Supporting Democracy S. L. Sutherland, 1999 The South Africa Canada Program on Governance PoG during Nelson Mandela's 1992 visit to Canada when he asked the Canadian government to assist the people of South Africa in their preparations for democracy In 1993 the Canadian International Development Agency CIDA the International Development Research Centre IDRC and the democratic movement of South Africa jointly launched the PoG its mission to help South Africa build the capacity to govern itself This book views the transition to democracy in South Africa It describes the approaches used by the PoG as well as the activities the program designed and developed It presents the why what and how of a governance program Publisher's description Public Participation in Democratic Governance in South Africa Gregory F. Houston, 2001 This book examines public participation in democratic governance in South Africa The South African democracy is fairly new giving rise to a variety of new channels and processes for public participation In addition the overwhelming majority of South Africans have little experience of democratic governance having only acquired political power for the first time in 1994 However more than seven years of universal suffrage and access to political power is ample justification for assessing the consolidation of democracy in this country The book focuses on four case studies of public participation interest group participation in the National Economic Development and Labour Council the participation of civil society and the legislatures in the formulation of the budget public participation in legislative processes and public participation in the integrated development planning processes of local government Each case study outlines a number of opportunities for and constraints to public participation in the processes of democratic governance Canada and the Challenges of International Development and Globalization Mahmoud Masaeli, Lauchlan T. Cameron, 2017-11-02 In this volume marking the Sesquicentennial of Confederation in Canada leading scholars and jurists discuss the evolution of the Canadian Constitution since the British North America Act 1867 the role of the Supreme Court in interpreting the Constitution as a living tree capable of application to new legal issues and the growing influence of both the Constitution with its entrenched Charter of Rights and Freedoms and the decisions of the Court on other constitutional courts dealing with a wide range of issues pertaining to human rights and democratic government The contributors assess how the Canadian Constitution accommodates the cultural diversity of the country's territories and peoples while ensuring the universal applicability of its provisions the role of the Court in interpreting and applying the Constitution and the growing global influence of the Constitution and decisions of the Court on legislatures and courts in other countries Journal of the International Relations and Affairs Group, Volume IV, Issue I Daniel Evans, 2014-12-31 The International Relations and Affairs Group supports research in foreign affairs and global issues among states within the international system including the roles of states intergovernmental organizations IGOs non-governmental organizations NGOs and multinational corporations MNCs This edition contains articles related to International Trade International Law NGO's BRICS Military and Politics Civil War National Resources International Media Relations CIMIC Conflict Resolution Globalization and more *IBSS* Compiled by the British Library of Political and Economic Science, 2001 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences Improving International Capacity Development J. Armstrong, 2013-05-07 Nothing is more important to a new fragile or developing nation than developing the capacity of its government to support national well-being Every society is complex every government is complex Yet well-intentioned international development aid born in an

era of infrastructure projects continues to apply simplistic technical solutions to these wickedly complex development problems. It is an outside in approach that rarely succeeds even by the development industry's own admission. But out there amongst the billions of dollars of failed interventions there are bright spots of success places where capacity is harnessed not just for today but for tomorrow too. What is working so well? Drawing on research, practical experience and stories of success, Jim Armstrong explores these emerging approaches. Governing development across cultures R.B. Jain, 2006-12-13. The book is a critical examination and appraisal of the status, methodology and likely future trends of the emerging sub-discipline of Governing Development within the broader discipline of political science, leading to the application of Good Governance in the administration and development of the newly emerged nations during the later half of the twentieth century.

Negotiated Revolutions George Lawson, 2017-03-02. Straightforward histories of post-revolution States have all too often failed to provide sufficient context to rescue revolution both as concept and practice from the misplaced triumphalism of the contemporary world. In *Negotiated Revolutions*, George Lawson marks a definitive departure in the study of radical political and socio-economic change, presenting a unique comparative analysis of three transformations from authoritarian rule to market democracy. Through the lens of international sociology, the book critically considers the large-scale processes of social and political revolution, bringing three apparently distinct transformations from seemingly disparate authoritarian regimes and geographies under a common rubric. With unique and novel conceptual analysis, the book accurately locates both the potential and actuality of radical change in contemporary world affairs, processes usually mistakenly subsumed under the general framework of transitology. A Diplomat's Handbook for Democracy Development Support Jeremy Kinsman, Kurt Bassuener, 2016-10-17. In recent decades, the conduct of international relations among and within states has been very considerably altered. Today, the content of these relations relies as much on international professional and civil society networks as it does on state-to-state transactions. The role of the Internet has been fundamental in widening communications opportunities for citizens and civil society, with a profound effect on democracy transition. In consequence, diplomacy has taken on a much more human and public face. Twenty-first century ambassadors and diplomats are learning to engage with civil societies, especially on the large themes of democratic change, an engagement that is often resisted by authoritarian regimes. *A Diplomat's Handbook for Democracy Development Support* presents a wide variety of specific experiences of diplomats on the ground, identifying creative human and material resources. More broadly, it is about the policy-making experience in capitals as democratic states try to align national interests and democratic values. The Handbook also documents the increasingly prominent role of civil society as the essential building block for successful democratic transitions, with each case study examining specific national experiences in the aspiration for democratic and pluralistic governance and lessons learned on all sides, for better or for worse. While each situation is different, presenting unique unstructured problems and opportunities, a review of these experiences bears out the validity of the authors' belief in the

interdependence of democratic engagements and provides practitioners with encouragement counsel and a greater capacity to support democracy everywhere

Civil Society and the Aid Industry Alison van Rooy, 2013-11-05 Northern governments and NGOs are increasingly convinced that civil society will enable people in developing countries to escape the poverty trap Civil Society and the Aid Industry the product of extensive research by the prestigious North South Institute in Canada makes a critical appraisal of this new emphasis in the aid industry It explores the roles of Northern governmental multilateral and non governmental agencies in supporting civil society presenting in depth case studies of projects in Peru Kenya Sri Lanka and Hungary and gives detailed policy recommendations intended to improve the effectiveness and appropriateness of future projects Canadian Books in Print 2002 Marian Butler, 2002-02 *The Canadian Forum*, 1999-03

Exporting Good Governance Jennifer Welsh, Ngaire Woods, 2007-10-26 Can good governance be exported International development assistance is more frequently being applied to strengthening governance in developing countries and in Exporting Good Governance Temptations and Challenges in Canada's Aid Program the editors bring together diverse perspectives to investigate whether aid for good governance works The first section of the book outlines the changing face of international development assistance and ideas of good governance The second section analyzes six nations three are countries to which Canada has devoted a significant portion of its aid efforts over the past five to ten years Ghana Vietnam and Bangladesh Two are newer and more complex fragile states where Canada has engaged Haiti and Afghanistan These five are then compared with Mauritius which has enjoyed relatively good governance The final section looks at challenges and new directions for Canada's development policy Co published with the Centre for International Governance Innovation *Canada-Africa Relations* Yiyiadeesen Samy, Rohinton P. Medhora, 2016-10-17 A wave of optimism has swept the African continent in the past decade The pace and extent of social change in recent years when measured in life expectancy child and infant mortality rates literacy numeracy

and the completion of higher education is quite remarkable The urban middle class is emerging and expanding in many African countries while political democracy is developing and strengthening These positive changes are generating economic growth and attracting foreign investment across the continent especially in the resource sector But Africa is still viewed by many as the dark continent dealing with serious problems civil wars ethnic division corruption HIV AIDS poverty food security and the disastrous effects of climate change and these issues may well impede the upward trajectory of Africa
