Statistical Analysis Of Measurement Errors:

Statistical Analysis of Measurement Errors John L. Jaech, 1985-09-03 In this book the author has developed a general model of statistical inference based on maximum likelihood for experimental situations in which a multiple number of items are each measured by several different measurement methods

Statistical Evaluation of Measurement Errors Graham Dunn, 2009-01-20 The statistical methods used to evaluate and compare different methods of measurement are a vital common component of all methods of scientific research This book provides a practically orientated guide to the statistical models used in the evaluation of measurement errors with a wide variety of illustrative examples taken from across the sciences After introducing basic concepts such as precision reproducibility and reliability a detailed discussion of the sources of variability of measurements and associated variance components models is provided The central chapters deal with the design and analysis of method comparison studies concentrating primarily on quantitative measurements ranging from simple paired comparisons to more complex studies involving three or more methods This leads on to a review of methods for categorical measures

Statistical Analysis of Measurement Error Models and Applications Philip J. Brown, Wayne A. Fuller, American Mathematical Society, 1990 Measurement error models describe functional relationships among variables observed subject to random errors of measurement This book treats general aspects of the measurement problem and features a discussion of the history of measurement error models

Statistical Analysis with Measurement Error Or Misclassification Grace Y. Yi, 2017 *Statistical Analysis with Measurement Error or Misclassification* Grace Y. Yi, 2017-08-02 This monograph on measurement error and misclassification covers a broad range of problems and emphasizes unique features in modeling and analyzing problems arising from medical research and epidemiological studies Many measurement error and misclassification problems have been addressed in various fields over the years as well as with a wide spectrum of data including event history data such as survival data and recurrent event data correlated data such as longitudinal data and clustered data multi state event data and data arising from case control studies Statistical Analysis with Measurement Error or Misclassification Strategy Method and Application brings together assorted methods in a single text and provides an update of recent developments for a variety of settings Measurement error effects and strategies of handling mismeasurement for different models are closely examined in combination with applications to specific problems Readers with diverse backgrounds and objectives can utilize this text Familiarity with inference methods such as likelihood and estimating function theory or modeling schemes in varying settings such as survival analysis and longitudinal data analysis can result in a full appreciation of the material but it is not essential since each chapter provides basic inference frameworks and background information on an individual topic to ease the access of the material The text is presented in a coherent and self contained manner and highlights the essence of commonly used modeling and inference methods This text can serve as a reference book for researchers interested in statistical methodology for handling data with measurement error or

misclassification as a textbook for graduate students especially for those majoring in statistics and biostatistics or as a book for applied statisticians whose interest focuses on analysis of error contaminated data Grace Y Yi is Professor of Statistics and University Research Chair at the University of Waterloo She is the 2010 winner of the CRM SSC Prize an honor awarded in recognition of a statistical scientist's professional accomplishments in research during the first 15 years after having received a doctorate She is a Fellow of the American Statistical Association and an Elected Member of the International Statistical Institute

Handbook of Measurement Error Models Grace Y. Yi, Aurore Delaigle, Paul Gustafson, 2021-10-17

Measurement error arises ubiquitously in applications and has been of long standing concern in a variety of fields including medical research epidemiological studies economics environmental studies and survey research While several research monographs are available to summarize methods and strategies of handling different measurement error problems research in this area continues to attract extensive attention The Handbook of Measurement Error provides overviews of various topics on measurement error problems It collects carefully edited chapters concerning issues of measurement error and evolving statistical methods with a good balance of methodology and applications It is prepared for readers who wish to start research and gain insights into challenges methods and applications related to error prone data It also serves as a reference text on statistical methods and applications pertinent to measurement error models for researchers and data analysts alike

Design and Analysis of Reliability Studies Graham Dunn, 1989 This guide to a wide variety of statistical methods is designed for use in reliability studies It provides a general and practically oriented text on the dependability of behavioral

measurements These range from formal diagnoses through simple ordinal rating scales to psychometric test scores assumed to be measured on an interval scale

Statistical analysis of measurement error models and applications Philip J. Brown, Wayne A. Fuller, 1990

Measurement Errors in Surveys Paul P. Biemer, Robert M. Groves, Lars E. Lyberg, Nancy A. Mathiowetz, Seymour Sudman, 2011-09-20 WILEY INTERSCIENCE PAPERBACK SERIES The Wiley Interscience Paperback Series consists of selected books that have been made more accessible to consumers in an effort to increase global appeal and general circulation With these new unabridged softcover volumes Wiley hopes to extend the lives of these works by making them available to future generations of statisticians mathematicians and scientists This book will be an aid to survey statisticians and to research workers who must work with survey data Short Book Reviews International Statistical Institute Measurement Errors in Surveys documents the current state of the field reports new research findings and promotes interdisciplinary exchanges in modeling assessing and reducing measurement errors in surveys Providing a fundamental approach to measurement errors the book features sections on the questionnaire respondents and responses interviewers and other means of data collection the respondent interviewer relationship and the effects of measurement errors on estimation and data analysis

Measurement Error and Misclassification in Statistics and Epidemiology Paul Gustafson, 2003-09-25 Mismeasurement of explanatory variables is a common hazard when using statistical modeling techniques and particularly so in fields such as biostatistics and epidemiology where perceived risk factors cannot always be measured accurately With this perspective and a focus on both continuous and categorical variables Measurement Error and Misclassification in Statistics and Epidemiology Impacts and Bayesian Adjustments examines the consequences and Bayesian remedies in those cases where the explanatory variable cannot be measured with precision The author explores both measurement error in continuous variables and misclassification in discrete variables and shows how Bayesian methods might be used to allow for mismeasurement A broad range of topics from basic research to more complex concepts such as wrong model fitting make this a useful research work for practitioners students and researchers in biostatistics and epidemiology
