Surgeons Apprentice:

The Surgeon's Apprentice John Case, 2019-11-14 Second in a multivolume memoir *The Surgeon's Apprentice* follows a young John Case through his medical and then surgical training in an era when penicillin was a new wonder drug John's experience training at two universities and eight hospitals during his apprenticeship documents a time when the scalpel was the main surgical instrument endoscopes were primitive there were no CAT scans or MRIs and haematology investigations and laboratory tests were restricted Despite the lack of technology or perhaps because of it there was a more personal side to medicine as every patient had a personal GP who knew them The GPs ran twice daily surgeries and even visited in their own homes those unable to attend the surgery Tragic and poignant in places uproaringly funny in others this memoir provides a glimpse of a way of teaching and living that is now lost to us John's wonderfully engaging voice brings his adventures and misadventures alive in the pages of *A Surgeon's Apprentice* and will have readers cringing along with him as he settles into the Coffin at night and struggling beside him as he questions the rationality morality and even legality of the choices he must make in treating his patients

Surgery, Skin and Syphilis Philip K. Wilson, 2016-08-22 Daniel Turner's prolific writings provide valuable insight into the practice of a commonplace Enlightenment London surgeon Examining his personal professional and genteel achievements Enhances our understanding of the boundary between surgeons and physicians in Enlightenment marketplace practice Turner's pioneering writing on skin disease *De Morbis Cutaneis* emphasizes the skin's role as a physical and professional boundary between university educated physicians who treated internal disease and apprentice trained surgeons relegated to the care of external disorders Turner's career long crusade against quackery and his voluminous writings on syphilis a common surgical disorder provide a refined view into distinction between orthodox and quack practices in eighteenth century London

Physicians and Surgeons in Glasgow, 1599-1858 Kordesch, 1999-07-01 Traces the establishment of the Royal College of Physicians and Surgeons of Glasgow as a licensing body to its eminence as a centre of teaching in the 18th century The text then covers the subsequent decline of the college in the 19th century with an account of how in conjunction with Glasgow University it re-established itself as the guarantor of high medical standards of learning and practice

Surgeons, Smallpox and the Poor Allan Everett Marble, 1993 Allan Marble describes the practice of medicine and surgery in Nova

Scotia during the province's period of early settlement in the last half of the eighteenth century. Investigating such matters as the role of the state in providing medical care, the structure of the medical community and the physical conditions people had to endure, he situates his discussion in the context of more general Nova Scotian history.

A history of surgery D. de Moulin, 2012-12-06 Surgery as a medical discipline has from its beginnings appealed to the imagination of many. It is therefore not surprising to find that its colourful past has induced quite a few authors to take up their pens. The truth of this in the Netherlands is witnessed by a number of dissertations and monographs and especially by the numerous articles related to the history of surgery which have appeared in the medical weekly *Nederlands Tijdschrift voor Geneeskunde* particularly during the two decades preceding the Second World War. The memorial volume published in 1977 by the *Nederlandse Vereniging voor Heelkunde* Association of Surgeons of the Netherlands has thoroughly covered the history of Dutch surgery since the turn of the century but a chronological survey of the earlier events which led to these modern achievements is still wanting. This book has been written with a view to meeting this need. In it Dutch surgery has by no means been taken as an isolated phenomenon but considered in its context with European surgery as a whole. Foreign influences on the surgery abroad are discussed, Netherlands and conversely Dutch influences whilst contemporary medical thinking is set against a cultural and political background. It is hoped that this approach will allow the book to exceed the narrow boundaries of campanilismo and make it of interest to non-Dutch readers as well.

The Voyages and Manifesto of William Fergusson, A Surgeon of the East India Company 1731-1739 Derek L. Elliott, 2021-03-03 This volume brings to publication for the first time the manuscript of William Fergusson, a Scottish ship's surgeon who sailed for the East India Company in the 1730s. Written in 1767 while in retirement, Fergusson's diaries are the memories of his youth spent travelling the world during his apprenticeship. They detail the four voyages he took: the first a passage from Scotland to England with a landing in Ireland and three others to the East, calling at ports in the Atlantic, southern Africa, Arabia, India and Southeast Asia before reaching as far as China. Almost nothing is known of Fergusson and none of his other writings are known to survive. Remaining evidence suggests that he was an average man of his class who travelled the well-plied trade routes of European merchant capitalism. While many logbooks of these voyages survive, comparatively few accounts were written by the men who sailed them. Fewer still ever come to light. Fergusson's manuscript offers a rare new source on what were by then the relatively routine voyages of the East India Company's early trading network, providing a treasure trove of comments on the politics, economics, societies and religious beliefs and practices he witnessed along the way. Originally titled *Journals of my Voyages*, *Manifesto* the name suggests Fergusson's manuscript offers far more than the insights usually contained in contemporary travelogues. In his manifesto, readers will discover Fergusson's impassioned polemics on natural religion, devotional enthusiasm, just governance, all while he implores the principles of rationality and reason. It is truly a manifesto of Enlightenment thought. As such, it also provides a unique example of how those who sailed for the East India Company during

the early modern era participated in a global intellectual exchange of ideas Fergusson wrote his private memories in twenty two small bound booklets all of which have been transcribed and annotated to guide the reader These are presented here along with a critical introduction that contextualises the complex eighteenth century world into which Fergusson voyaged including elements of his role as a ship s surgeon the Indian Ocean trading and political environment and the ideas of the Enlightenment he so passionately expressed Researchers interested in the histories of ideas medicine early modern colonialism maritime merchant empires as well as historians of Africa and Asia will find much new information to explore within the pages of this volume

The Charitable Imperative Colin Jones,2024-12-06 Drawing on a wide variety of archival and secondary sources The Charitable Imperative originally published in 1989 provides an overview of the very different institutions that treated the poor in France from the seventeenth through to the early nineteenth centuries hospitals and poorhouses military infirmaries reformatories for prostitutes holding places for the insane and so on It recovers much of the daily realities of the institutions for those who lived in or passed through them and highlights the very limited progress made in most of them by the medical profession The principle of charity which underpinned this system of relief placed moral and social obligations on all who dealt with the poor a kind of charitable imperative affected the thinking and behaviour of the administrators who managed the institutions the nursing sisters who gave their lives and the donors who gave up their possessions to meet the needs of the poor However the poor were also expected to pay their part with the result that the Ancien R gime charity subsumed compulsion and repression as well as compassion In spite of efforts to introduce a state sponsored welfare system during the French Revolution the charitable imperative was a legacy of the Ancien R gime to much of the nineteenth century The breadth of institutions covered and the length of the historical period under review will ensure the appeal of this book to a wide variety of historians In particular the chapters on nursing sisters will be of great interest to social historians as well as those working in the history of medicine

The Common Lot Margaret Pelling,2014-06-11 This important collection of Margaret Pelling s essays brings together her key studies of health medicine and poverty in Tudor and Stuart England including a number published here for the first time They show that then as now health and medical care were everyday obsessions of ordinary people in the Tudor and Stuart era Margaret Pelling s book brings this vital dimension of the early modern world in from the periphery of specialist study to the heart of the concerns of social economic and cultural historians

Shop Floor Bert De Munck, Steven L. Kaplan, Hugo Soly, 2007 Apprenticeship or vocational training is a subject of lively debate Economic historians tend to see apprenticeship as a purely economic phenomenon as an incomplete contract in need of legal and institutional enforcement mechanisms The contributors to this volume have adopted a broader perspective They regard learning on the shop floor as a complex social and cultural process to be situated in an ever changing historical context The results are surprising The authors convincingly show that research on apprenticeship and learning on the shop floor is intimately associated with migration patterns family economy and household strategies gender perspectives urban identities and general educational and pedagogical contexts *Annual Report of the Surgeon General, U.S. Navy, Chief of the Bureau of Medicine and Surgery, Concerning Statistics of Diseases and Injuries in the United States Navy for the Calendar Year ...* United States.
