Datapro Directory of Microcomputer Software ,1998 **Food Product Design** Ruguo Hu,2017-10-19 Statistical experimental design is currently used as a quality control technique to achieve product excellence at the lowest overall cost. It can also function as a powerful tool to optimize food products and or processes to accelerate food development cycles, reduce research costs, facilitate the transition of products from research and development to manufacturing and troubleshoot manufacturing problems. **Food Product Design A Computer Aided Statistical Approach** familiarizes readers with the methodology of statistical experimental design and its application in food product design with the aid of commonly available modern commercial software. **Food Product Design** presents basic concepts of food product design then focuses on the most effective statistical techniques and corresponding computer applications for trial design, modeling and experimental data analysis. The book presents very few theories about mathematics and statistics. Instead, it contains detailed descriptions of how to use popular computer software to solve the real mathematical and statistical problems that occur in product design. Even those with very limited knowledge of statistics and mathematics will find this a useful and highly practical book. **Food Product Design A Computer Aided Statistical Approach** will be a valuable tool for professional food engineers, technologists, scientists and industrial personnel who want to update and expand their knowledge about computer aided statistical methods in the field of food product design. Those involved in applied research at universities in food and agriculture, biological and chemical engineering and statistics will also find it useful and informative. **Robotics, Machinery and Engineering**
