Osipian, 2023-05-17 This book presents theoretical and empirical investigation of economic growth in Russia The sharp decline in the national production that Russia endured in the 1990s linked directly to the exhausting and ill planned transition from the planned economy to the market economy resulted in Russia plunging into the poverty trap The goal of this book is to determine whether and how Russia manages to overcome the poverty trap and initiate and sustain economic growth This book fills the gap between the volatile economic growth as an objective economic reality of Russia and the lack of scholarly literature on the issue This study identifies the place and role of foreign aid in economic growth in the market type post transitional Russian economy and concludes that foreign aid does not play any significant role in the national economy contrary to what would follow from the classical poverty trap theory considered reviewed applied and tested in this study Development economists should not overestimate the role of foreign aid in overcoming the poverty trap in those developing economic systems that are currently not in equilibrium and only move toward their steady state The book will be of interest to those who want to learn more about specific problems in Russia's newly built capitalism the country's perspectives and its current semi peripheral status The book will also be an excellent supplement for students in Russian studies programs as well as for investors who want to do business in Russia and try to understand the country's domestic economic conditions and processes **Teaching Pluralism in Economics** John Groenewegen, 2007-01-01 This volume is concerned with the different schools within the discipline of economics theoretical pluralism and the relationship of economics to other disciplines such as sociology political science and philosophy interdisciplinarity It addresses the important implications of pluralism and interdisciplinarity for teaching economics at both undergraduate and graduate level

and argues that the economics curriculum should pay equal attention to these new perspectives rather than concentrate on the traditional neoclassical mainstream. The distinguished contributors highlight the inherent challenges of presenting a combination of mainstream economics with more heterodox approaches in such a way that the student is not confused but better understands the possibilities and limitations of different schools in economics, how to apply these different approaches and when the boundaries of the economics discipline have been reached how then a more interdisciplinary approach can be followed. This volume attempts to offer insights into the content of such a revised curriculum and the process of how to achieve this. This book will be required reading for every serious teacher and student of economics. It will also be invaluable to anyone who questions the validity of current economic orthodoxy.

Specifically, the book examines the major CIS countries: Belarus, Kazakhstan, Russia, and Ukraine. The new Eastern European EU members are also frequently referenced for comparison purposes. This is the first book to formally deal with many of these questions.

The Changing Governance of Renewable Natural Resources in Northwest Russia Soili Nysten-Haarala, 2016-04-01

Bringing together scholars of human geography, environmental sociology, law, economics, and international policy from Finland, Russia, Sweden, and Germany, this book examines how local communities and enterprises adjust to transition and institutional changes in Northwest Russia. A unique and important facet of the book is that it analyzes the law and legal institutions focusing on how those involved in law use or abuse it in relation to unofficial institutions and the interplay of different interest groups in governing forest and fishery resources. The local view is approached empirically with data gathered through interviews, which is then compared against institutional change at national level and in the global arena. Multidisciplinary in nature, the book demonstrates innovative ways of adjusting to change, combining old and new local and global, and providing a holistic view of the Russian economy and a society in transition.

**China's Great Economic Transformation** Loren Brandt, Thomas G. Rawski, 2008-04-14

This landmark study provides an integrated analysis of China's unexpected economic boom of the past three decades. The authors combine deep China expertise with broad disciplinary knowledge to explain China's remarkable combination of high-speed growth and deeply flawed institutions. Their work exposes the mechanisms underpinning the origin and expansion of China's great boom. Penetrating studies track the rise of Chinese capabilities in manufacturing and in research and development. The editors probe both achievements and weaknesses across many sectors, including China's fiscal, legal, and financial institutions. The book shows how an intricate minuet combining China's political system with sectorial development, globalization, resource transfers across geographic and economic space, and partial system reform delivered an astonishing and

unprecedented growth spurt      *Beyond the Rural-Urban Divide* Kjell Andersson, Erland Eklund, Minna Lehtola, 2009-02-11

The rural urban dichotomy is one of the most influential figures of thought in history laying the foundation for academic disciplines such as rural and urban sociology The dichotomy rests on the assumption that rural and urban areas differ fundamentally This book deals with this topic      **Market as a Weapon** Anton Oleinik, 2017-09-08 Power is all encompassing in Russia and mediates most interactions among people including everyday decisions Even the recent administrative reforms in the country which began at the end of the 1990s have tried to reshape the government institutions and modernize the country through the use of power Changes were initiated and implemented by people vested with power Power convention and trust can all support coordination However in the Russian institutional context power tends not only to supplement the alternative coordination mechanisms but also to substitute them Power can be used to solve problems related to social action by merging two or several centers of decision making into one The actor vested with power decides exactly how coordination and adjustment can be achieved This path breaking volume shows how power turns into a unique coordination mechanism and what are consequences of such transformation for everyday life and businesses Market as a Weapon focuses on issues of power and domination using the configuration of power relationships in Russia as a critical case but goes far beyond a narrowly defined scope of country specific studies Particular emphasis is put on domination by virtue of a constellation interests in the market since this is a relatively underexplored yet broadly used technique for imposing will in all countries that heavily rely on interventionist policies Instead of being a liberating force the market becomes an additional instrument facilitating the continuous reproduction of power which explains the title of the book Both qualitative and quantitative data including more than one hundred in depth interviews with experts state servants and businesspeople in Russia as well as statistics are used throughout the text of this major book      Transitions in Post-Soviet Eurasia Archana
