Estimate the Population Value with a value from a sample. Judging from the variability in sample results, how much error do we expect? How confident are we in our estimate?

Test a Claim about the Population Value with a value from a sample. If the claim is true, how much variability do we expect in sample results? Is our sample result typical or unusual?

See data in relation to random samples from the population

How much variability in random samples from this population?

Model variability with a Normal curve
