Statistical And Computational Methods In Data Analysis:

Statistical and Computational Methods in Data Analysis Siegmund Brandt, 1970 **Data Analysis** Siegmund Brandt, 2012-12-06 1 1 Typical Problems of Data Analysis Every branch of experimental science after passing through an early stage of qualitative description concerns itself with quantitative studies of the phenomena of interest i.e. measurements In addition to designing and carrying out the experiment an important task is the accurate evaluation and complete exploitation of the data obtained Let us list a few typical problems 1 A study is made of the weight of laboratory animals under the influence of various drugs After the application of drug A to 25 animals an average increase of 5 % is observed Drug B used on 10 animals yields a 3 % increase Is drug A more effective The averages 5 % and 3 % give practically no answer to this question since the lower value may have been caused by a single animal that lost weight for some unrelated reason One must therefore study the distribution of individual weights and their spread around the average value Moreover one has to decide whether the number of test animals used will enable one to differentiate with a certain accuracy between the effects of the two drugs 2 In experiments on crystal growth it is essential to maintain exactly the ratios of the different components From a total of 500 crystals a sample of 20 is selected and analyzed **Statistical and Computational Methods in Data Analysis. 2.ed**, 1976 **Computational Methods for Data Analysis** Yeliz Karaca, Carlo Cattani, 2018-12-17 This graduate text covers a variety of mathematical and statistical tools for the analysis of big data coming from biology medicine and economics Neural networks Markov chains tools from statistical physics and wavelet analysis are used to develop efficient computational algorithms which are then used for the processing of real life data using Matlab Statistical and Computational Methods in Data Analysis. 2d Rev. Ed Siegmund Brandt, 1976 Statistical and Computational Methods for Complex Multicenter Data Analysis Peter Bouman, 2004 **Applications in Statistical Computing** Nadja Bauer, Katja Ickstadt, Karsten Lübke, Gero Szepannek, Heike Trautmann, Maurizio Vichi, 2019-10-12 This volume presents a selection of research papers on various topics at the interface of statistics and computer science Emphasis is put on the practical applications of statistical methods in various disciplines using machine learning and other computational methods The book covers fields of research including the design of experiments computational statistics music data analysis statistical process control biometrics industrial engineering and econometrics Gathering innovative high quality and scientifically relevant contributions the volume was published in honor of Claus Weihs Professor of Computational Statistics at TU Dortmund University on the occasion of his 66th birthday **Complex Models and Computational Methods in Statistics** Matteo Grigoletto, Francesco Lisi, Sonia Petrone, 2013-01-26 The use of computational methods in statistics to face complex problems and highly dimensional data as well as the widespread availability of computer technology is no news The range of applications instead is unprecedented As often occurs new and complex data types require new strategies demanding for the development of novel statistical methods and suggesting stimulating mathematical

problems This book is addressed to researchers working at the forefront of the statistical analysis of complex systems and using computationally intensive statistical methods **Computational Methods for Data Analysis** John M.

Chambers,1977 Computational Methods in Statistics and Econometrics Hisashi Tanizaki,2004-01-21 Reflecting current technological capacities and analytical trends Computational Methods in Statistics and Econometrics showcases Monte Carlo and nonparametric statistical methods for models simulations analyses and interpretations of statistical and econometric data The author explores applications of Monte Carlo methods in Bayesian estimation state space modeling and bias correction of ordinary least squares in autoregressive models The book offers straightforward explanations of mathematical concepts hundreds of figures and tables and a range of empirical examples A CD ROM packaged with the book contains all of the source codes used in the text
