DNA Analysis William Hunter, 2014-09-02 A flake of skin a strand of hair a fleck of saliva a drop of blood everywhere we

go we leave behind bits of ourselves that are as unique as fingerprints Each cell contains genetic material called DNA which holds information that scientists can use to learn about the person who left those cells behind In the past twenty five years researchers have made significant advances in all disciplines of science including the study of genetics As science has leapt forward the effect on forensics has been remarkable New knowledge of DNA has dramatically changed the amount of information available to forensic scientists at the scene of a crime opening doors that were never open before **Ballistics** Siyavush Saidian,2017-12-15 When a crime is committed with a firearm or an explosive the first people the police turn to are often ballistic analysts By examining angles bullets and explosive residue these scientists analyze the behavior of projectiles such as bullets Readers learn both how ballistics research is performed and how law enforcement officials use these findings to solve crimes The detailed main text is supplemented with engaging fact boxes unique sidebars and photographs that give readers an up close look into the scientific world of ballistic studies **Forensics in American Culture** Jean

IS THERE A CRIMINAL TYPE? After years of close observation during which I have formed many friendships with criminals, I can only answer this question in the words that I have answered it before and say that physically I have not found any evidence to show that a criminal type exists. In saying this, I know that I shall run counter to the teaching of a good many people and probably run counter to public opinion. For the criminal class and the criminal type have been written about so largely and talked about so frequently that the majority of people have come to the conclusion that our criminals come from a particular order of society and that the poorest or that there exists a type of people whose physical appearance gives outward and visible signs that proclaim the inward criminal mind. I believe both these ideas to be entirely wrong. I was confirmed in my opinion last year when I visited many of the largest prisons in the United States for I found there as I have found in England a complete absence among the prisoners of those physical and facial peculiarities that we are taught to believe differentiate criminals from ordinary citizens. Speaking on this subject to the American Congress at Washington on October 4, 1910, Sir Evelyn Ruggles Brise, K.C.B., the esteemed chairman of our Prison Commissioners, made the following statement: There is no criminal type. Nothing in the past has so retarded progress as the conviction deeply rooted and widespread that the criminal is a class by himself, different from all others, with a tendency to crime of which certain peculiarities of body are the outward and visible signs. This superstition, for such I think it must be called, was you know strengthened and encouraged by the findings of the Italian school.
