega cities **Beyond BIM** Danelle Briscoe, 2015-10-14 Beyond BIM explores the vast and under explored design potential undertaken by information modeling Through a series of investigations grounded in the analysis of built work interviews with leading practitioners and speculative projects the author catalogs the practical advantages and theoretical implications of exploiting BIM as a primary tool for design innovation Organized by information type such as geographic data local code or materials each chapter suggests a realm of knowledge that can be harvested and imported into BIM to give meaningful specificity to architectural form and space While highly sustainable the work documented and envisioned in this book moves well beyond normalization to reveal inventive takes on contemporary practice Beyond BIM serves as a primary resource for professional architects from practice researchers and designers engaged in information related spatial design processes as well as students and faculties of architecture schools in search of BIM design inspiration Likewise those highly attuned to computation and unconventional ways of creating form and space particularly built outcomes that utilize BIM will find this book meaningful and essential *Two Spheres* Leonard Bachman, 2012-06-14 Explaining the connection between physical and strategic design this book proposes an aesthetic connection between two equal aspects of architectural design the Real and the Ideal Addressing architectural thinkers from the broad realms of academia and practice it is suitable either as a seminar text a guide to contemporary design issues or as a theoretical work Beginning with a historical perspective the book looks at some of the key conflicts in architectural thought that were brought about by postindustrial change The discussion shifts to clearly describe the forms of complexity how these have interacted with architecture and the possibilities in fully embracing complexity in architectural practice Although there are many books focusing on complexity science there are few that focus on the relationship between complexity and design and none which take such a comprehensive approach **Handbook of Material Culture** Chris Tilley, Webb Keane, Susanne Kuechler, Mike Rowlands, Patricia Spyer, 2006-01-05 The study of material culture is concerned with the relationship between

persons and things in the past and in the present in urban and industrialized and in small scale societies across the globe The Handbook of Material Culture provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things It is cutting edge rather than simply reviewing the field as it currently exists It also attempts to chart the future the manner in which material culture studies may be extended and developed The Handbook of Material Culture is divided into five sections Section I maps material culture studies as a theoretical and conceptual field Section II examines the relationship between material forms the human body and the senses Section III focuses on subject object relations Section IV considers things in terms of processes and transformations in terms of production exchange and consumption performance and the significance of things over the long term Section V considers the contemporary politics and poetics of displaying representing and conserving material and the manner in which this impacts on notions of heritage tradition and identity The Handbook charts an interdisciplinary field of studies that makes an unique and fundamental contribution to an understanding of what it means to be human It will be of interest to all who work in the social and historical sciences from anthropologists and archaeologists to human geographers to scholars working in heritage design and cultural studies

Low-tech Magazine 2012-2018 Kris De Decker, 2019-03-18 Low tech Magazine underscores the potential of past and often forgotten technologies and how they can inform sustainable energy practices Sometimes past technologies can be copied without any changes More often interesting possibilities arise when older technology is combined with new knowledge and new materials or when past concepts and traditional knowledge are applied to modern technology Inspiration is also to be found in the so called developing world where resource constraints often lead to inventive low tech solutions
