

Part B

You have told Robin Lane that based on what you know now you need to revise the estimates for some of the remaining activities. Detailed Product Design is expected to take 3 days longer than planned. Build Prototypes is expected to take 2 days less than planned and Finalized Product Design is expected to take 3 days longer than planned. Final Manufacturing Process is expected to take 2 days less than planned, while Install Production Equipment is now expected to take only 30 days. You also report that Detailed Marketing plan will be completed before the end of the New Year. She is insisting that the project be completed by January 17th in order to be ready for the Las Vegas show. She is willing to spend \$50,000 from Management Reserves to expedite shipping if necessary: \$25,000 would reduce the shipping of components by 5 days and/or \$25,000 would reduce the shipping of manufacturing parts by 5 days (Hint: Adjust lags). Prepare a memo to Robin that addresses the following questions:

1. What is the impact of the revised estimates for Finalized Product Design and Install Production Equipment on the project schedule and cost?
2. Would you recommend authorizing the expenditure of \$50,000? Explain.
3. What, if any other recommendations, would you make so that the project can achieve Robin's deadline? Justify your recommendations.

Include a Tracking Gantt chart with variance schedule that depicts your final recommendations and revised schedule.

Hint: After adjusting the Installation of Production Equipment and Finalized Product Design, level outside of slack to eliminate any resource over allocation problems.
