Advances in Artificial Intelligence, Big Data and Algorithms Gheorghe Grigoras, Pascal Lorenz, 2023-12-15. Computers and automation have revolutionized the lives of most people in the last two decades, and terminology such as algorithms, big data, and artificial intelligence have become part of our everyday discourse. This book presents the proceedings of CAIBDA 2023, the 3rd International Conference on Artificial Intelligence, Big Data, and Algorithms, held from 16-18 June 2023 as a hybrid conference in Zhengzhou, China. The conference provided a platform for some 200 participants to discuss the theoretical and computational aspects of research in artificial intelligence, big data, and algorithms, reviewing the present status and future perspectives of the field. A total of 362 submissions were received for the conference, of which 148 were accepted following a thorough double-blind peer review. Topics covered at the conference included artificial intelligence tools and applications, intelligent estimation and classification, representation formats for multimedia, big data, high performance computing, and mathematical and computer modeling, among others. The book provides a comprehensive overview of this fascinating field, exploring future scenarios and highlighting areas where new ideas have emerged over recent years. It will be of interest to all those whose work involves artificial intelligence, big data, and algorithms.
