Hyde,2018-10-25 In the near future Earth is depleted of natural resources but peace reigns over the planet Director of Space Research Joseph Samuels has an important task as he explores the universe After so many years of silence Earth s radio telescopes detect an intelligent signal from a small vessel heading towards our solar system It s a miraculous scientific breakthrough but the signal also begs the question is Earth in danger from outside invaders To develop a plan of action Joseph meets with experts in religion defense and science The plan is set Earth will send two astronauts in an unarmed shuttle to intercept the incoming vessel Luckily the mysterious space probe locks onto the astronauts radio signal and makes a connection A robot named Interface contacts the Earth shuttle and explains he has been programmed to be peaceful but nothing is certain in this brave new world With information from Interface the astronauts return to Earth and meet with Joseph The science gleaned from Interface could change everything we ever believed about space and our place in it With alien life no longer a theory but a fact what will Joseph do with this new information and what long ranging consequences might his actions set in motion *Solar Energy Update* ,1979-10

Energy Conservation Design Guidelines for New Office Buildings United States. Public Buildings Service,1977 *Energy Abstracts for Policy Analysis* ,1976-07 **Artificial Intelligence and Renewables Towards an Energy Transition** Mustapha Hatti,2020-12-17 This proceedings book emphasizes adopting artificial intelligence based and sustainable energy efficiency integrated with clear objectives to involve researchers students and specialists in their development and implementation adequately in achieving objectives The integration of artificial intelligence into renewable energetic systems would allow the rapid development of a knowledge based economy suitable to the energy transition while fully integrating the renewables into the global economy This is how artificial intelligence has hand in by conceptualizing this transition and above all by saving time The knowledge economy is valuated within the smart cities which are fast becoming the favorite places where the energy transition will take place efficiently and intelligently by implementing integrated approaches to energy saving and energy supply and integrated urban approaches that go beyond individual interventions in buildings or transport modes using information and communication technologies **ERDA Energy Research Abstracts** United States.
