*The Idea of Social Structure* Lewis A. Coser,2017-07-12 Written and compiled by friends and former students The Idea of Social Structure honors Robert K Merton considered one of the premier sociologists of the twentieth century Along with Talcott Parsons and Marion J Levy Merton was emphatic in his use of the term social structure however different they were in defining and refining the term The chapters in this volume address

many of Merton's diverse sociological theories and in turn his theories impact upon a very large sociological territory. The volume includes major statements on the context of working with Merton by Lewis A. Coser, Paul F. Lazarsfeld, Robert A. Nisbet and Seymour Martin Lipset as well as memorable statements covering Merton's interests in the sociology of knowledge and science, planning, communities, medical education, relative deprivation, everyday life, political roles and communication media. This is a powerful sourcebook for understanding the work of Merton and of his intellectual successors. Nisbet called the decade of the 1930s among the most vital and creative periods in American history. It was certainly a period of intense struggle, political, military and ideological. But the formation of modern sociology was without question one of the crowning achievements in the scientific evolution of the century. The volume is sharply focused on Merton's work and deeply appreciative of the nature of his contribution. It is a landmark effort in the study of sociology as history.

**The 'Creed of Science' in Victorian England** Roy M. MacLeod, 2024-10-28 The nineteenth century which saw the triumph of the idea of progress and improvement saw also the triumph of science as a political and cultural force. In England as science and its methods claimed privilege and space its language acquired the vocabulary of religion. The new creed of science embraced what John Tyndall called the scientific movement; it was in the language of T. H. Huxley a militant creed. The march of invention, the discoveries of chemistry and the wonders of steam and electricity culminated in a crusade against ignorance and unbelief. It was a creed that looked to its own apostolic succession from Copernicus, Galileo and the martyrs of the scientific revolution. Yet it was a creed whose doctrines were divisive and whose convictions resisted. Alongside arguments for materialism, utility, positivism and evolutionary naturalism persisted reservations about the nature of man, the role of ethics and the limits of scientific method. These essays discuss leading strategists in the scientific movement of late Victorian England. At the same time they show how science established served not only the scientific community but also the interests of imperial and colonial powers.

**French Intellectuals Against the Left** Michael Scott Christofferson, 2004 Christofferson argues that French anti-totalitarianism was the culmination of direct democratic critiques of communism, revisions of the revolutionary project after 1956. He offers an alternative interpretation for the denunciation of communism, Marxism by the French intellectual left in the late 1970s.

**Chinese Intellectuals Between State and Market** Merle Goldman, Edward Gu, 2005-08-03 This edited volume describes the intellectual world that developed in China in the last decade of the twentieth century. How as China's economy changed from a centrally planned to a market one and as China opened up to the outside world and was influenced by the outside world Chinese intellectual activity became more wide-ranging, more independent, more professionalized and more commercially oriented than ever before. The future impact of this activity on Chinese civil society is discussed in the last chapter.

*The Liberal Mind in a Conservative Party* Geoffrey Robinson, 2025-06-17 Robinson analyses the peculiarly Australian intellectual tradition of liberal conservatism within the mainstream centre right Liberal Party of Australia Conservative intellectuals in Australia have forged a pragmatic sceptical and utilitarian liberal conservatism focused on the tasks of government It remains distant both from the romantic and organicist ideas of the populist right and the simplicities of libertarianism Focusing on key figures within this tradition Robinson tracks the progress of Australian liberal conservatism over the years through its origins in the work of David Hume to the thoughts of Peter Coleman David Kemp and Andrew Norton before moving forward to George Brandis and Gregory Melleuish The Liberal Party of Australia has appealed successfully to the conservative sentiments of voters in a liberal society The Liberal Mind in a Conservative Party tells the story of seven intellectuals who helped make this possible Peter Coleman drew on John Anderson Georges Sorel and Michael Oakeshott to champion neoconservatism He argues that this potent political ideology has shaped a distinct political identity which rejects conservative traditionalism and libertarian economics while defending a pragmatic approach to capitalism A fascinating read for students and scholars of Australian politics this book will also be of great value to readers with an interest in international centre right politics
