Supreme Initiation An Empirical Spiritual Science For The Supreme Truth:

Supreme Initiation Shōkō Asahara,1988 Supreme Initiation Shōkō Asahara,1988 *Controversial New Religions*

James R. Lewis,Jesper Aa. Petersen,2014-07-16 Written by established scholars as well as younger experts in their field this updated and revised second edition of *Controversial New Religions* offers a scholarly dispassionate look at the new religious groups that have generated the most attention in the media and general public *Handbook of Religion and the Authority of Science* Jim R. Lewis,Olav Hammer,2010-11-19 There has been a significant but little noticed aspect of the interface between science and religion namely the widespread tendency of religions to appeal to science in support of their truth claims Though the appeal to science is most evident in more recent religions like Christian Science and Scientology no major faith tradition is exempt from this pattern Members of almost every religion desire to see their truths supported by the authority of science especially in the midst of the present historical period when all of the comforting old certainties seem problematic and threatened The present collection examines this pattern in a wide variety of different religions and spiritual movements and demonstrates the many different ways in which religions appeal to the authority of science The result is a wide ranging and uniquely compelling study of how religions adapt their message to one of the major challenges presented by the contemporary world Terror in the Mind of God Mark Juergensmeyer,2003-09 Completely revised and updated this new edition incorporates the events of September 11 2001 into Mark Juergensmeyer s landmark study of religious terrorism

Global Rebellion Mark Juergensmeyer,2008 This is an indispensable book in helping us understand the new world disorder that seems to be overtaking us Juergensmeyer points out that much of the world neither understands nor finds attractive the idea of a secular state He helps us see that religious nationalism is a fact of life that will be with us for a long time to come Deconstructing any simple notion of fundamentalism he shows us how it is possible to live with religious nationalism constructively without demonizing it That is a major achievement Robert Bellah coauthor of *Habits of the Heart* For years Mark Juergensmeyer has served as a kind of Cassandra figure warning us all about the rise of religious violence the global reach of religious nationalism and the challenges posed by new religious identities to the secular nation state Now that the world is finally listening Juergensmeyer remains our best guide in unraveling the complex interplay between religion and politics in the modern world *Global Rebellion* once again demonstrates why Juergensmeyer is the foremost authority on the global sociology of religion This is an awe inspiring work by arguably the most important thinker on the subject Reza Aslan author of *No god but God The Origins Evolution and Future of Islam* **The Mind of the Terrorist** Jerrold M. Post,2024-09-04 In contrast to the widely held assumption that terrorists as crazed fanatics Jerrold Post demonstrates they are psychologically normal and that hatred has been bred in the bone He reveals the powerful motivations that drive these ordinary people to such extraordinary evil by exploring the different types of terrorists from national separatists like the Irish Republican Army to social revolutionary terrorists like the Shining Path as well as religious extremists like al Qaeda and Aum

Shinrikyo In The Mind of the Terrorist Post uses his expertise to explain how the terrorist mind works and how this information can help us to combat terrorism more effectively *Violence and New Religious Movements* James R. Lewis, 2011-04-06 The relationship between new religious movements NRMs and violence has long been a topic of intense public interest an interest heavily fueled by multiple incidents of mass violence involving certain groups Some of these incidents have made international headlines When New Religious Movements make the news it s usually because of some violent episode Some of the most famous NRMs are known much more for the violent way they came to an end than for anything else Violence and New Religious Movements offers a comprehensive examination of violence by and against new religious movements The book begins with theoretical essays on the relationship between violence and NRMs and then moves on to examine particular groups There are essays on the Big Five the most well known cases of violent incidents involving NRMs Jonestown Waco Solar Temple the Aum Shinrikyo subway attack and the Heaven s Gate suicides But the book also provides a richer survey by examining a host of lesser known groups This volume is the culmination of decades of research by scholars of New Religious Movements Global Proliferation of Weapons of Mass Destruction United States. Congress. Senate. Committee on Governmental Affairs. Permanent Subcommittee on Investigations, 1996 **Religions of the World** J. Gordon Melton, Martin Baumann, 2010-09-21 This masterful six volume encyclopedia provides comprehensive global coverage of religion emphasizing larger religious communities without neglecting the world s smaller religious outposts Religions of the World Second Edition A Comprehensive Encyclopedia of Beliefs and Practices is an extraordinary work bringing together the scholarship of some 225 experts from around the globe The encyclopedia s six volumes offer entries on every country of the world with particular emphasis on the larger nations as well as Indonesia and the Latin American countries that are traditionally given little attention in English language reference works Entries include profiles on religion in the world s smallest countries the Vatican and San Marino profiles on religion in recently established or disputed countries Kosovo and Nagorno Karabakh as well as profiles on religion in some of the world s most remote places Antarctica and Easter Island Religions of the World is unique in that it is based in religion on the ground tracing the development of each of the 16 major world religious traditions through its institutional expressions in the modern world its major geographical sites and its major celebrations Unlike other works the encyclopedia also covers the world of religious unbelief as expressed in atheism humanism and other traditions *War and Religion* Jeffrey M. Shaw Ph.D., Timothy J. Demy, 2017-03-27 This three volume reference provides a complete guide for readers investigating the crucial interplay between war and religion from ancient times until today enabling a deeper understanding of the role of religious wars across cultures Containing some 500 entries covering the interaction between war and religion from ancient times the three volume War and Religion An Encyclopedia of Faith and Conflict provides students with an invaluable reference source for examining two of the most important phenomena impacting society today This all inclusive reference work will serve readers

researching specific religious traditions historical eras wars battles or influential individuals across all time periods The A Z entries document ancient events and movements such as the First Crusade that began at the end of the 10th century as well as modern day developments like ISIS and Al Qaeda Subtopics throughout the encyclopedia include religious and military leaders or other key people ideas and weapons and comprehensive examinations of each of the major religious traditions views on war and violence are presented The work also includes dozens of primary source documents each introduced by a headnote that enable readers to go directly to the source of information and better grasp its historical significance The in depth content of this set benefits high school and college students as well as scholars and general readers

Political Paranoia Robert S. Robins, Robins, Robert Sidwar Robins, Robert S. Robins, Jerrold M. Post, 1997-01-01 Robert S Robins and Jerrold M Post M D experts in political psychology document and interpret the malign power of paranoia in a variety of contexts in political movements like McCarthyism in organizations like the John Birch Society in leaders like Hitler Stalin Pol Pot Jim Jones and David Koresh and among extreme groups that commit violence in the name of Christianity Islam and Judaism Indeed Robins and Post show that the paranoid dynamic has been aggressively present in every social disaster of this century Robins and Post describe the paranoid personality explain why paranoia is part of human evolutionary history and examine the conditions that must exist before the message of the paranoid takes root in a vulnerable population leading to mass movements and genocidal violence

Radicalisation James R. Lewis, Akil N. Awan, 2023-12-07 Radicalisation has become an important part of the twenty first century security and political landscape It is a seemingly ubiquitous term employed by academics policymakers civil society actors practitioners and media alike in ever expanding ways describing everything from changing domestic social movements to the growth of international terrorism This volume provides a comprehensive treatment of radicalisation the processes during which individuals or groups adopt increasingly extreme political social or religious beliefs positions or aspirations particularly in cases associated with the use of violence Adopting a multifaceted and comparative approach the contributors interrogate this phenomenon from wide ranging social ideological religious and historical angles The first part of the book explores how academia has engaged with the concept of radicalisation including the ontological and epistemological concerns of Critical Terrorism Studies theoretical models for understanding radicalisation and approaches to radicalisation through the various lenses of identity gender youth and media The second part explores manifestations of radicalisation through a range of diverse case studies including the Falun Gong movement Aum Shinrikyo Far Right trans nationalism white nationalist lone wolves and the Great Replacement thesis ISIS and Western jihadists deradicalisation programmes hero myths the Extreme Right in Eastern Europe and the dark side of globalisation

The Culture of Martyrdom M. A. Khan, 2008

Aum Shinrikyo's Impact on Japanese Society Daniel Alfred Metraux, 2000 Analyzes the vast impact that Aum has had on Japanese society including its appeal to Japanese youth In depth study of the question of civil liberties now that many Japanese wish to ban sects Also details political questions

raised by the Aum crisis Aum's revivalist mission to Russia and attempts by Aum and other New Religions in Japan to gain money and fame by pushing an Armageddon theme **Japan Studies Review**, 1998 Exercising Power Tore Ahlbäck, Björn Dahla, Donnerska institutet för religionshistorisk och kulturhistorisk forskning, Suomen Uskontotieteellinen Seura, 2006 **Accelerating Human Evolution by Theosophical Initiation** Yves Mühlematter, 2022-12-19 The main subjects of analysis in the present book are the stages of initiation in the grand scheme of Theosophical evolution These initiatory steps are connected to an idea of evolutionary self development by means of a set of virtues that are relative to the individual's position on the path of evolution The central thesis is that these stages were translated from the Hindu tradition to the Theosophical tradition through multifaceted hybridization processes in which several Indian members of the Theosophical Society partook Starting with Annie Besant's early Theosophy the stages of initiation are traced through Blavatsky's work to Manilal Dvivedi and T Subba Row both Indian members of the Theosophical Society and then on to the San tana Dharma Text Books In 1898 the English Theosophist Annie Besant and the Indian Theosophist Bhagavan Das together founded the Central Hindu College Benares which became the nucleus around which the Benares Hindu University was instituted in 1915 In this context the San tana Dharma Text Books were published M hlematter shows that the stages of initiation were the blueprint for Annie Besant's pedagogy which she implemented in the Central Hindu College in Benares In doing so he succeeds in making intelligible how esoteric knowledge was transferred to public institutions and how a broader public could be reached as a result The dissertation has been awarded the ESSWE PhD Thesis prize 2022 by the European Society for the Study of Western Esotericism **Appletons' Journal of Literature, Science and Art**, 1869 **Divination** Patrick Curry, 2016-05-13 Divination is any ritual and its associated tradition performed in order to ask a more than human intelligence for guidance A universal human practice it has received surprisingly little academic attention This interdisciplinary collection by leading scholars in the field is dedicated to fascinating new insights into divination and oracles arising from recent work in anthropology religious studies history and classical studies Central importance is given to the practical and theoretical perspectives of diviners as well as scholars of divination several contributors are both This book explores philosophical issues such as the nature of divinatory intelligence the relationship between divinatory and metaphorical truth the primacy of ontology over epistemology the importance of reflexivity in scholarly studies of divination and astrology as the principal Western form of divination The ethnographic and historical examples range from contemporary Nigeria urban Cuba Mayan Guatemala and the shamanic cultures of the circumpolar Arctic to classical Greece and ancient Judea
