Critical Thinking Through Debate Joseph M. Corcoran,1999 *Argumentation and Advocacy* ,1999

Debating in Teaching and Learning English Ben Wilson,2024-04-18 This book offers the first full length treatment of the topic of debating as a method of developing English Foreign Language EFL speaking inviting scholars and practitioners to reflect on the demands of the current age for moving forward educational practice While debating is a well known method of dialogic speaking and is widely practiced the extent to which it is integrated in adult TEFL has not been established and an understanding of its affordances for developing foreign language speaking is also limited This book fills the gap in the field of TESOL and applied linguistics on the affordances of debating as a form of dialogic speaking that can promote a holistic understanding and improvement of experience of education and indeed academic outcomes The two main themes that situate the work are those of dialogic speaking and affect at times referred to as humanistic positive psychology and social and emotional learning The book details the experiences of an adult EFL debate group in a private language school in the North of Italy It reports how the participants experience the pedagogy so as to offer insights into it as a form of teaching speaking in adult EFL as well as providing a practical framework with lesson plans and curriculum The affordances

of debating emerge as being social cognitive educational and communicative and are discussed alongside the work of language teaching scholars Curran and Freire and more broadly within a Social Constructivist approach to education As such debating is discussed as being a holistic and dialogic form of pedagogy Particular attention to experience often affective is also found to be fundamental in planning and assessing educational outcomes for both teachers and learners Thinking Through Art Katy Macleod,2013-01-11 Focusing on a unique arena Thinking Through Art takes an innovative look at artists experiences of undertaking doctorates and asks If the making of art is not simply the formulation of an object but is also the formation of complex ideas then what effect does academic enquiry have on art practice Using twenty eight pictures never before seen outside the artists universities Thinking Through Art focuses on art produced in higher educational environments and considers how the material product comes about through a process of conceiving and giving form to abstract thought It further examines how this form which is research art sits uneasily within academic circles and yet is uniquely situated outside the gallery system The journal articles from eminent scholars artists philosophers art historians and cultural theorists demonstrate the complexity of interpreting art as research and provide students and scholars with an invaluable resource for their art and cultural studies courses *Nutrition* Lori A. Smolin,Mary B. Grosvenor,2019-01-14 Nutrition Science and Applications 4th Edition helps students develop the scientific understanding to support their personal and professional decisions Using a critical thinking approach Smolin brings nutrition out of the classroom and allows students to apply the logic of science to their own nutrition concerns both as consumers and as future scientists and health professionals Was the American Revolution a Mistake? Burton Weltman,2013-08-27 Why was George Washington dismayed by the outcome of the American Revolution Would slavery still exist if the South had not seceded from the Union in 1861 Might socialists rule America today if Teddy Roosevelt had not run for President and lost in 1912 History is full of contingencies People confront problems and debate options for solving them Then they make a choice and face the consequences of their choice Often they wonder if a different choice might have been better Was the American Revolution a mistake Was racial segregation inevitable Was the Cold War necessary Americans have repeatedly asked these sorts of questions as they examined the consequences of their choices This is a book about revisiting crucial choices people made in history and examining the consequences of those choices for them and for us It demonstrates a method of teaching history that recreates events as people experienced them and asks important questions that troubled them but that rarely appear in conventional textbooks Unlike conventional methods that often reduce history to names dates and factoids for students to memorize it is a method that brings past debates to life the losers as well as the winners points of view and makes the subject exciting In studying history as choice students examine the problems people faced their options for solving them their decision making processes and the choices they made Then students evaluate the consequences of those choices both for people in the past and us today They explore what might have happened if different choices had been made Finally students relate the consequences of those past choices

to problems we face today and the choices we need to make History as choice is a practical and practicable method It has been designed to satisfy the curriculum goals of the National Council for the Social Studies and the book explains how it can be used to satisfy any state or local curriculum standards The book also identifies and illustrates resources that can be used with this method from data bases to popular music and explains how teachers can gradually integrate it into their courses In the first part of the book the method of history as choice is explained using the question of whether the American Revolution was a mistake as a case in point The second part of the book explores thirteen other questions about significant issues and events in American history as additional examples of how one might teach history as choice **Creating and Sustaining**
