**Executive Financial Woman** ,1988 **Flood Recovery, Innovation and Response IV** D. Proverbs, C. A.

Brebbia, 2014-06-18 Flooding is a global phenomenon that claims numerous lives worldwide each year. Set up to promote research into this area of study, this book contains the proceedings of the 4th International Conference on Flood Recovery, Innovation and Response. When flooding occurs in populated areas, it can cause substantial damage to property as well as threatening human life. In addition, many more people must endure the homelessness, upset, and disruption that are left in the wake of floods. The increased frequency of flooding in the last few years, coupled with climate change predictions and urban development, suggest that these statistics are set to worsen in the future. Apart from the physical damage to buildings, contents, and loss of life, which are the most obvious impacts of floods upon households, other more indirect losses are often overlooked. These indirect and intangible impacts are generally associated with disruption to normal life as well as longer term health issues, including stress-related illness. Flooding represents a major barrier to the alleviation of poverty in many parts of the developing world, where vulnerable communities are often exposed to sudden and life-threatening events. This book covers a wide range of technical and management topics related to flooding and its impacts on communities, property, and people. These include Flood Modelling, Risk Assessment, Flood Management, Considering Blue Green Approaches to Flood Risk Management, Property level Flooding and Health Consequences, State of the art Flooding damage Survey and Assessment, Emergency Preparedness and Response, and Adaptation to Flood Risk.
