State And Economic Development Lessons From The Far East:

The State and Economic Development Robert Fitzgerald, 2013-05-13 This book explores the role of national governments during the process of industrialisation in East Asia and examines the relationship between the State and business clearing up many Western misconceptions The similarities and differences which exist between nations in this region and the influence of Japan as a role model are also investigated Government industry linkages and an overview of economic rationale also studied in this volume are following the establishment of market orientated economies in many Far Eastern countries This book brings new insight into the business politics relationship which gives the reader a complete understanding of the East Asian economic miracle

Law and Development in East and South-East Asia Christoph Antons, 2005-10-05 During the 1980s and 1990s Asian developmental states attracted much attention in political science and economics literature but the role of law in the economic development was neglected It was only after the Asian crisis of 1997 that many analysts began to focus on a lack of regulation and transparency as a major factor triggering the crisis The crucial questions now are how successful the current reforms will be and which features of the Asian approach to commercial law will be resistant to reform pressures This book examines the prospects for commercial law reform in Asia giving particular attention to Japan and Singapore as frequently cited role models for Asian developmentalism and also examining development related business laws in countries such as China Korea Indonesia Malaysia Vietnam and the Philippines

Education and Training for Development in East Asia David Ashton, Francis Green, Donna James, Johnny Sung, 2005-08-04 The East Asian miracle or its supposed demise is always news The Four Tiger economies of Hong Kong Singapore Taiwan and South Korea have experienced some of the fastest rates of economic growth ever achieved This book provides the first detailed analysis of the development of education and training systems in Asia and the relationship with the process of economic growth

Democratization, Development, and the Patrimonial State in the Age of Globalization Eric N. Budd, 2004-01-01 Postcolonial Third World states have historically faced two major challenges the promotion of economic development and the creation of stable democracies These challenges persist today in the face of globalization While some developing former colonial countries have gotten a foothold up on globalization others are not so fortunate In *Democratization Development and the Patrimonial State in the Age of Globalization* author Eric Budd investigates and compares forms of patrimonialism in several developing states The traditional criticism of development countries leveled by liberal democracies and their constituents is that too much patrimonialism acts as a barrier in the face of economic development and democratization The author considers this criticism through a comparative study of the Philippines Peru Taiwan Chile Ecuador and Indonesia Each case holds a specific relationship to patrimonialism As a result these cases provide the author with a unique window into the question of patrimonialism and its effect on economic development and the development of democratic societies *Democratization Development and the Patrimonial State in the Age of Globalization* offers a significant contribution to disciplinary discussions

in international relations economics sociology development studies and globalization studies *Korea's Growth and Industrial Transformation* H. Lim, 1998-08-19 This book seeks to explore the role of domestic politics in the selection of industrial policy and the different patterns of industrial transformation in East Asia The approach taken in this book partly draws on earlier studies of industrial transformation product cycle theory and statist theory but combines and complements them by emphasizing the role of coalition in industrial policy and industrial transformation **East Asian Development** Yılmaz Akyüz, 1999 Comprises five papers which examine the success of economic development in South East and East Asia in the period from the 1950s to the early 1990s Argues that this success was built on a strong accumulation dynamic rather than market efficiency Includes a paper on administrative reform in South Korea and Taiwan **Forging a Singaporean Statehood: 1965-1995** Robin Ramcharan, 2021-10-25 This work takes an in depth look at the multi faceted contemporary relationship between Singapore and Japan since the end of World War II It is the story of a relationship between an economic superpower Japan and an enterprising city state whose leaders have sought to emulate not only Japan's economic success but several key facets of Japanese society as well No other country surpasses Singapore in its public admiration of Japan How is it possible for a multi ethnic Singapore to emulate a relatively homogeneous Japan What features of economic and political motives behind the attempt to emulate Japan These and other questions are addressed in this work which will be of interest to scholars of the international relations and security of East and Southeast Asia **The Oxford Handbook of Asian Business Systems** Michael A. Witt, Gordon Redding, 2014-01-30 Much of the existing literature within the varieties of capitalism VOC and comparative business systems fields of research is heavily focused on Europe Japan and the Anglo Saxon nations As a result the field has yet to produce a detailed empirical picture of the institutional structures of most Asian nations and to explore to what extent existing theory applies to the Asian context The Oxford Handbook of Asian Business Systems aims to address this imbalance by exploring the shape and consequences of institutional variations across the political economies of different societies within Asia Drawing on the deep knowledge of 32 leading experts this book presents an empirical comparative institutional analysis of 13 major Asian business systems between India and Japan To aid comparison each country chapter follows the same consistent outline Complementing the country chapters are eleven contributions examining major themes across the region in comparative perspective and linking the empirical picture to existing theory on these themes A further three chapters provide perspectives on the influence of history and institutional change The concluding chapters spell out the implications of all these chapters for scholars in the field and for business practitioners in Asia The Handbook is a major reference work for scholars researching the causes of success and failure in international business in Asia *Singapore* Garry Rodan, 2017-07-12 This title was first published in 2001 A collection of valuable previously published essays analyzing the major social dynamics shaping the increasingly complex society economy and polity of contemporary Singapore Topics range from ideology and culture to the character of the state and its institutions

and the possibilities for political reform *Managing Development in a Globalized World* Habib Zafarullah,Ahmed Shafiqul Huque,2017-09-25 Traditionally development has been rooted in ideologies and assumptions prevalent in the developed world and in practices and strategies adopted by leading industrial nations However historically eclectic ideas and approaches often clash with existing long established notions of progress and modes of realizing social and economic change *Managing Development in a Globalized World Concepts Processes Institutions* explores this topic by incorporating ideas and interpretations that have previously been neglected or given inadequate attention in the discourse on developing countries It underscores development as a continuous process that must be supported by sound policies and efficient management supplying a wider understanding of the field The authors argue that the application of innovative development techniques and best practices is essential for obtaining optimum results in meeting the needs of society They examine the style of managing development with a new perspective that links the phenomenon with changing demands and the interplay of internal external actors and a host of stakeholders An exploration of key sectors in development provides clear comprehension of problems and solutions A careful synthesis of theoretical conceptual and empirical literature the book assesses real world situations and provides insight into the operational dynamics of development policies programs and institutions It focuses on goals values and dynamics of development management that are undergoing rapid changes and continue to be enhanced to alleviate poverty and improve living standards in an era of globalization and inter regional and inter institutional synergies It highlights best practices essential for the efficient and effective delivery of human development services that are designed and put in place to obtain optimum results in meeting the needs of society
