The Hunters Or the Hunted? C. K. Brain, 1983-08 Amongst scientists involved in taphonomy C K Brain stands out as the pioneer this impressive book is a statement of his investigations The Hunters or the Hunted is a very important book for paleoanthropology It presents the first thorough analysis of the Sterkfontein Valley assemblages contributes significantly to the resolution of lingering controversies and by placing the old information in a fresh perspective enables new and more sophisticated questions to be asked not only of the South African material but of similar assemblages elsewhere Another contribution is that it reinforces the recent change in feelings as to what constitutes data for the value of looking at fossil and contemporary bones as closely as this is clear Brain urges the necessity of recovering fossils with a high regard for subtle detail I hope excavators of any vertebrate fossil site will be persuaded to follow his advice and pay more attention to these features of bone accumulations that have been previously neglected for taphonomy can be a powerful tool in elucidating the problems of fossil assemblages especially when handled with the care and caution that Brain brings to the subject Andrew Hill Nature

Handbook of Pleistocene Archaeology of Africa Amanuel Beyin, David K. Wright, Jayne Wilkins, Deborah I. Olszewski, 2023-08-17 This handbook showcases an Africa wide compendium of Stone Age archaeological sites and methodological advances that have improved our understanding of hominin lifeways and biogeography in the continent The focal time spans the Pleistocene Epoch c 2.5 million 11 700 years ago during which important human traits such as obligate bipedalism that freed the hands

to engage in creative activities a large brain relative to body size language and social complexity developed in the general forms that they are found today The handbook is the first of its kind and it is expected to play a significant role in human evolutionary research by Collating the African Stone Age record which exists in a fragmented state along the lines of national boundaries and colonial experiences Showcasing emerging conceptual and methodological advances in African Pleistocene archaeology Providing reference datasets for teaching and researching African prehistory Making Africa s Stone Age record accessible to researchers and students based in Africa who may not have access to journal publications where most new field discoveries are published The Handbook features 128 chapters of which 116 are site entries grouped by the host countries and presented in an alphabetical order A number of those site related entries examine multiple archaeological localities lumped under specific projects or study areas The rest of the contributions deal with methodological topics such as luminescence and radiocarbon dating field data recovery lithic analysis micromorphology and hominin fossil and zooarchaeological records of Pleistocene Africa The introductory chapter provides an historical overview of the development of Stone Age Paleolithic archaeology in Africa beginning in the mid 19th century and paleoenvironmental and chronological frameworks commonly used to structure the continent s Pleistocene record By making a good amount of African Stone Age literature accessible to researchers and the public we wish to promote interest in human evolutionary research in the continent and elsewhere Awarded the 2025 The Best Book Award by The Society of Africanist Archaeologists **Dragon Bone Hill** Noel Thomas Boaz, Russell L. Ciochon, 2004 Researching the famous fossil site of Dragon Bone Hill in China scientists Noel T Boaz and Russell L Ciochon retell the story of the cave s unique species of early human Homo erectus

Why It's Ok to Talk to Your Dog David Paxton, 2011 Sensational A profound re appraisal of human evolution with dogs Our ability to speak words set us apart from other human like species who could not Those other species are now extinct But the anatomy for speaking words interferes with our sense of smell Ancestors of the dog moved into caves of human ancestors some 130 000 years ago As humans and dogs adapted to each other a unique co evolved partnership emerges We became part of each other s nature Therefore if we desire to live in naturally vibrant communities the human dog partnership must be nurtured and managed well **The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers** Vicki Cummings, Peter Jordan, Marek Zvelebil, 2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate The Oxford Handbook of the Archaeology and Anthropology of Hunter Gatherers provides a comprehensive review of hunter gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as

well as issues of diet health and gender relations all central topics in hunter gatherer research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity

African Genesis Sally C. Reynolds, Andrew Gallagher, 2012-03-29 The discovery of the first species of African hominin *Australopithecus africanus* from Taung South Africa in 1924 launched the study of fossil man in Africa New discoveries continue to confirm the importance of this region to our understanding of human evolution Outlining major developments since Raymond Dart's description of the Taung skull and in particular the impact of the pioneering work of Phillip V Tobias this book will be a valuable companion for students and researchers of human origins It presents a summary of the current state of palaeoanthropology reviewing the ideas that are central to the field and provides a perspective on how future developments will shape our knowledge about hominin emergence in Africa A wide range of key themes are covered from the earliest fossils from Chad and Kenya to the origins of bipedalism and the debate about how and where modern humans evolved and dispersed across Africa

Commingled and Disarticulated Human Remains Anna J. Osterholtz, Kathryn M. Baustian, Debra L. Martin, 2013-08-15 Commingled and Disarticulated Human Remains Working Toward Improved Theory Method and Data brings together research that provides innovative methodologies for the analysis of commingled human remains It has temporal and spatial breadth with case studies coming from pre state to historic periods as well as from both the New and Old World Highlights of this volume include standardizes methods and presents best practices in the field using a case study approach demonstrates how data gathered from commingled human remains can be incorporated into the overall interpretation of a site explores best way to formulate population size using commingled remains Field archaeologists bioarchaeologists academic anthropologists forensic anthropologists zoo archaeologists and students of anthropology and archaeology will find this to be an invaluable resource

Hominin Environments in the East African Pliocene René Boë, Zeresenay Alemseged, Anna K. Behrensmeyer, 2007-09-08 This volume presents the work of researchers at many sites spanning the East African Pliocene The authors take a broad approach that seeks to compare paleoenvironmental and paleoecological patterns across localities and among various taxonomic groups This volume aims to synthesize large amounts

of faunal data and to present the evolution of East African vertebrates in the context of environmental and climatic changes during the Pliocene Changing Climates, Ecosystems and Environments within Arid Southern Africa and Adjoining Regions Jörgen Runge, 2015-10-30 This book is volume 33 of the yearbook series Palaeoecology of Africa presenting the outcome of atribute conference to the internationally recognized South African researcher and palynologist Professor Louis Scott He has recently retired but is continuing his active research career The conference proceedings and articles published here **Tigers in Africa** Carmel Schrire, 2002 This text is a presentation of the diverse themes that constitute the past at the Southern tip of Africa Human and carnivore evolution colonial slavery and apartheid science and romance are all intermeshed to show how we create the past and also how we understand the present **The Origins of Human Society** Peter Bogucki, 2000-01-04 The Origins of Human Society traces the development of human culture from its origins over 2 million years ago to the emergence of literate civilization In addition to a global coverage of prehistoric life the book pays specific attention to the origins and dispersal of anatomically modern humans the development of symbolic expression the transition from mobile foraging bands to sedentary households early agriculture and its consequences the emergence of social differentiation and hereditary ranking and the prehistoric roots of ancient states and empires The Blackwell History of the World Series The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past for every curious person in every part of the world It will comprise some two dozen volumes of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time The volumes are narrative in form giving balanced attention to social and cultural history in the broadest sense as well as to institutional development and political change Each provides a systematic account of a very large subject but they are also both imaginative and interpretative The Series is intended to be accessible to the widest possible readership and the accessibility of its volumes is matched by the style of presentation and production Living on the edge - interdisciplinary perspectives on coastal and marine ecosystems in human prehistory Manuel Will, Andrew Green, Jon McVey Erlandson, Ximena S. Villagran, Antonieta Jerardino, 2023-06-07 **The Evolution of Human Hunting** Matthew H. Nitecki, Doris V. Nitecki, 2013-11-11 The successful early adaptations of man involve a complex interplay of biological and cultural factors There is a rapidly growing number of paleontologists and paleoanthropologists who are concerned with hominid foraging and the evolution of hunting New techniques of paleoanthropology and taphonomy and new information on human remains are added to the traditional approaches to the study of past human hunting and other foraging behavior There is also a resurgence of interest in the early peopling of the New World The present book is the result of the Ninth Annual Spring Systematics 10 1986 in the Symposium on the Evolution of Human Hunting held on May Field Museum of Natural History in Chicago We are grateful to the NSF grant no BNS 8519960 for partial financial support in arranging the symposium In preparation of this volume we have received assistance from many people particularly the reviewers of

individual chapters it is impossible to name them all We must however single out Drs Richard G Klein and Glen H Cole for their encouragement at various stages of preparation of the symposium and this volume and for being a help to the anthropological knowledge Zbigniew Jastrzebski assisted with the figures and Paul K Johnson diligently typed the camera ready copy and patiently coordinated the endless book making chores

Archaeology at the Millennium Gary M. Feinman, T. Douglas Price, 2007-09-27 In this book internationally distinguished contributors consider hot topics in turn of the millennium archaeology and chart an ambitious agenda for the future

Early Human Behaviour in Global Context Ravi Korisettar, Michael D. Petraglia, 2003-09-02 Early Human Behaviour in a Global Context will be of use to students and professionals who are interested in prehistory Paleolithic archaeology and paleoanthropology Those interested in our ancestors and their place in the natural world will also benefit from the information presented in this book Chapters focus on the nature of archaeological evidence stone tool technology subsistence practices settlement distributions

Evolutionary History of the Robust Australopithecines Frederick E. Grine, 2017-09-29 In paleoanthropology the group of hominids known as the robust australopithecines has emerged as one of the most interesting Through them we have the opportunity to examine the origin natural history and ultimate extinction of not just a single species but of an entire branch in the hominid fossil record It is generally agreed that the human lineage can be traced back to this group of comparatively small brained large toothed creatures This volume focuses on the evolutionary history of these early hominids with state of the art contributions by leading international authorities in the field Although a case can be made for a robust lineage the functional and taxonomic implications of the morphological features are subject to vigorous disagreement An area of lively debate is the possible causal relationship between the presence of early Homo and the origin evolution and virtual extinction of robust australopithecines This volume summarizes what has been learned about the evolutionary history of the robust australopithecines in the 50 years since Robert Broom first encountered the visage of a new kind of ape man from Kromdraai New discoveries from Kromdraai to Lomekwi have served to keep us aware that the paleontological record for hominid evolution is hardly exhausted Because of such finds no single volume can hope to stand as a summary on the robust australopithecines for very long but this classic volume comes close to achieving this goal The book sheds new light upon some old questions and also acts to provide new questions The answers to those questions bring us closer to a fuller understanding and appreciation of the origins evolution and ultimate demise of the robust australopithecines Since the robust australopithecines most likely stand as our closest relatives a better understanding of their origin history and demise serves to provide heightened appreciation of the course of human evolution itself This definitive volume addresses the questions and problems surrounding this important lineage
