Soviet Science Under Control The Struggle For Influence:

Soviet Science under Control Jeffrey L. Roberg, 2016-07-27 Roberg examines the relationship between the political leadership of the Soviet Union and Soviet science Previously this relationship was typically characterized as one of Communist Party dominance over the sciences He argues that the relationship between scientists and the leadership is better viewed as bi directional The author concludes that scientists had an influence on policy makers in the areas of nuclear policy and human rights although not to the same degree as the Party had on science and scientists Science, (Anti-)Communism and Diplomacy ,2019-10-01 From 1957 onwards the Pugwash Conferences brought together elite scientists from across ideological and political divides to work towards disarmament Through a series of national case studies Austria China Czechoslovakia East and West Germany the US and USSR this volume offers a critical reassessment of the development and work of Pugwash nationally internationally and as a transnational forum for Track II diplomacy This major new collection reveals the difficulties that Pugwash scientists encountered as they sought to reach across the blocs create a channel for East West dialogue and realize the project s founding aim of influencing state actors Uniquely the book affords a sense of the contingent and contested process by which the network like organization took shape around the conferences Contributors are Gordon Barrett Matthew Evangelista Silke Fengler Alison Kraft Fabian L scher Doubravka Ol kov Geoffrey Roberts Paul Robinson and Carola Sachse *The Undergrowth of Science: Delusion, Self-Deception, and Human Frailty* Walter Gratzer, 2001-09-13 Walter Gratzer s themes in the stories he relates in this book are collective delusion and human folly Science is generally seen as a process bound by rigorous rules which its practitioners must not transgress Deliberate fraud occasionally intrudes but it is soon detected the perpetrators cast out and the course of discovery barely disturbed Far more interesting are the outbreaks of self delusion that from time to time afflict upright and competent researchers and then spread like an epidemic or mass hysteria through a sober and respectable scientific community When this happens the rules by which scientists normally govern their working lives are suddenly suspended Sometimes these episodes are provoked by personal vanity an unwillingness to acknowledge error or even contemplate the possibility that a hard won success is a will o the wisp at other times they stem from loyalty to a respected and trusted guru or even from patriotic pride and worst of all they may be a consequence of a political ideology which imposes its own interpretation on scientists observations of the natural world Unreason and credulity supervene illusory phenomena are described and measured and theories are developed to explain them until suddenly often for no single reason the bubble bursts leaving behind it a residue of acrimony recrimination embarrassment and ruined reputations Here then are radiations measured with high precision yet existing only in the minds of those who observed them the Russian water which some thought might congeal the oceans phantom diseases that called for heroic surgery monkey testis implants that restored the sexual powers of ageing rouses and of tired sheep truths about genetics and about the nature of matter perceptible only to Aryan scientists in the Third Reich or Marxist

ideologues in the Soviet Union and much more *The Undergrowth of Science* explores in terms accessible to the lay reader the history of such episodes up to our own time in all their absurdity tragedy and pathos **Russia's Turn to Persia** Denis V. Volkov, 2018-08-16 Iran has remained one of the most effective tools in Russia's foreign policy towards the West for more than two hundred years Drawing on previously unpublished and recently declassified sources which change the established wisdom on many aspects of the history of Russia and Iran Denis V Volkov examines this relationship and situates it within the broader context of Oriental studies With a particular focus on the activities of scholars diplomats as well as scholars involved in academia missionary activities and the military within their own professional domains Volkov analyses the interaction of intellectuals with state structures and their participation in the process of shaping and conducting foreign policy towards Iran This work explores the specific institutional practices of Russia's Oriental studies including organisation of scholarly intelligence networks taking advantage of state power for the promotion of institutional and individual interests and profound engagement with Russia's domestic and foreign policy discourses of its time **Holographic Visions** Sean F. Johnston, 2006-04-06 Holography exploded on the scientific world in 1964 but its slow fuse had been burning much longer Over the next four decades the echoes of that explosion reached scientists engineers artists and popular culture Emerging from classified military research holography evolved to represent the power of post war physics an aesthetic union of art and science the countercultural meanderings of holism a cottage industry for waves of would be entrepreneurs and a fertile plot device for science fiction New working cultures sprang up to mutate holography redefining its products reshaping its audiences and reconceiving its applications The outcomes included ever more sublime holograms and exquisitely sensitive measuring techniques but also priority disputes prurience and poisonous business rivalries New subjects cross intellectual borders and so do their explanations This book draws on the history and philosophy of science and technology social studies politics and cultural history to trace the trajectory of holography The result is an in depth account of how new science emerges Based on unprecedented interviews with pioneer holographers and extensive archival research it reveals how science technology art and wider culture are entwined in the modern world *Slavic Review* ,1999 *American quarterly of Soviet and East European studies* varies *American Scientist* ,1942 Current Contents Institute for Scientific Information (Philadelphia),1999 *Current Contents* ,1999 *Historical Abstracts* Eric H.
