## **The Impact Of War Studies On The Psychological Consequences Of War And Migration:**

**The Impact of War** Trudy Mooren, 2001      *The Fear and the Freedom* Keith Lowe, 2017-10-24 The international bestselling author of *Savage Continent* examines how the world has been transformed by World War II. *The Fear and the Freedom* is Keith Lowe's follow up to *Savage Continent*. While that book painted a picture of Europe in all its horror as WWII was ending, *The Fear and the Freedom* looks at all that has happened since, focusing on the changes that were brought about because of WWII simultaneously one of the most catastrophic and most innovative events in history. It killed millions and eradicated empires, creating the idea of human rights and giving birth to the UN. It was because of the war that penicillin was first mass produced, computers were developed and rockets first sent to the edge of space. The war created new philosophies, new ways of living, new architecture. This was the era of Le Corbusier, Simone de Beauvoir, and Chairman Mao. But amidst the waves of revolution and idealism, there were also fears of globalization, a dread of the atom bomb, and an unexpressed longing for a past forever gone. All of these things and more came about as direct consequences of the war and continue to affect the world that we live in today. *The Fear and the Freedom* is the first book to look at all of the changes brought about because of WWII. Based on research from five continents, Keith Lowe's *The Fear and the Freedom* tells the very human story of how the war not only transformed our world but also changed the very way we think about ourselves. Magnificent. *The Fear and the Freedom* can justly claim to be one of the best, most useful books on World War II to have emerged in the past decade. It belongs in everyone's library. Paul Kennedy, *The Wall Street Journal*

[Diagnosing and Treating Complex Trauma](#) Trudy Mooren, Martijn Stöfse, 2014-08-01 The term complex trauma refers to a broad range of symptoms resulting from exposure to prolonged or repeated severely traumatizing events. This broad spectrum of psychological symptoms complicates the formulation of an all-encompassing explicit definition which in turn complicates the creation of specific treatment guidelines. In *Diagnosing and Treating Complex Trauma*, Trudy Mooren and Martijn Stöfse explore the concept of complex trauma with reference to severely traumatised people including refugees, asylum seekers, war veterans, people with severe occupational trauma, and childhood trauma, and others who have dealt with severe violence. The book introduces a layered model for diagnosing and treating complex trauma in four parts. Part One introduces the concept of complex trauma, its historical development, and the various theories about trauma. The authors introduce a layered model that describes the symptoms of complex trauma and conclude with a discussion on the three-phase model. Part Two describes the diagnostic options available that make use of a layered model of complex trauma. Part Three discusses the treatment of complex trauma using the three-phase model as an umbrella model that encompasses the entire treatment. Chapters cover a multitude of stabilization techniques crucial to the treatment of every client group regardless of the therapeutic expectations. This part also contains an overview of the general and specific trauma processing techniques. The last chapter in this part covers the third phase of the treatment, integration. Part Four addresses the characteristics of different groups of clients who are affected by complex

trauma the components that affect their treatment and the suggested qualities required of a therapist to deal with each group The book concludes with a chapter discussing the consequences for therapists providing treatment to people afflicted by complex trauma Developed from the authors own clinical experiences Diagnosing and Treating Complex Trauma is a key guide and reference for healthcare professionals working with severely traumatised adults including psychologists psychotherapists psychiatrists social psychiatric nurses and case managers

**Culture, Ethnicity and Chronic Conditions** Charles Agyemang, Ama de-Graft Aikins, 2016-04-08 The global burden of chronic non communicable diseases NCDs such as hypertension diabetes and cancers and of common mental disorders such as depression and anxiety has a disproportionate impact on the low and middle income countries LMICs of Africa Asia and Latin America The pattern persists in African and Asian migrant populations in European and North American countries despite the higher standards of living and improved health infrastructure The consensus of experts is that pragmatic cost effective and sustainable interventions are required and that these must prioritise the social determinants of NCDs as well as the social participation of affected communities Despite the growing emphasis on the role of social processes in health system responses to chronic disease in LMICs there has been no definitive volume that brings together LMIC perspectives on these issues This book aims to address this major gap by presenting new conceptual and empirical perspectives on the interconnections between culture ethnicity and chronic conditions in LMICs and their implications for research intervention and policy The chapters focus on lay and institutional meanings experiences and responses to chronic conditions in selected countries in Africa Europe and the Caribbean This book was originally published as a special issue of Ethnicity and Health

**Handbook of Stress, Trauma, and the Family** Don. R. Catherall, 2013-01-11 The Handbook of Stress Trauma and the Family is broken down into three sections compiling research theory and practice The first section focuses on how traumatic stress affects intimate others what familial characteristics affect individual susceptibility to trauma as well as evaluation of the effectiveness of various interventions The section on theory explores concepts of stress and intrapsychic processes underlying the intergenerational transmission of trauma addressing how families can buffer or enhance anxiety The final section entitled practice covers assessment presenting both the Circumplex Model and Bowenian family theory models treatment models and treatment formats for specific populations The major family treatment models applicable to stress and trauma are discussed including contextual object relations emotionally focused and critical interaction therapy

**The Psychological Effects of Immigrating** Robert Tyminski, 2022-09-09 Exploring immigration from psychological historical clinical and mythical perspectives this book considers the varied and complex answers to questions of why people immigrate to entirely new places and leave behind their familiar surroundings and culture Using research reviews extensive case material and literary examples such as Virgil's The Aeneid Robert Tyminski's work will deepen readers understanding of what is both unique and universal about migratory experiences He addresses the negative consequences of xenophobia the acculturation experiences of children compared to

adults the trauma and psychological issues that arise when seeking refuge or relocating to a new country and the more recent implications of COVID 19 upon border crossings Tyminski also re evaluates the term identity as a psychological shorthand suggesting that it can flatten our understanding of human complexity and erase migrant and refugee life stories and differences As one of few books to investigate immigration from a Jungian oriented perspective Robert Tyminski s work offers a new and broad perspective on the mental health issues related to immigration This book will prove essential for clinicians working with refugees and migrants when in training and in practice as well as students and practitioners of psychoanalysis seeking to deepen their understanding of migratory experiences , Forced Migration, Gender and Wellbeing Selma Porobić,Brad K. Blitz,2023-06-01 Reflecting on three decades of post conflict recovery in the Balkans this incisive book investigates the long term effects of war displacement on women across Bosnia and Herzegovina Serbia and Kosovo Selma Porobi and Brad K Blitz draw upon four different research streams produced by a large cross national and multidisciplinary team of contributors to compare the experiences of different categories of war uprooted and or women forced migrants Trauma, Psychosis, and Posttraumatic Stress Disorder Kate V. Hardy,Kim T. Mueser,2017-12-21 There is abundant evidence showing a strong association between trauma exposure psychotic symptoms and posttraumatic stress disorder PTSD Early trauma exposure contributes to the formation of psychotic symptoms and the development of psychotic disorders or severe mental illnesses such as schizophrenia bipolar disorder and treatment refractory major depression Furthermore among persons with psychotic disorders multiple traumatization over the lifetime is common due to factors such as social stigma the criminalization of severe mental illness and increased vulnerability to interpersonal victimization In addition to these factors is the traumatic nature of experiencing psychotic symptoms and coercive treatments such as involuntary hospitalization and being placed in seclusion or restraints Not surprisingly these high rates of trauma lead to high rates of PTSD in people with psychotic disorders which are associated with more severe symptoms worse functioning and greater use of acute care services In addition to the impact of trauma on the development of psychotic disorders and comorbid PTSD traumatic experiences such as childhood sexual and physical abuse can shape the nature of prominent psychotic symptoms such as the content of auditory hallucinations and delusional beliefs Additionally traumatic experiences have been implicated in the role of stress responsivity and increased risk for transition to psychosis in those identified as being at clinical high risk of developing psychosis Finally although the diagnostic criteria for PTSD primarily emphasize the effects of trauma on anxiety avoidance physiological over arousal and negative thoughts it is well established that PTSD is frequently accompanied by psychotic symptoms such as hallucinations and delusions that cannot be attributed to another DSM V Axis I disorder such as psychotic depression or schizophrenia Understanding the contribution of traumatic experiences to the etiology of psychosis and other symptoms can inform the provision of cognitive behavioral therapy for psychosis including the development of a shared formulation of the events leading up to the onset of the disorder as well as

other trauma informed treatments that address distressing and disabling symptoms associated with trauma and psychosis Until recently the trauma treatment needs of this population have been neglected despite the high rates of trauma and PTSD in persons with psychotic disorders and in spite of substantial gains made in the treatment of PTSD in the general population Fortunately progress in recent years has provided encouraging evidence that PTSD can be effectively treated in people with psychotic disorders using interventions adapted from PTSD treatments developed for the general population In contrast to clinician fears about the untoward effects of trauma focused treatments on persons with a psychotic disorder research indicates that post traumatic disorders can be safely treated and that participants frequently experience symptom relief and improved functioning There is a need to develop a better understanding of the interface between trauma psychosis and post traumatic disorder This Frontiers Research Topic is devoted to research addressing this interface Global Mental Health in Times of Pandemic and Migration Malek Bajbouj, Eric Hahn, Ghayda Hassan, Tam Thi Minh Ta, 2022-02-17 **Legacies of Violence** Robert Mason, 2016-12-01 Whether in the form of warfare dispossession forced migration or social prejudice Australia's sense of nationhood was born from and continues to be defined by experiences of violence Legacies of Violence probes this brutal legacy through case studies that range from the colonial frontier to modern domestic spaces exploring themes of empathy isolation and Australians imagined place in the world Moving beyond the primacy that is typically accorded white accounts of violence contributors place particular emphasis on the experiences of those perceived to be on the social periphery repositioning them at the center of Australia's relationship to global events and debates *The Interplay of Stress, Health, and Well-Being: Unraveling the Psychological and Physiological Processes* Adelinda Araujo Candeias, Mariola Bidzan, Konrad Reschke, Edgar Galindo, Marcus Stueck, 2024-09-04 This Research Topic explores the intricate relationship between stress health and well being with a focus on the underlying psychological and physiological processes involved The aim is to shed light on the complex interplay between these factors and provide insights into potential interventions and strategies for promoting optimal mental and physical well being It encompasses both theoretical perspectives and empirical research emphasizing the need for interdisciplinary collaboration and a comprehensive understanding of stress health and well being The Impact of Chronic Stress on Physical Health Examining the physiological processes through which chronic stress contributes to physical health problems such as cardiovascular diseases immune dysregulation and metabolic disorders Investigating the role of stress related behaviors e g poor sleep unhealthy eating habits sedentary lifestyle in mediating the relationship between stress and physical health outcomes Discussing potential interventions and preventive measures to mitigate the adverse effects of chronic stress on physical well being **Oxford Textbook of Migrant Psychiatry** Dinesh Bhugra, 2021-02-04 Migrant psychiatry is an evolving subdiscipline within cultural psychiatry that deals with the impact of migration on the mental health of those who have migrated and those who work with these groups and provide services to them Stress related to migration affects migrants and their extended families either

directly or indirectly The process of migration is not just a phase but leads on to a series of adjustments including acculturation which may occur across generations Factors such as changes in diet attitudes and beliefs and overall adjustment are important in settling down and making the individuals feel secure This period of adjustment will depend upon the individual migrant s pre migration experiences migration process and post migration experiences but also upon an individual s personality social support and emotional response to migration Socio demographic factors such as age gender educational and economic status will all play a role in post migration adjustment In order to understand the impact on individuals not only the type of migration and different stressors but also the types of psychological mechanisms at a personal level and the resources and processes at a societal level need to be explored Despite the number of refugees and asylum seekers around the world increasing at an astonishing rate the mental health needs of migrants are often ignored by policy makers and clinicians The Oxford Textbook of Migrant Psychiatry is designed to serve as the comprehensive reference resource on the mental health of migrants bringing together both theoretical and practical aspects of the mental health needs of refugees and asylum seekers for researchers and professionals Individual chapters summarise theoretical constructs related to theories of migration the impact of migration on mental health and adjustment collective trauma individual identity and diagnostic fallacies The book also covers the practical aspects of patient management including cultural factors ethnopsychopharmacology therapeutic interaction and therapeutic expectation and psychotherapy Finally the book will examine special clinical problems and special patient groups Part of the authoritative Oxford Textbooks in Psychiatry series this resource will serve as an essential reference for psychiatrists mental health professionals general practitioners primary care physicians social workers policy makers and voluntary agencies dealing with refugees and asylum seekers
