Model Neural Networks and Behavior Allen Selverston,2013-06-29 The most conspicuous function of the nervous system is to control animal behavior From the complex operations of learning and mentation to the molecular configuration of ionic channels the nervous system serves as the interface between an animal and its environment To study and understand the fundamental mechanisms underlying the control of behavior it is often both necessary and desirable to employ biological systems with characteristics especially suitable for answering specific questions In neurobiology many invertebrates have become established as model systems for investigations at both the systems and the cellular level Large readily identifiable neurons have made invertebrates especially useful for cellular studies The fact that these neurons occur in much smaller numbers than those in higher animals also makes them important for circuit analysis Although important differences exist some of the questions that would be technically impossible to answer with vertebrates can become experimentally tractable with invertebrates

A Life Together Sigrist Seraphim,2011-04-01 Written in the tradition of the Orthodox East s desert tradition of short meditations on spiritual themes Bishop Seraphim s new book is the Eastern Church s answer to Bonheoffer s great reflection on similar themes Here Bishop Seraphim explores the Russian understanding of the term Sobornost a word for community first introduced in the 19th century which has taken shape as a key concept for exploring what community means and how unity between human beings is truly possible This uniquely Eastern perspective on a topic of interest to people everywhere will appeal to anyone hungering for a new understanding of community that can inspire daily life The book will also leave readers with the happy awareness that the history of the Church is not something closed and complete nor is Christianity an exhausted creed which has run its course Instead Christianity is young and ever new and the Church is just beginning to discover the inwardness that is implicit in the Gospels
