Albright,Mladen Turk,2017-11-06 Since the dawn of science ideas about the relation between science and religion have always depended on what else is going on in a society During the twentieth century daily life changed dramatically Technology revolutionized transportation agriculture communications and housework People came to rely on scientific predictability in their technology Many wondered whether God s supposed actions were consistent with scientific knowledge The twenty first century is bringing new scientific research capabilities They are revealing that scientific results are not totally predictable after all Certain types of interaction lead to outcomes that are unpredictable in principle These in turn may lead to a whole new range of potential interactions They do not rule out the reality of a dynamic God who can act in the world without breaking the known principles of science God may in fact work with the way things really are Human experience of God may accurately reflect this reality Interactive World Interactive God illustrates such new understandings in religion and science by describing recent developments in a wide range of sciences and providing theological commentary The book is written for intelligent readers who may not be specialized in science but who are looking

for ways to understand divine action in today's world Commun(ica)ting Bodies Anna-Katharina Höpflinger, Alexander D. Sims, 2009-06-01 This work presents an evangelical theology of the child nurtured in the context of American evangelicalism and affluence It employs an eclectic theological critical method to produce a theological anthropology of the affluent American evangelical child AAEC through interdisciplinary evangelical engagement of American history sociology and economics Sims articulates how affluence constitutes a significant impediment to evangelical nurture of the AAEC in the discipline and instruction of the Lord Thus the problem he addresses is nurture in evangelical affluence conceived as a theological anthropological problem Nurture in the cultural matrices of the evangelical affluence generated by technological consumer capitalism in the U S impedes spiritual and moral formation of the AAEC for discipleship in the way of the cross This impediment risks disciplinary formation of the AAEC for capitalist culture cultivates delusional belief that life consists in an abundance of possessions and hinders the practice of evangelical liberation of the poor on humanity's underside The result is the AAEC's spiritual moral lack in late modernity Chapter 1 introduces the problem of the AAEC Chapters 2 and 3 provide a diachronic lens for the theological anthropology of the AAEC through critical assessment of the theological anthropologies of the child in Jonathan Edwards Horace Bushnell and Lawrence Richards Chapters 4 and 5 constitute the synchronic perspective of the AAEC Chapter 4 presents an evangelical sociology of the AAEC drawing upon William Corsaro's theory of interpretive reproductions and chapter 5 constructs an evangelical theology of the AAEC through critical interaction with John Schneider's moral theology of affluence Chapter 6 Whither the AAEC concludes with a recapitulation of the work and a forecast of possible futures for the AAEC in the twenty first century Paul in Ecstasy Colleen Shantz, 2009-04-27 While many readers of Paul's letters recognize how important his experience was to his life and thought Biblical scholars have not generally addressed this topic head on Colleen Shantz argues that they have been held back both by a bias against religious ecstasy and by the limits of the Biblical texts how do you responsibly access someone else's experience particularly experience as unusual and debated as religious ecstasy And how do you account responsibly for the role of experience in that person's thought Paul in Ecstasy pursues these questions through a variety of disciplines most notably neuroscience This study provides cogent explanations for bewildering passages in Paul's letters outlines a much greater influence of such experience in Paul's life and letters and points to its importance in Christian origins

Supernatural and Natural Selection Lyle B. Steadman, Craig T. Palmer, 2015-11-17 Spanning many different epochs and varieties of religious experience this book develops a new approach to religion and its role in human history The authors look

across a range of religious phenomena from ancestor worship to totemism shamanism and worldwide modern religions to offer a new explanation of the evolutionary success of religious behaviors Their book is more empirical and verifiable than most previous books on evolution and religion because they develop an approach that removes guesswork about beliefs in the supernatural focusing instead on the behaviors of individuals The result is a pioneering look at how and why natural selection has favored religious behaviors throughout history
