Proceedings of the 8th International Conference on Kansei Engineering and Emotion Research Hiroko

Shoji, Shinichi Koyama, Takeo Kato, Keiichi Muramatsu, Toshimasa Yamanaka, Pierre Lévy, Kuohsiang Chen, Anitawati Mohd Lokman, 2020-08-18 This book gathers a selection of refereed papers presented at the 8th International Conference on Kansei Engineering and Emotion Research 2020 KEER 2020 which was held in Tokyo Japan 7-9 September 2020. The contributions address the latest advances in and innovative applications of Kansei Engineering and Emotion Research and related topics. This book caters researchers and graduate students in the field of design art, Kansei engineering and other engineering fields, psychology, physiology and education. *Advances in Computer, Information, and Systems Sciences, and Engineering* Khaled Elleithy, 2006-08-15 The conference proceedings of International Conference on Industrial Electronics Technology not only the reviewing submissions and registration processes but also the actual conference. Conference participants, authors, presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference. The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office. Suffice to say that CISSE received submissions from more than 50 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference. The CISSE conference audio room provided superb audio even over low speed internet connections, the ability to display PowerPoint presentations and cross platform compatibility, the conferencing software runs on Windows, Mac and any other operating system that supports Java. In addition, the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session. The implemented conferencing technology starting with the submission review system and ending with the online conferencing capability allowed CISSE to conduct a very high quality fulfilling event for all participants. Engineering Education John Heywood,2005-11-11 A synthesis of nearly 2 000 articles to help make engineers better educators While a significant body of knowledge has evolved in the field of engineering education over the years much of the published information has been restricted to scholarly journals and has not found a broad audience This publication rectifies that situation by reviewing the findings of nearly 2 000 scholarly articles to help engineers become better educators devise more effective curricula and be more effective leaders and

advocates in curriculum and research development The author's first objective is to provide an illustrative review of research and development in engineering education since 1960 His second objective is with the examples given to encourage the practice of classroom assessment and research and his third objective is to promote the idea of curriculum leadership The publication is divided into four main parts Part I demonstrates how the underpinnings of education history philosophy psychology sociology determine the aims and objectives of the curriculum and the curriculum's internal structure which integrates assessment content teaching and learning Part II focuses on the curriculum itself considering such key issues as content organization trends and change A chapter on interdisciplinary and integrated study and a chapter on project and problem based models of curriculum are included Part III examines problem solving creativity and design Part IV delves into teaching assessment and evaluation beginning with a chapter on the lecture cooperative learning and teamwork The book ends with a brief insightful forecast of the future of engineering education Because this is a practical tool and reference for engineers each chapter is self contained and may be read independently of the others Unlike other works in engineering education which are generally intended for educational researchers this publication is written not only for researchers in the field of engineering education but also for all engineers who teach All readers acquire a host of practical skills and knowledge in the fields of learning philosophy sociology and history as they specifically apply to the process of engineering curriculum improvement and evaluation

Object-Oriented and Internet-Based Technologies Mathias Weske, Peter Liggesmeyer, 2004-12-07 Based on the Net ObjectDays tradition of bringing together researchers from academia and industry on the one hand and system architects developers and users from industry and administration on the other hand this year's conference took an international research perspective so that we see the first volume of Net ObjectDays main conference proceedings published in the Springer Lecture Notes in Computer Science series This volume consists of 16 papers carefully selected in a rigorous reviewing process by an international program committee to provide a concise overview these papers are briefly described In the Languages and Models session Beate Ritterbach proposes a new language element for object oriented programming languages that supports arbitrary value types In her contribution Support for Value Types in an Object Oriented Programming Language she describes the corresponding keywords syntax and consistency checks thereby giving an impression of the look and feel of value types from an application programmer's perspective Walter Binder and Jarle Hulaas look at portable CPU accounting and control in Java which is based on program transformation techniques In their paper Self accounting as Principle for Portable CPU Control in Java periodically the threads of an application component aggregate the information of their respective CPU consumption within a shared account scheduling functions make sure applications do not exceed their allowed CPU share

Swarz, Avigdor Zonnenshain, 2019-12-24 An up to date guide for using massive amounts of data and novel technologies to design build and maintain better systems engineering Systems Engineering in the Fourth Industrial Revolution Big Data

Novel Technologies and Modern Systems Engineering offers a guide to the recent changes in systems engineering prompted by the current challenging and innovative industrial environment called the Fourth Industrial Revolution INDUSTRY 4.0. This book contains advanced models, innovative practices and state of the art research findings on systems engineering. The contributors, an international panel of experts on the topic, explore the key elements in systems engineering that have shifted towards data collection and analytics available and used in the design and development of systems and also in the later life cycle stages of use and retirement. The contributors address the issues in a system in which the system involves data in its operation, contrasting with earlier approaches in which data models and algorithms were less involved in the function of the system. The book covers a wide range of topics including five systems engineering domains: systems engineering and systems thinking, systems software and process engineering, the digital factory, reliability and maintainability modeling and analytics, and organizational aspects of systems engineering. This important resource presents new and advanced approaches, methodologies and tools for designing, testing, deploying and maintaining advanced complex systems. Explores effective evidence based risk management practices. Describes an integrated approach to safety, reliability and cyber security based on system theory. Discusses entrepreneurship as a multidisciplinary system. Emphasizes technical merits of systems engineering concepts by providing technical models. Written for systems engineers. Systems Engineering in the Fourth Industrial Revolution offers an up to date resource that contains the best practices and most recent research on the topic of systems engineering.
