The Emergence Of Welfare Society In Japan:

The Emergence of Welfare Society in Japan Mutsuko Takahashi, 1997 This work begins by covering the historical context of welfare policy in Japan since the end of the 19th century but includes social welfare practices as well as the policy and system itself The focus of the work is on social relevance in analysing the social discourses on the politics of welfare in Japan taking into account the broad range of social and political factors implicit in making sense of the politics of welfare

Money, Trains, and Guillotines William Marotti, 2013-03-27 During the 1960s a group of young artists in Japan challenged official forms of politics and daily life through interventionist art practices William Marotti situates this phenomenon in the historical and political contexts of Japan after the Second World War and the international activism of the 1960s The Japanese government renewed its Cold War partnership with the United States in 1960 defeating protests against a new security treaty through parliamentary action and the use of riot police Afterward the government promoted a depoliticized everyday world of high growth and consumption creating a sanitized national image to present in the Tokyo Olympics of 1964 Artists were first to challenge this new political mythology Marotti examines their political art and the state's aggressive response to it He reveals the challenge mounted in projects such as Akasegawa Genpei's 1 000 yen prints a group performance on the busy Yamanote train line and a plan for a giant guillotine in the Imperial Plaza Focusing on the annual Yomiuri Independent exhibition he demonstrates how artists came together in a playful but powerful critical art triggering judicial and police response Money Trains and Guillotines expands our understanding of the role of art in the international 1960s and of the dynamics of art and policing in Japan

Risk and Public Policy in East Asia Mutsuko Takahashi, 2016-04-08 Contemporary Asian society is marked by social processes associated with the loss of stable economic growth and high employment family structures capable of caring for family members in need and governmental economic and political competence Post financial crisis job uncertainty and income and labor market polarization have become important issues in Asian societies Family structures are viewed as have been weakened with a corresponding rise in divorce and domestic violence Trust in the government is in decline Against this backdrop it is timely to review three critical issues 1 policies addressing work related risks and socio economic security 2 changes regarding the structure and stability of families and 3 issues concerning governance in times of weakened state capacity declining trust and the emergence of new politics Containing chapters written by international scholars this book introduces the concepts and theoretical approaches of risk and risk and governance and places them within the context of Asian societies

Children of the Japanese State Roger Goodman, 2000 In Japan today over 30 000 children are in the care of the state because their parents or guardians cannot or are not considered competent to look after them Drawing on his long term fieldwork in an institution for such children Roger Goodman describes what happens to them in a country that has no professional social workers and little tradition of adopting or fostering children in need of care and explains how in the 1990s the convergence of several factors in

particular Japan's rapidly declining birth rate its signing of the UN Convention on the Rights of the Child and its discovery of child abuse led to a new role for child protection institutions which had otherwise scarcely changed over the past 50 years In the process he provides the first full account in English of the development and delivery of child welfare in the world's second largest economy
