K. Chesterton 1874-1936 a prolific British writer journalist and theologian emerged as a prominent voice in the literary movement of his time His personal journey transformed him from a skeptic to a committed Christian deeply influencing his worldview and literary output Chesterton's background in art and philosophy allowed him to approach writing with a unique perspective exploring the tensions between faith and reason tradition and innovation thus enriching his works with depth and insight This collection is essential for those wishing to explore the intersections of theology philosophy and literature It not only highlights Chesterton's brilliance but also invites readers to reflect on their beliefs and the complexities of life Whether you are a long time admirer or a new reader Chesterton's insights continue to resonate making this anthology a timeless treasure

Littell's Living Age, 1878 *Essays on the Active Powers of the Human Mind* Thomas Reid, 1819 **St. Nicholas** Mary Mapes Dodge, 1921 *The Canadian Magazine*, 1923 *Imagining a Nation* Ruramisai Charumbira, 2015-09-29

In *Imagining a Nation*, Ruramisai Charumbira analyzes competing narratives of the founding of Rhodesia, Zimbabwe, constructed by political and cultural nationalists, both black and white, since occupation in 1890. The book uses a wide array of sources, including archives, oral histories, and a national monument, to explore the birth of racialized national memories and parallel identities that were in vigorous contention as memory sought to present itself as history. In contrast with current global politics, plagued by divisions of outsider and insider, patriot and traitor, Charumbira invites the reader into the liminal spaces of the region's history and questions the centrality of the nation-state in understanding African or postcolonial history today. Using an interdisciplinary methodology, Charumbira offers a series of case studies, bringing in characters from far-flung places to show that history and memory in and of one small place can have a far-reaching impact in the wider world. The questions raised by these stories go beyond the history of colonized or colonizer in one former colony to illuminate contemporary vexations about what it means to be a citizen, patriot, or member of a nation in an ever-globalizing world. Rather than a history of how the rulers of Rhodesia or Zimbabwe marshaled state power to force citizens to accept a single definition of national memory and identity, *Imagining a Nation* shows how ordinary people invested in the soft power of individual, social, and collective memories to create and perpetuate exclusionary national myths. *Reconsiderations in Southern African History* *The Wesleyan-Methodist Magazine*, 1814

Brothers in the Mekong Delta Godfrey Garner, 2020-04-10

Following the Tet Offensive, a shift in U.S. naval strategy in 1967-1968 saw young men fresh out of high school policing the canals and tributaries of South Vietnam aboard PBRs, patrol boat riverine, unarmed yet heavily armed and highly maneuverable vessels designed to operate in shallow, weedy waterways. This memoir recounts the experiences of the author and his shipmates as they cruised the Viet Cong

occupied backwaters of the Mekong Delta and their emotional metamorphosis as wartime events shaped the men they would be for the remainder of their lives

The Oxford Companion to Consciousness Tim Bayne,Axel Cleeremans,Patrick Wilken,2009-06-04 Consciousness is undoubtedly one of the last remaining scientific mysteries and hence one of the greatest contemporary scientific challenges How does the brain s activity result in the rich phenomenology that characterizes our waking life Are animals conscious Why did consciousness evolve How does science proceed to answer such questions Can we define what consciousness is Can we measure it Can we use experimental results to further our understanding of disorders of consciousness such as those seen in schizophrenia delirium or altered states of consciousness These questions are at the heart of contemporary research in the domain Answering them requires a fundamentally interdisciplinary approach that engages not only philosophers but also neuroscientists and psychologists in a joint effort to develop novel approaches that reflect both the stunning recent advances in imaging methods as well as the continuing refinement of our concepts of consciousness In this light the Oxford Companion to Consciousness is the most complete authoritative survey of contemporary research on consciousness Five years in the making and including over 250 concise entries written by leaders in the field the volume covers both fundamental knowledge as well as more recent advances in this rapidly changing domain Structured as an easy to use dictionary and extensively cross referenced the Companion offers contributions from philosophy of mind to neuroscience from experimental psychology to clinical findings so reflecting the profoundly interdisciplinary nature of the domain Particular care has been taken to ensure that each of the entries is accessible to the general reader and that the overall volume represents a comprehensive snapshot of the contemporary study of consciousness The result is a unique compendium that will prove indispensable to anyone interested in consciousness from beginning students wishing to clarify a concept to professional consciousness researchers looking for the best characterization of a particular phenomenon
