The Global Capitalist Crisis and Its Aftermath Berch Berberoglu,2016-12-05 Written by a team of experts on the contemporary global capitalist political economy who are able to shed light on the inner workings of global capitalism and the capitalist globalization process that has led to the growth and development of capitalism from the national to the global level this groundbreaking volume provides critical analyses of the causes and consequences of the Great Recession of 2008 2009 Through a careful examination of the origin development and aftermath of the catastrophic economic crisis from which the world is still trying to recover editor Berch Berberoglu and his colleagues demonstrate that those most responsible for the economic collapse are the ones least affected by its devastating impact felt most severely by working people around the world Ultimately this book argues that it is only through the systematic restructuring of the world economy by the working class that society will be able to prevent the boom and bust cycle of global capitalist crises and usher in a more egalitarian socialist economy and society

Transformations and Crises Thomas Ekman Jørgensen,2008-10-01 The Left in the 1960s and 1970s has a powerful almost mythical place in the history of the 20th century It was during these decades that the radical Left managed to renew the language of socialism as an alternative to communism and liberalism alike but also when radicalism often led to extremism and social movements turned into political sects Focusing on the Left in Denmark and Sweden during those turbulent decades this study pays close attention to the political language in the two countries and shows the constant challenge to the concepts of the Left in the face of rapid social cultural and political changes The precarious relationship between the Left and the nation serves as a starting point for the exploration of the development of the New Left after the break with communism the subsequent student revolts and radicalization of the late 1960s until the movement s apparent collapse at the end of the 1970s This book illustrates the challenges the Left was facing in its attempt to articulate a credible political language at a time of social cultural and political transformation

Beyond the Global Capitalist Crisis Berch Berberoglu, 2016-04-15 The deep economic recession that has occurred in all major sectors of the U S and global economy is a manifestation of the underlying contradictions of the capitalist system that has resulted in the accumulation of vast fortunes on one side and impoverishment debt and destitution on the other In short the crisis of global capitalism is the result of the immense disparities in wealth and income and a consequent widening gap between capital and labor This ground breaking book brings together a team of experts on the contemporary global capitalist political economy who are able to shed light on the inner workings of global capitalism and the capitalist globalization process that has led to the growth and development of capitalism from the national to the global level with all its fundamental internal dynamics and contradictions operating on a world scale It will make an important contribution to understanding the underlying causes of the current global economic crisis and show the way out of this crisis by way of a powerful critique of the global capitalist system that will ultimately go through a major economic political and social transformation Analysis of the global capitalist crisis raises questions regarding the process of capitalist globalization especially now that neoliberal economic policies have failed Does this signal the end of capitalist globalization and the collapse of the global capitalist system This book will take up these questions and entertain the possibility of a new beginning in the global political economy through an analysis of the next period of post capitalist developments worldwide that may set the stage for the rise of socialism across the globe

America after Empire Berch Berberoglu, 2022-11-09 After the end of America s longest 20 year war in Afghanistan and Iraq that cost more than 6 trillion and nearly half a million lives what does the future hold for America and the American people in the 21st century In this timely and important book Berch Berberoglu provides an eye opening account of the history of the American Empire from its inception to the present with prospects for its future Examining the worldwide expansion of the American Empire over the course of its turbulent history in great detail Berberoglu assesses America s imperial legacy in a sober way highlighting its failure to come to terms with the enormous cost of this adventure in imperial overreach But Berberoglu sees light at the end of the long dark tunnel when the American people will awaken and lead the way to a new America after empire in the coming decades of the 21st century

Aronowitz, 2016-07-27 In this provocative and famous book now substantially revised and with much new material Stanley Aronowitz lays bare the fundamental logical problems in Marxist theory with respect to nature gender and race relations the concept of class and historical time Aronowitz has written a stunning book offering an approach towards a new way of thinking about these problems a book which will be addressed by other Marxist scholars and

critique and overcoming of this process as to its analysis With its extensive coverage both geographically and thematically the book will be of interest for students of the social sciences as well as for anyone making an effort to understand and change the world Series Politics Society and Community in a Globalizing World Vol 15 **Global Capitalism and Transnational Class Formation** Jason Struna, 2016-03-17 The global capitalism perspective is a unique research program focused on understanding relatively recent developments in worldwide social economic and political practices related to globalization At its core it seeks to contextualize the rearticulation of nation states and broad geographic regions into highly interdependent networks of production and distribution and in so doing explain consequent changes in social relations within and between countries in the contemporary era The present volume contributes to this effort by focusing on social class formation across borders via the processes and actors that make globalized capitalism possible The essays presented here offer a wide range of emphases in terms of the particular lenses and evidence they use They cover such topics as the emergence of a transnational capitalist class based fascist regime responding to the structural crises of global capitalism as well as the links between global class formation and the US racial project as it relates to electoral politics and demographic changes in the US South This book was published as a special issue of Globalizations **East Asia** David L. Western, 2000 When the financial firestorm swept through Asia in 1997 many economists scrambled to put together a coherent explanation of such a crisis Early responses focused on economic and currency issues but these were more likely to be symptoms of the crisis and not causes Soon after it became apparent that the very essence of the crisis was of a financial capital flow and banking nature Further investigation revealed the crucial role played by foreign money loose lending practices by banks and unhedged US denominated debt interacting to generate a huge asset price bubble The twin liberalisations of deregulating capital flows and the domestic financial sector produced an explosion in foreign lending and in turn a domestic credit boom This book seeks to fill the vacuum of understanding between the causes of the crisis and those of the miracle or boom In many ways financial variables and high profitability were at the heart of the unprecedented 35 year expansion and not just the traditional explanations of accumulation and high productivity For such reasons this book unveils the Western shuttle model WSM of economic take off where catch up growth is very much a function of exports to mature economy markets which in turn generate super profits and so super growth The WSM offers several explanations of the crisis including a loss of short term competitiveness due in part to the asset price bubble crowding out viable export opportunities In summary the origins of East Asia's ascent and of its demise are but the same **The World Raw Materials "crisis"** United States Information Agency. Office of Research, 1975 The Metaphysics of Power Anthony E. Mansueto, 2025-03-18 Mounting a searing critique of Martin Heidegger and Carl Schmidt and their broader influence on the contemporary Left including the work of Giorgio Agamben Alain Badiou and Slavoj Žižek Anthony Mansueto's *The Metaphysics of Power* argues that the common flaw of all contemporary political projects Left and Right is a narrow strategic focus on achieving and holding state

power This focus is grounded in a doctrine of sovereignty divine and human rooted in a decisionist political theology which derives ultimately from Paul of Tarsus and which made historic Christianity from the beginning an ideology of empire In the place of this decisionist political theology he proposes that we understand Being and thus God as a relational transformative generativity that acts only as final cause and only from outside space and time making even divine sovereignty logically impossible Seeking to become God but trapped in a contingency that cannot be transcended we create structures that attempt divinity by means of exploiting and oppressing others structures which like the commodification of labor power ultimately strip us of our humanity making resistance impossible And yet we are also lured by the incredible beauty of God to mend the torn fabric of the universe to build and rebuild relationships and institutions which challenge and nurture us and thus to ripen a contingent being that will always fall short of its end but is capable of finding meaning and joy nonetheless
