## **Supporting Expeditionary Aerospace Forces:**

**Supporting Expeditionary Aerospace Forces** Robert S. Tripp, 1999 This report addresses support of emerging Air Force employment strategies associated with Expeditionary Aerospace Forces EAFs Although much work remains to define these new responsibilities and prepare Air Force units to meet them it is clear that the EAF concepts will play a central role in the future Air Force FAF concepts turn on the premise that rapidly tailorable quickly deployable immediately employable and highly effective air and space force packages can serve as a viable substitute for permanent forward presence in both the strategic and the tactical arenas Success of the EAF will to a great extent depend on the effectiveness and efficiency of the Agile Combat Support ACS system

**Supporting Expeditionary Aerospace Forces** Lionel A. Galway, 2000 This report addresses support of emerging Air Force employment strategies associated with Expeditionary Aerospace Forces EAFs EAF concepts turn on the premise that rapidly tailorable quickly deployable immediately employable and highly effective air and space force packages can serve as a credible substitute for permanent forward presence This research shows that to implement the EAF concept the Air Force will need to develop a comprehensive system of forward support infrastructure

Supporting Expeditionary Aerospace Forces. An Integrated Strategic Agile Combat Support Planning Framework, 1999 This report addresses support of emerging Air Force employment strategies associated with Expeditionary Aerospace Forces EAFs Although much work remains to define these new responsibilities and prepare Air Force units to meet them it is clear that the EAF concepts will play a central role in the future Air Force FAF concepts turn on the premise that rapidly tailorable quickly deployable immediately employable and highly effective air and space force packages can serve as a viable substitute for permanent forward presence in both the strategic and the tactical arenas Success of the EAF will to a great extent depend on the effectiveness and efficiency of the Agile Combat Support ACS system

**Supporting Expeditionary Aerospace Forces: New Agile Combat Support Postures**, 2000 This report addresses support of emerging Air Force employment strategies associated with Expeditionary Aerospace Forces EAFs EAF concepts turn on the premise that rapidly tailorable quickly deployable immediately employable and highly effective air and space force packages can serve as a credible substitute for permanent forward presence Success of the EAF will to a great extent depend on the effectiveness and efficiency of the Agile Combat Support ACS system in supporting expeditionary operations This study is one of a series of RAND publications that address ACS issues in implementing the EAF Others address planning practices policies and technologies that can enhance the effectiveness of the EAF

*Supporting Expeditionary Aerospace Forces*, 2002

**Supporting Expeditionary Aerospace Forces** Patrick Mills, Amatzia Feinberg, 2001 In the years to come the effectiveness of the Expeditionary Aerospace Force will pivot largely on the support system that underlies it termed the Agile Combat Support ACS system One key component of the ACS system is the electronic countermeasure ECM pod system Accordingly this documented briefing outlines the findings of a study that assessed the utility of the Reliability Availability

and Maintainability of Pods RAMPOD database as an analytical tool in support of the ECM pod system The study found that RAMPOD has significant potential for supporting ECM pod analysis particularly in the tracking and displaying of trends for pod removal repair times and in shop queue The study also found a significant number of missing data elements that could adversely affect the efficacy of the RAMPOD system In addition the RAMPOD data warehouse was found to contain data that couldn t be readily accessed through the current web based tool

*Supporting Expeditionary Aerospace Forces* Amatzia Feinberg, James Leftwich, Eric Peltz, 1955-01-01 Over a period of three years in conjunction with the Air Force RAND studied options for configuring an Air Force Agile Combat Support ACS system that would enable the achievement of Expeditionary Aerospace Force EAF operational goals This text contains the findings of such research

**Supporting Expeditionary Aerospace Forces** Robert S. Tripp, 2000 The Air Force has begun to reorganize into an Expeditionary Aerospace Force EAF This report summarizes RAND work to date on designing and evaluating the future agile combat system and mobility system needed to meet EAF operational objectives

*Supporting Expeditionary Aerospace Forces* Eric Peltz, 2000 The goal of the Expeditionary Aerospace Force EAF is to be a rapidly deployable strategic force This book argues that consolidating F 15 avionics intermediate maintenance and supporting operations from regional support bases would be a better way of achieving that goal than is presently used

**Supporting Expeditionary Aerospace Forces** Mahyar A. Amouzegar, Lionel A. Galway, Amanda Geller, 2002 In recent years the United States Air Force has found it necessary to perform a number of overseas deployments many on short notice in support of a wide range of crises Toward this goal the Air Force has begun to reorganize itself into an Expeditionary Aerospace Force that can quickly deploy from the continental United States to appropriate forward operating locations worldwide This report evaluates the manner in which Jet Engine Intermediate Maintenance JEIM shops can best be configured to facilitate such deployments The authors examine a number of JEIM support options which are distinguished primarily by the degree to which JEIM support is centralized or decentralized They then assess the performance of each option for three jet engines the F100 220 the F100 229 and the TF 34 The report concludes that for the F100 220 and F100 229 the most viable options involve establishing a single JEIM in theater during war For the TF 34 it is recommended either that the above option be exercised or that a single centralized JEIM be established in the continental United States

**Supporting Air and Space Expeditionary Forces** Patrick Mills, 2006 As part of a series on supporting the Air and Space Expeditionary Force this report looks at the current operational architecture for incorporating combat support command and control CSC2 and proposes an expanded architecture for the future

Supporting Expeditionary Aerospace Forces: Evaluation of the RAMPOD Database, 2001 Although its definition has not been finalized the Expeditionary Aerospace Force EAF concept which organizes the Air Force to respond rapidly to national security threats with tailored sustainable force is certain to play a central role in the future of the U S Air Force Several RAND reports have outlined the importance of Agile Combat Support ACS in meeting the rapid deployment and immediate

employment requirements associated with the goals of the EAF concept 1 Tripp et al 2000 presented an analytical framework to guide the design and evaluation of ACS systems In one of a series of follow up studies that use this analytical framework researchers examine how alternative maintenance support concepts for electronic countermeasure ECM pods can improve ACS for the EAF The documented briefing here is a subtask of the ECM pod analysis It focuses on the utility of the Reliability Availability and Maintainability of Pods RAMPOD database as an analytical tool particularly as it applies to the broader ECM pod study *Supporting Expeditionary Aerospace Forces An Analysis of F-15 Avionics Options*, 2000 This report discusses the manner in which emerging Air Force employment strategies for the Expeditionary Aerospace Force EAF should be supported Although much work remains to define and prepare Air Force units for FAF responsibilities it is clear that EAF concepts will play a critical role in the future Air Force EAF concepts rely on rapidly deployable immediately employable highly effective and flexible air and space force packages that can fill the same strategic role as a permanent forward presence in deterring and responding to aggression To a great extent EAF success will depend on the effectiveness and efficiency of the support system that undergirds combat operations The Air Force has designated such a support system one of its six necessary core competencies and has labeled it the Agile Combat Support ACS system Planning programming and budgetary system decisions affect both the efficiency and the effectiveness of ACS systems Long term ACS decisions in turn influence the support structures needed to meet the operational requirements of future force mixes Midterm ACS decisions affect the design development and evolution of the support infrastructure for meeting operational requirements within programming and budgeting time horizons Near term decisions affect where when and how existing resources are employed At all such stages logistics requirements can be satisfied in a variety of ways each associated with different costs degrees of flexibility response times and risks *Supporting the Future Total Force* Kristin F. Lynch, 2007 Given manpower reductions in the active duty Air Force and availability of highly trained Air National Guard ANG personnel some missions could be transferred from the active component to the ANG without significant cost to the total force Portions of missions such as Predator operations and support air mobility command and control Commander of Air Force forces staffing and base level intermediate maintenance could benefit from ANG assignment **Air Force Logistics Management Agency... ,**

Supporting Expeditionary Aerospace Forces, 2000 This report one of a series of RAND publications that address Agile Combat Support ACS issues in implementing the Expeditionary Aerospace Force EAF summarizes RAND work to date on designing and evaluating the future ACS and mobility system that is needed to meet EAF operational objectives Design decisions involve tradeoffs among system characteristics such as those between employment timelines and costs This report presents a vision of the future ACS mobility system and addresses several options for meeting munitions War Reserve Materiel WRM fuel maintenance and other support resource requirements needed for the variety of potential and uncertain scenarios that the Air Force may face The report provides examples of how support options change with alternative

employment scenarios and support technology policies and practices Our goal is to foster discussion about a vision of the future ACS and mobility system that is robust in a number of potential scenarios Developing such a vision is a complex undertaking requiring a formal integrated ACS and mobility planning process including continuous review of the ability of ACS and mobility postures to meet defense needs as they evolve This report also presents a framework for addressing these planning needs Air Force Journal of Logistics ,2009 Supporting Expeditionary Aerospace Forces Tom

LaTourrette,Donald Stevens,2002-02-01 This report assesses Forward Support Location options for intermediate maintenance of fighter aircraft It identifies feasible sites that meet operational requirements for potential expeditionary operations and derives estimates of the investment and operating requirements and costs **Strategic Analysis of Air National Guard Combat Support and Reachback Functions** Robert S. Tripp,2006 VANGUARD is the Air National Guard ANG long range transformation program It calls for the ANG to evaluate new concepts prepare for new missions and adopt a new culture that capitalizes on ANG strengths and ensures that the ANG continues to add value as warfighters and to warfighters in the future while remaining ready reliable and accessible One way to support warfighting and warfighters is to continue to support the Air and Space Expeditionary Force AEF a concept developed by the Air Force to allow quick response when appropriate to national security interests with a tailored sustainable force The ANG already plays an important role in the AEF during wartime operations This monograph evaluates options for Air National Guard combat support and reachback missions in four Air Force mission areas to support the AEF investigates transformational opportunities for the ANG that would add the most value in achieving the desired operational effects and considers how changes in unit and above unit policies are likely to affect Total Force capabilities It should be of interest to logisticians operators and mobility planners throughout the Department of Defense especially those in the Air National Guard and active Air Force *Combat Support...*,1993
