Superpowers In A Multinuclear:

Professional Journal of the United States Army ,1974 *Quarterly Review of Military Literature* ,1975 Intelligence Policy and National Security Robert L. Pfaltzgraff,Uri Ra'anah,Warren Milberg,1981-06-18 **India and the Superpowers** Mohammad Azher Zafar Shah,1983 **Polarity, Balance of Power and International Relations Theory** Goedele De Keersmaecker,2016-12-04 This book discusses the rise of polarity as a key concept in International Relations Theory Since the end of the Cold War until at least the end of 2010 there has been a wide consensus shared by American academics political commentators and policy makers the world was unipolar and would remain so for some time By contrast outside the US a multipolar interpretation prevailed This volume explores this contradiction and questions the Neorealist claim that polarity is the central structuring element of the international system Here the author analyses different historic eras through a polarity lens compares the way polarity is used in the French and US public discourses and through careful examination reaches the conclusion that polarity terminology as a theoretical concept is highly influenced by the Cold War context in which it emerged This volume is an important resource for students and researchers with a critical approach to Neorealism and to those interested in the defining shifts the world went through during the last twenty five years **Coalition Management and Escalation Control in a Multinuclear World** Jacquelyn Davis,Robert Pfaltzgraff,2020-10-15 Coalition Management and Escalation Control in a Multinuclear World examines the impact of new technologies on twenty first century crisis management and armed conflict as well as the unprecedented number and types of actors involved in current and potential flash points The book s basic thesis is that new technologies are changing how wars are fought and providing a broadening range of escalation options Cyber weapons and artificial intelligence as well as social media blur traditional escalation thresholds with important consequences for deterrence Nuclear weapons possessors especially nations and powers new to their use may have differing strategies concerning how when why or where such weapons should be used either for purposes of deterrence or as actual warfighting instruments Today s global map differs drastically from all previous eras not only in the types and numbers of actors but also in the level of lethality as well as the range and accuracy of weapons available with which to threaten or actually conduct battle A world of Great Power competition together with non state armed groups contains risks for miscalculation including the possibility of catalytic warfare *Superpower Roles* Ulf Westerlund,1987

Democracy and Deterrence Philip Bobbitt,1988-01-01 **NATO Review** ,1974 Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office,1976 *Soviet Risk-Taking and Crisis Behavior* Hannes Adomeit,2022-12-28 Soviet Risk Taking and Crisis Behavior first published in 1982 examines the question for what purposes and under what conditions were Soviet leaders prepared to take risks in international relations The first part of the book sets out to define the concept of risk and to examine its analytical relevance for foreign policy its measurement and its relation to the dynamics of crisis The second part consists of in depth analysis of Soviet behavior in the Berlin crises of 1948 and 1961 The third and

last part compares Soviet policy in the two crises and the actions of the two different leaderships as well as relating it to Soviet behavior in other geographical areas Trends in Nuclear Proliferation, 1975-1995 Lewis A. Dunn, Herman Kahn, Hudson Institute, 1976 **Tactical Nuclear Weapons** Stockholm International Peace Research Institute, 2020-11-19

In the 1970s tactical nuclear warfare was a topical issue The introduction of the new generation of tactical nuclear weapons into Europe could have had disastrous consequences These new weapons had already been developed by nuclear weapon laboratories and pressures were growing for their deployment On first sight smaller and more accurate nuclear weapons may seem more humane and militarily preferable to the relatively high yield tactical nuclear weapons currently deployed But some of these new types of weapons would blur the distinction between nuclear and conventional weapons and their use would make escalation to strategic nuclear war extremely likely Indeed the argument for these new weapons is that their use in wartime is more credible and therefore acceptable than current types of tactical nuclear weapons This perception could easily lead to the exceedingly dangerous idea that some types of tactical nuclear war were winnable The fact has to be faced that any use of nuclear weapons is almost certain to escalate until all available weapons are used To believe otherwise is to believe that one side will surrender before it has used all the weapons in its arsenal History shows that this is most unlikely to happen Because of its importance SIPRI organized a meeting to discuss the whole question Originally published in 1978 this book is the outcome of that meeting **The Superpowers in a Multinuclear World** Geoffrey Kemp, Robert L. Pfaltzgraff, Uri Ra'anan, 1974 *The Proliferation Puzzle* Zachary S. Davis, Benjamin Frankel, 2020-12-01 Originally published in 1993 this volume was unique in its scope and approach Unlike most literature on nuclear weapons proliferation at the time the essays in this volume offer theoretical discussions and suggest testable hypotheses about the causes and effects of nuclear weapons proliferation The proliferation of nuclear weapons is an ideal subject for social science scholarship and such scholarship is especially timely now Among the topics discussed in *The Proliferation Puzzle* are The building of nuclear weapons is a complex task touching upon many of the subjects of study at the core of social science and international relations Nuclear weapons may be acquired as a hedge against external threat for reasons of national prestige or as a result of pressures by domestic coalitions among scientists bureaucrats and the military They may be sought for defensive purposes or to support hegemonic aspirations Nuclear weapons also raise questions about civilian command and control especially in crisis situations During the last two decades the acquisition of nuclear weapons has been proscribed by the non proliferation regime The decisions countries made about acquiring these weapons and the manner they chose to build them serve as a test of the efficacy of this particular regime and of international regimes more generally Nuclear weapons were introduced at the time bipolarity became the international order As the world moves away from bipolarity there is a need to answer questions such as What would be the effect of nuclear weapons in a multipolar order How will the spread of nuclear weapons affect the distribution of capabilities among states If nuclear weapons spread to additional countries will they enhance stability or

exacerbate instability Can the spread of these weapons be managed or controlled This book brings together scholars from different schools within international relations and the social sciences to address the question of why nuclear weapons spread A disciplined rigorous examination of proliferation is important not only for scholarship but also for informed policymaking The purpose of social science is to formulate hypotheses and devise theories that advance our understanding of society and aid in the fashioning of enlightened policy The essays in this volume show how explicit hypotheses about the causes and consequences of nuclear weapons proliferation provide a deeper understanding of the problem and suggest specific theory informed policy recommendations

Asia and the Road Ahead Robert A. Scalapino, 2023-04-28 Asia and the Road Ahead Issues for the Major Powers examines the foreign policy trends and challenges facing six key Asian Pacific societies Japan the People s Republic of China India Indonesia the Soviet Union and the United States Organized into five regions Pacific Ocean Northeast Asia the Continental Center Southeast Asia and South Asia the study explores domestic influences on foreign policy and highlights the interconnectedness of these regions While acknowledging the fluidity and uncertainties of contemporary global politics the author argues for continued U S engagement in the Asian Pacific world cautioning against isolationism in the wake of America s defeat in Indochina The work advocates periodic reassessment of foreign policy priorities balancing economic political and military tools to address evolving challenges Drawing on decades of experience including 26 trips to the Soviet Union and Asia since World War II the author incorporates insights from numerous experts and sources including a January 1974 Foreign Affairs article on China While the work reflects the author s personal convictions it incorporates contrasting perspectives to provide a comprehensive analysis The collaborative input from academic peers and field experts further enhances the depth of this study making it a valuable resource for understanding the complexities and alternatives shaping the future of the Asian Pacific region This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1975

USSR, Analytical Survey of Literature United States. Department of the Army, 1976 China's Nuclear Weapons Strategy Chong-Pin Lin, 1988 Kinas nukleare strategi analyseres p baggrund af kinesiske strategiske traditioner Hensigten er at give en forst else af Kinas s rlige nukleare forestillinger som verdens trediest rste nuklearmagt Asia's Nuclear Future William H. Overholt, 2019-06-03 Future historians are very likely to see nuclear proliferation or the averting of nuclear proliferation as one of the central determinants of international politics in the last quarter of the twentieth century Certainly the development of an independent nuclear deterrent by the People s Republic of China and the possibility that Taiwan Korea Jap

The Future's Back Frank P. Harvey, 1997 Arguing that previous critiques of rational choice and deterrence theory are not convincing Frank Harvey constructs a new set of empirical tests of rational deterrence theory to illuminate patterns

of interaction between rival nuclear powers He analyses the crisis management techniques used by the United States and the Soviet Union in twenty eight post war crises and isolates factors that promote or inhibit escalation of these crises This crises based data set serves as the basis for identifying patterns of response when one nuclear state is threatened by another The Future s Back offers new directions for testing that emphasize a more unified approach to theory building and assesses the feasibility of alternative courses of action to prevent escalation of future disputes characterized by nuclear rivalry

The Captivating World of E-book Books: A Detailed Guide Revealing the Pros of E-book Books: A Realm of Convenience and Flexibility E-book books, with their inherent portability and simplicity of access, have freed readers from the constraints of hardcopy books.
