Patrick McCray, 2013 In 1969 Princeton physicist Gerard O Neill began looking outward to space colonies as the new frontier for humanity s expansion A decade later Eric Drexler an MIT trained engineer turned his attention to the molecular world as the place where society s future needs could be met using self replicating nanoscale machines Patrick McCray traces how these visioneers and the communities they fostered blended countercultural ideals with hard science entrepreneurship libertarianism and unbridled optimism about the future
