Some Issues Important In Developing Basic Radiation Protection Recommendations

**National Council on Radiation
Protection and Measurements**

Some Issues Important In Developing Basic Radiation Protection Recommendations:

Some Issues Important in Developing Basic Radiation Protection Recommendations National Council on Radiation Protection and Measurements. Meeting, 1985 **NCRP Report** National Council on Radiation Protection and Measurements, 1966 **Energy Research Abstracts**, 1986 **Management of Terrorist Events Involving Radioactive Material** National Council on Radiation Protection and Measurements, 2001 Radiation Protection in Educational Institutions National Council on Radiation Protection and Measurements. Scientific Committee 46-17 on Operational Health Physics, National Council on Radiation Protection and Measurements, 2007 Final Report: Sources and documentation United States. Advisory Committee on Human Radiation Experiments, 1995 **Advisory Committee on Human Radiation Experiments: Sources and documentation** United States. Advisory Committee on Human Radiation Experiments, 1995

Development of a Biokinetic Model for Radionuclide-contaminated Wounds and Procedures for Their Assessment, Dosimetry, and Treatment National Council on Radiation Protection and Measurements, 2007

Management of Radionuclide Therapy Patients National Council on Radiation Protection and Measurements, National Council on Radiation Protection and Measurements. Scientific Committee 91-1 on Precautions in the Management of Patients Who Have Received Therapeutic Amounts of Radioactivity, 2007 *Limitation of Exposure to Ionizing Radiation* National Council on Radiation Protection and Measurements, 1993 NCRP Report No 116 is the latest in the long series of reports on basic radiation protection criteria that began in 1934 It supersedes the predecessor in the series NCRP Report No 91 which was published in 1987 The current Report takes advantage of new information evaluations and thinking that have developed since 1987 particularly the risk estimate formulations set out in NCRP Report No 115 While the recommendations set out in this Report do not constitute a radical revision of the basic criteria they do represent a refinement of the system enunciated in Report No 91 Important changes include the utilization of revised tissue organ weighting factors and the introduction of radiation weighting factors Also noteworthy is the introduction of an allowable reference level of intake Noteworthy too is the recommendation of an age based lifetime limit for control of occupational exposures and a major simplification of limits aimed at controlling the exposure of the embryo and fetus This Report after outlining the goals and philosophy of radiation protection and the basis for exposure limits goes on to review in some detail absorbed dose equivalent dose radiation weighting factors and effective dose Committed equivalent dose and committed effective dose are also introduced Risk estimates for radiation exposure are presented and then the dose limits are enunciated The Report also covers exposure in excess of the limits limits for unusual occupational situations guidance for emergency occupational exposure and remedial action levels for naturally occurring radiation **Environmental, Safety, and Health Engineering** Gayle Woodside, Dianna Kocurek, 1997-05-26 A complete guide to environmental safety and health engineering including an overview of EPA and OSHA regulations principles of environmental engineering including pollution prevention waste and

wastewater treatment and disposal environmental statistics air emissions and abatement engineering and hazardous waste storage and containment principles of safety engineering including safety management equipment safety fire and life safety process and system safety confined space safety and construction safety and principles of industrial hygiene occupational health engineering including chemical hazard assessment personal protective equipment industrial ventilation ionizing and nonionizing radiation noise and ergonomics Structural Shielding Design for Medical X-ray Imaging Facilities National Council on Radiation Protection and Measurements, 2004 Report No 147 2004 presents recommendations and technical information related to the design and installation of structural shielding for facilities that use x rays for medical imaging The purpose of structural shielding is to limit radiation exposure to employees and members of the public The information supersedes the recommendations that address such facilities in NCRP Report No 49 Structural Shielding Design and Evaluation for Medical Use of X Rays and Gamma Rays of Energies Up to 10 MeV which was issued in September 1976 NCRP Report No 147 includes a discussion of the various factors to be considered in the selection of appropriate shielding materials and in the calculation of barrier thicknesses The Report presents the fundamentals of radiation shielding discusses shielding design goals for controlled and uncontrolled areas in or near x ray imaging facilities and defines the relationship of these goals to the NCRP effective dose limits for radiation workers and members of the public The Report includes a detailed discussion of the recommended shielding design methodology for x ray imaging facilities and provides an extensive collection of shielding data and sample shielding calculations for various types of x ray imaging facilities The Report is mainly intended for those individuals who specialize in radiation protection However it will also be of interest to architects hospital administrators and related professionals concerned with the planning of new facilities that use x rays for medical imaging
