

## **DIFFERENT TYPE OF ESTIMATES:**

### **Difference between revised and supplementary estimate**

The main differences between the revised and supplementary estimates are shown below point wise side by side.

#### **REVISED ESTIMATE**

- i) This is required when sanctioned amount is exceeded due to change of rates or addition of works fairly dependent on the work at first sanctioned. So, a revised estimate is due to material deviation from the original proposal.
- ii) It is accompanied with a comparative statement abstract from showing the problem variations for quantity, rate and amount against each item of work involved in the project.
- iii) Revised estimate is required due to change of rate or quantity of materials, so no additions or revisions of drawings necessary.

#### **SUPPLEMENTARY ESTIMATE**

- i) This is required due to supplementary works which are fairly independent of the work at the first sanctioned. So supplementary estimate is due to material deviation of a structural nature from the design originally approved.
- ii) No comparative abstract form is required. This is an estimate for additional works only. The abstract shows the original estimate and the total amount of the sanction required including supplementary amount.
- iii) Supplementary estimate is required due to some new works or due to change of design, so additions or revisions of drawings may be necessary.
