The Indian Response to European Technology and Culture, (A.D. 1498-1707) Ahsan Jan Qaisar, 1998 THE INDIAN RESPONSE TO EUROPEAN TECHNOLOGY AND CULTURE: AD 1498-1707 A. J. Qaisar,1982 **Fetishisation of Plural Time** Nitin Sinha, 2025-06-02 From the viewpoint of social history is time itself a plural entity or are there multiple forms of engagement in and with it Pivoted around this question Sinha attempts to rethink the current theory and practice of history writing by pointing the pitfalls of the growing fetishisation of plurality and the plural time framework Engaging a range of studies in History Anthropology and Sociology Sinha provides a critical assessment of some of the leading frameworks on time studies questions their foundational premises highlights their limitations and proposes an alternative framework that is attuned to privileging the approach of social history The purposes of the latter the book argues is best served when time s irreversible character is not diluted under the weight of plurality Plurality in time is an outcome of practices and their historicisation plurality of time can become an empty statement Rather than defining what time is the book casts that inquiry into the historical mould to explore how time as a contestatory resource becomes part of social relationships and what it does to them when scripts of power align themselves with the control of time Understanding Business Markets Vivek Suneja, 2017-10-03 First published in 2002 Routledge is an imprint of Taylor and Francis an informa company The Portuguese in India M. N. Pearson, 2006-11-02 This is a clear account written from an Indian point of view of Portuguese activities in India Implicit Understandings Stuart B. Schwartz, 1994-11-25 World wide in scope this volume brings together the work of twenty historians anthropologists and literary scholars who have tried to examine the nature of the encounter between Europeans and the other peoples of the world from roughly 1450 to 1800 the **Intellectual Curiosity and the Scientific Revolution** Toby E. Huff, 2010-10-11 Seventeenth century Early Modern era Europe witnessed an extraordinary flowering of discoveries and innovations This study beginning with the Dutch invented telescope of 1608 casts Galileo s discoveries into a global framework Although the telescope was soon transmitted to China Mughal India and the Ottoman Empire those civilizations did not respond as Europeans did to the new instrument In Europe there was an extraordinary burst of innovations in microscopy human anatomy optics pneumatics electrical studies and the science of mechanics Nearly all of those aided the emergence of Newton's revolutionary grand synthesis which unified terrestrial and celestial physics under the law of universal gravitation That achievement had immense implications for all aspects of modern science technology and economic development The economic implications are set out in the concluding epilogue All these unique developments suggest why the West experienced a singular scientific and economic ascendancy of at least four centuries Doctoring Traditions Projit Bihari, 2016-10-14 Like many of the traditional medicines of South Asia Ayurvedic practice transformed dramatically in the later nineteenth and early twentieth centuries With Doctoring Tradition Projit Bihari Mukharji offers a close look at that recasting upending the widely held yet little examined belief that it was the

result of the introduction of Western anatomical knowledge and cadaveric dissection Rather Mukharji reveals what instigated those changes were a number of small technologies that were introduced in the period by Ayurvedic physicians men who were simultaneously Victorian gentlemen and members of a particular Bengali caste The introduction of these devices including thermometers watches and microscopes Mukharji shows ultimately led to a dramatic reimagining of the body By the 1930s there emerged a new Ayurvedic body that was marked as distinct from a biomedical body Despite the protestations of difference this new Ayurvedic body was largely compatible with it The more irreconcilable elements of the old Ayurvedic body were then rendered therapeutically indefensible and impossible to imagine in practice The new Ayurvedic medicine was the product not of an embrace of Western approaches but of a creative attempt to develop a viable alternative to the Western tradition by braiding together elements drawn from internally diverse traditions of the West and the East History of Horology Anthony Turner, James Nye, Jonathan Betts, 2022-07-28 A General History of Horology describes instruments used for the finding and measurement of time from Antiquity to the 21st century In geographical scope it ranges from East Asia to the Americas The instruments described are set in their technical and social contexts and there is also discussion of the literature the historiography and the collecting of the subject The book features the use of case studies to represent larger topics that cannot be completely covered in a single book The international body of authors have endeavoured to offer a fully world wide survey accessible to students historians collectors and the general reader based on a firm understanding of the technical basis of the subject At the same time as the work offers a synthesis of current knowledge of the subject it also incorporates the results of some fundamental new and original research <u>A History of Modern India,</u> 1480-1950 Claude Markovits, 2004-09-24 Praise for the hardback edition an impressively scholarly and immensely detailed text a welcome and strongly recommended contribution to World History and India History collections Library Bookwatch Recommended Choice A History of Modern India provides a comprehensive chronological analysis of India s vibrant and diverse history As well as examining the evolution of the relationship between the society and the state in its various economic social cultural and political forms A History of Modern India analyses the major empires in modern India from the Moghuls 1580 1739 to the Raj 1818 1947 and discusses the economic social and intellectual dynansm that accompanied intervening periods of political fragmentation The book explores the difficulties confronting the rise of Indian nationalismand the consequent confrontation between religious communities what should have been the crowning victory of a pacifist anti colonial movement was instead brutally resolved with the violence of Partition in 1947 Asia in the Making of Europe. Volume III Donald F. Lach, Edwin J. Van Kley, 2015-03-12 This monumental series acclaimed as a masterpiece of comprehensive scholarship in the New York Times Book Review reveals the impact of Asia s high civilizations on the development of modern Western society The authors examine the ways in which European encounters with Asia have altered the development of Western society art literature science and religion since the Renaissance In Volume III A Century of

Advance the authors have researched seventeenth century European writings on Asia in an effort to understand how contemporaries saw Asian societies and peoples Writing the Mughal World Muzaffar Alam, Sanjay Subrahmanyam, 2012 Between the mid sixteenth and early nineteenth century the Mughal Empire was an Indo Islamic dynasty that ruled as far as Bengal in the east and Kabul in the west as high as Kashmir in the north and the Kaveri basin in the south The Mughals constructed a sophisticated complex system of government that facilitated an era of profound artistic and architectural achievement They promoted the place of Persian culture in Indian society and set the groundwork for South Asia's future development In this volume two leading historians of early modern South Asia present nine major joint essays on the Mughal Empire framed by an essential introductory reflection Making creative use of materials written in Persian Indian vernacular languages and a variety of European languages their chapters accomplish the most significant innovations in Mughal historiography in decades intertwining political cultural and commercial themes while exploring diplomacy state formation history writing religious debate and political thought Muzaffar Alam and Sanjay Subrahmanyam center on confrontations between different source materials that they then reconcile enabling readers to participate in both the debate and resolution of competing claims Their introduction discusses the comparative and historiographical approach of their work and its place within the literature on Mughal rule Interdisciplinary and cutting edge this volume richly expands research on the Mughal state early modern South Asia and the comparative history of the Mughal Ottoman Safavid and other early modern empires **Enemy of All Mankind** Steven Johnson, 2021-05-11 Thoroughly engrossing a spirited suspenseful economically told tale whose significance is manifest and whose pace never flags The Wall Street Journal From The New York Times bestselling author of The Ghost Map and Extra Life the story of a pirate who changed the world Henry Every was the seventeenth century s most notorious pirate The press published wildly popular and wildly inaccurate reports of his nefarious adventures The British government offered enormous bounties for his capture alive or preferably dead But Steven Johnson argues that Every's most lasting legacy was his inadvertent triggering of a major shift in the global economy Enemy of All Mankind focuses on one key event the attack on an Indian treasure ship by Every and his crew and its surprising repercussions across time and space It's the gripping tale of one of the most lucrative crimes in history the first international manhunt and the trial of the seventeenth century Johnson uses the extraordinary story of Henry Every and his crimes to explore the emergence of the East India Company the British Empire and the modern global marketplace a densely interconnected planet ruled by nations and corporations How did this unlikely pirate and his notorious crime end up playing a key role in the birth of multinational capitalism In the same mode as Johnson's classic nonfiction historical thriller The Ghost Map Enemy of All Mankind deftly traces the path from a single struck match to a global conflagration Astronomy in India, 1784-1876 Joydeep Sen, 2016-09-12 Indian scientific achievements in the early twentieth century are well known with a number of heralded individuals making globally recognized strides in the field of astrophysics Covering the period from the

foundation of the Asiatick Society in 1784 to the establishment of the Indian Association for the Cultivation of Science in 1876 Sen explores the relationship between Indian astronomers and the colonial British He shows that from the mid nineteenth century Indians were not passive receivers of European knowledge but active participants in modern scientific observational astronomy Military Transition in Early Modern Asia, 1400-1750 Kaushik Roy, 2014-05-22 A substantial amount of work has been carried out to explore the military systems of Western Europe during the early modern era but the military trajectories of the Asian states have received relatively little attention. This study provides the first comparative study of the major Asian empires military systems and explores the extent of the impact of West European military transition on the extra European world Kaushik Roy conducts a comparative analysis of the armies and navies of the large agrarian bureaucratic empires of Asia focusing on the question of how far the Asian polities were able to integrate gunpowder weapons in their military systems Military Transition in Early Modern Asia 1400 1750 offers important insights into the common patterns in war making across the region and the impact of firearms and artillery The Military Revolution Geoffrey Parker, 1996-04-18 This is a new edition of Geoffrey Parker's much admired illustrated account of how the West so small and so deficient in natural resources in 1500 had by 1800 come to control over one third of the world Parker argues that the rapid development of military practice in the West constituted a military revolution which gave Westerners an insurmountable advantage over the peoples of other continents This edition incorporates new material including a substantial Afterword which summarises the debate which developed after the book s first publication Art and Architecture in the Islamic World (2 vols.) Susan Sinclair, 2012-04-03 Following the tradition and style of the acclaimed Index Islamicus the editors have created this new Bibliography of Art and Architecture in the Islamic World The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages except Turkish between 1906 and 2011 This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies The Rise and Decline of Dutch Technological Leadership (2 Vols) Karel Davids, 2008-08-31 Technological leadership is an important topic in economic history and the history of technology This book addresses the issue of technological leadership by means of an in depth study on the Dutch Republic once described as the first modern economy Drawing on extensive research in archives in Europe and a vast amount of printed sources and secondary literature it provides a wide ranging overview of Dutch technological leadership in the early modern Europe it explains whence this leadership came about and why it ended and it explores to what extent the Dutch case illuminates the evolution of technological leadership in general This book is thus relevant for the study of technological leadership the development of technology in the early modern period as well as the history of the economic expansion of the Dutch Republic Waves of Prosperity Greg Clydesdale, 2016-09-16 When the Venetian merchant Marco Polo first arrived in Dynastic China he was faced with a society far advanced of anything he had encountered in Europe The

ports were filled with commodities from all over the eastern world while new technology was driving the economy forward It would take another 400 years before European trade in the Atlantic eclipsed the Pacific markets From China's phenomenally successful Sung dynasty c AD 960 1279 Cargoes reveals the power of the Mughals merchants of Gujarat who built an empire so powerful that even in the 17th century the richest man in the world was a Gujarat trader It was not until the opening up of the spice routes and the discovery of South American gold that medieval Iberia came to the fore It was only then that the Atlantic Empire of the west came to dominate world trade first the Dutch Republic in the seventeenth century then the British Empire in the age of the Industrial Revolution American supremacy in the twentieth century and the development of post war Japan Along the way Greg Clydesdale looks at the parallel lives and ideas of merchants and explorers missionaries kings bankers and emperors He shows how great trading nations rise on a wave of technological and financial innovation and how in that success lies the cause of their inevitable decline Power over Peoples Daniel R. Headrick, 2012-06-28 A major history of technology and Western conquest For six hundred years the nations of Europe and North America have periodically attempted to coerce invade or conquer other societies. They have relied on their superior technology to do so yet these technologies have not always guaranteed success Power over Peoples examines Western imperialism's complex relationship with technology from the first Portuguese ships that ventured down the coast of Africa in the 1430s to America s conflicts in the Middle East today Why did the sailing vessels that gave the Portuguese a century long advantage in the Indian Ocean fail to overcome Muslim galleys in the Red Sea Why were the same weapons and methods that the Spanish used to conguer Mexico and Peru ineffective in Chile and Africa Why didn t America's overwhelming air power assure success in Iraq and Afghanistan In Power over Peoples Daniel Headrick traces the evolution of Western technologies from muskets and galleons to jet planes and smart bombs and sheds light on the environmental and social factors that have brought victory in some cases and unforeseen defeat in others He shows how superior technology translates into greater power over nature and sometimes even other peoples yet how technological superiority is no guarantee of success in imperialist ventures because the technology only delivers results in a specific environment or because the society being attacked responds in unexpected ways Breathtaking in scope Power over Peoples is a revealing history of technological innovation its promise and limitations and its central role in the rise and fall of empire Some images inside the book are unavailable due to digital copyright restrictions
