Surface Carbohydrates Of The Eukaryotic Cell:

Surface Carbohydrates of the Eukaryotic Cell Geoffrey Malcolm Weston Cook, R. W. Stoddart, 1973 **Surface Carbohydrates of the Eukaryotic Cell** G. M. W. Cook, R. W. Stoddart, 1975 **Biology and Chemistry of Eukaryotic Cell Surfaces** E.Y.C. Lee, 2012-12-02 Biology and Chemistry of Eukaryotic Cell Surfaces contains the proceedings of the Miami Winter Symposia held on January 14 15 1974 and organized by the Department of Biochemistry University of Miami School of Medicine in Miami Florida Organized into 27 chapters separating the manuscripts presented at the symposium this book presents the stochastic studies on cell surface stickiness and the adhesion and aggregation of blood platelets This text also explains the cell contact and transformation induced changes in the dynamic organization of normal and neoplastic cell plasma membranes and their role in lectin mediated toxicity toward tumor cells It also looks into the chemical components of surface membranes related to biological properties carbohydrate antigens of cell surfaces and molecular orientation of erythrocyte membrane glycoproteins Some other chapters discuss the cell envelope glycoprotein biosynthesis in fungi cellular lectin receptors and topographical alterations of the fat cell surface membrane elicited by concanavalin A Immunochemical evidence for putrescine sites on the membrane of mammalian cells as well as the fractionation and biosynthesis of membrane components in erythroid cells are also described **Carbohydrate Chemistry** J S Brimacombe, 2007-10-31 Carbohydrate Chemistry provides review coverage of all publications relevant to the chemistry of monosaccharides and oligosaccharides in a given year The amount of research in this field appearing in the organic chemical literature is increasing because of the enhanced importance of the subject especially in areas of medicinal chemistry and biology In no part of the field is this more apparent than in the synthesis of oligosaccharides required by scientists working in glycobiology Clycomedicinal chemistry and its reliance on carbohydrate synthesis is now very well established for example by the preparation of specific carbohydrate based antigens especially cancer specific oligosaccharides and glycoconjugates Coverage of topics such as nucleosides amino sugars alditols and cyclitols also covers much research of relevance to biological and medicinal chemistry Each volume of the series brings together references to all published work in given areas of the subject and serves as a comprehensive database for the active research chemist Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical research Compiled by teams of leading authorities in the relevant subject areas the series creates a unique service for the active research chemist with regular in depth accounts of progress in particular fields of chemistry Subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis **Plant Carbohydrates II** W. Tanner, F.A. Loewus, 2012-12-06 In 1958 a single volume in the original series of this Encyclopedia adequately summarized the state of knowledge about plant carbohydrates Expansion into two volumes in the New Series highlights the explosive increase in information and the heightened interest that attended this class of compounds in the intervening years Even now the search has just begun Much remains to be accom

plished e g a full description of the plant cell wall in chemical terms Why this growing fascination with plant carbohydrates Clearly much credit goes to those who pioneered the complex chemistry of polyhydroxylated compounds and to those who later sorted out the biochemical features of these molecules But there is a second aspect the role of carbohydrates in such biological functions as host parasite and pollen pistil interactions the mating reaction in fungi symbiosis and secretion to name a few Here is ample reason for anyone concerned with the plant sciences to turn aside for a moment and consider how carbohydrates so many years neglected in favor of the study of proteins and nucleic acids contribute to the physiological processes of growth and development in plants

Complex Carbohydrates of Nervous Tissue R. U. Margolis, 2013-11-11 It is only

relatively recently that neurochemists and neurobiologists have shown appreciable interest in the class of macromolecules now generally referred to as complex carbohydrates although gangliosides were of course first identified and studied in brain. The glycosaminoglycans fell chiefly within the province of connective tissue biochemists and earlier information concerning the structure and metabolism of glycoproteins was largely limited to the more accessible glycoproteins and oligosaccharides such as those found in plasma, milk and urine or ones which are relatively simple to prepare in a soluble and manageable form. Techniques were later devised for the isolation and purification of tightly bound membrane glycoproteins where initial studies concentrated mainly on the erythrocyte for which large amounts of a single cell population are available. Because of the structural complexity of nervous tissue and the large numbers, low concentrations and membrane bound form of many of its complex carbohydrates, progress has occurred more slowly in this area. Aging and Other Model Systems

Bert M. Zuckerman, 2013-10-22 Nematodes as Biological Models Volume 2 Aging and Other Model Systems contains discussions on free living nematodes as biological models for pharmacologic and toxicant testing and for studies on gerontology and nutrition. The book presents specific chapters that cover topics on nematodes as models to study aging, nematodes as nutritional models, physiology and morphology of nematodes and models and mechanisms on longevity and survival in nematodes. Geneticists, cell and developmental biologists, neurologists, endocrinologists, toxicologists, nutritionists and gerontologists will find the book invaluable. **The Glycoconjugates V2** Martin Horowitz, 2012-12-02 The Glycoconjugates Mammalian Glycoproteins Glycolipids and Proteoglycans Volume II is a collaboration of different experts in the field of molecular biology on the subject of glycoconjugates. The text of the second volume covers topics such as the structure and biosynthesis of connective tissue proteoglycans, glycoproteins and glycolipids and glycoprotein and glycolipid catabolism and degradation. It also discusses the structure, composition and isolation of surface membranes and lectins, its immunological aspects and its use in the study of mammalian glycoprotein. The book is recommended for molecular biologists, organic chemists and biochemists who would like to know more about glycolipids and glycoproteins and their applications.

Evolutionary Biology Pierre Pontarotti, 2016-09-20 This book presents selected contributions to the 19th Evolutionary Biology Meeting which took place in September 2015 in Marseille. It consists of 22 chapters which are grouped in four sections: Convergent Evolution, Evolution of Complex Traits, Concepts, Methods. The annual Evolutionary Biology Meetings in Marseille serve to gather leading evolutionary biologists and other scientists using evolutionary biology concepts e.g. for medical research to promote the exchange of ideas and to encourage interdisciplinary collaborations. Offering an up to date overview of recent findings in the field of evolutionary biology, this book is an invaluable source of information for scientists, teachers and advanced students. **Advances in Applied Microbiology**, 1993-09-20 Advances in Applied Microbiology

Metallic Systems Thomas C. Allison, Orkid Coskuner, Carlos A. Gonzalez, 2011-05-09 Metallic systems are ubiquitous in daily life. They play key roles for example in the chemistry of many biomolecules, ionic solutions, nanoparticles and catalytic

processes They may be in solid liquid or gaseous form The interactions of other molecules with metal surfaces are of considerable importance Each of these topics is addressed in M **Virology** National Institutes of Health (U.S.),1978
