Solid State Laser Engineering Second 2e Completely Revised Updated E 1988:

Scientific and Technical Aerospace Reports ,1991 A First Course in Fuzzy and Neural Control Hung T.

Nguyen,Nadipuram R. Prasad,Carol L. Walker,Elbert A. Walker,2002-11-12 Although the use of fuzzy control methods has grown nearly to the level of classical control the true understanding of fuzzy control lags seriously behind Moreover most engineers are well versed in either traditional control or in fuzzy control rarely both Each has applications for which it is better suited but without a good understanding of both engineers cannot make a sound determination of which technique to use for a given situation A First Course in Fuzzy and Neural Control is designed to build the foundation needed to make those decisions It begins with an introduction to standard control theory then makes a smooth transition to complex problems that require innovative fuzzy neural and fuzzy neural techniques For each method the authors clearly answer the questions What is this new control method Why is it needed How is it implemented Real world examples exercises and ideas for student projects reinforce the concepts presented Developed from lecture notes for a highly successful course titled The Fundamentals of Soft Computing the text is written in the same reader friendly style as the authors popular A First Course in Fuzzy Logic text A First Course in Fuzzy and Neural Control requires only a basic background in mathematics and engineering and does not overwhelm students with unnecessary material but serves to motivate them toward more advanced studies
