Surgery Of The Diencephalon:

Surgery of the Diencephalon Robert Holtzman, 2012-12-06 The problems of surgical intervention in and about the diencephalic region have stimulated the interest of neurosurgeons throughout the world It was therefore not totally surprising when Professor A N Konovalov proposed this topic for discussion at the Fifth Annual Stonwin Medical Conference Bringing the leading figures in this area to New York for a roundtable conference was an exciting challenge Professor Russell H Patterson Jr generously consented to be our guest of honor The conference was held at the Winston Estate on July 13 14 1987 and met our every expectation for a vigorous exchange of individual experiences and more importantly for a dialogue directed toward present and future expectations in the surgery of this region In addition the discussions at that small dinner at the Harvard Club of New York led to the creation of an exchange program for neurosurgical residents fellows and faculty members of the N N Burdenko Neurosurgical Institute Academy of Medical Science and the Department of Neurosurgery of the New York Neurological Institute which was planned for the spring and summer of 1988 The Stonwin Conference and the exchange agreement and program fostered by the Harry Winston Medical Foundation Inc represent the fulfillment of goals conceived by Harry Winston and promulgated by his sons Ronald and Bruce Henry B Roberts Jr

Microneuroanatomy and Surgery Feres Chaddad-Neto, Marcos Devanir Silva da Costa, 2022-01-31 Microneuroanatomy is essential to understanding the brain In many cases passing on neuroanatomical knowledge is a difficult task to accomplish yet this is chiefly due to those who are tasked with conveying this knowledge in classes and lectures or in books In reality neuroanatomy is simple and needs to be understood as a tool for approaching the different areas of the brain not as an obstacle and the only way to overcome this problem is to correlate neuroanatomy with various types of disease arteriovenous malformations aneurysms tumors cavernomas hydrocephalus etc This book provides a novel approach to the relation between microneuroanatomy and brain diseases Each chapter addresses a specific neuroanatomical region and correlates all the key neuroanatomical aspects with diseases that affect it further each chapter provides detailed insights into safely performing brain surgery in the respective region **National Library of Medicine Audiovisuals Catalog** National
