Researching animal research

Gail Davies, Beth Greenhough, Pru Hobson-West, Robert G. W. Kirk, Alexandra Palmer, Emma Roe, 2024-01-09 Every year around 80 million scientific procedures are carried out on animals globally These experiments have the potential to generate new understandings of biology and clinical treatments They also give rise to ongoing societal debate This book demonstrates how the humanities and social sciences can contribute to understanding what is created through animal procedures including constitutional forms of research governance different institutional cultures of care the professional careers of scientists and veterinarians collaborations with patients and publics and research animals specially bred for experiments or surplus to requirements Developing the idea of the animal research nexus this book explores how connections and disconnections are made between these different elements how these have reshaped each other historically and how they configure the current practice and policy of UK animal research **Techniques and Basic Experiments for the Study of**

Brain and Behavior Jan Bures, Olga Burešová, Joseph P. Huston, 2016-10-27 Techniques and Basic Experiments for the Study of Brain and Behavior emphasizes the practical aspects of conducting behavioral experiments illustrates the various fundamental methods with characteristic examples and provides a thorough description of the techniques This text aims to teach the basic skills of behavioral research by providing a wide range of reproducible experiments Most of the experiments can be completed within a few hours which makes them suitable for classroom demonstrations and laboratory courses for students Although this book is organized into systematically arranged sections the reader can commence with any of the

experiments without studying the preceding chapters A general knowledge of physiological psychology along the lines outlined in Chapter 1 however is indispensable This book is intended for students and scientists physiologists psychologists pharmacologists biologists and biophysicists interested in physiological psychology The Mouse in Biomedical Research Henry L. Foster, J. David Small, James G. Baker, J. Russell Lindsey, Steven H. Wesbroth, 2013-10-02 *The Laboratory Rat* Volume I Biology and Diseases focuses on the use of rats in specific areas of research ranging from dental research to toxicology The first part of this book retraces the biomedical history of early events and personalities involved in the establishment of rats as a leading laboratory animal The taxonomy genetics and inbred strains of rats are also elaborated The next chapters illustrate the hematology clinical

biochemistry and anatomical and physiological features of the laboratory rat This text concludes with a description of infectious diseases that may be contracted from laboratory and or wild rats This volume is a good source for commercial and institutional organizations involved in producing rats for research use specialists in laboratory animal animal care and research technicians as well as students in graduate and professional curricula

A Practical Approach to Toxicological Investigations Alan Poole, George B. Leslie, 1989-12-14 First published in 1989 this book acknowledges that new drugs food additives and other compounds need to be carefully screened for toxic side effects The bulk of this study is devoted to the practical questions of what toxicological studies should we perform and how should we perform them Compounds which undergo toxicity testing may be conveniently categorised as those which are intended for administration to man and those which are not The former include pharmaceuticals to be used medicinally or prophylactically and chemicals which are added to our food drinks or medicine to improve their stability appearance or palatability Since it is on pharmaceuticals that the most comprehensive toxicological evaluations are generally performed this book has been directed primarily towards to toxicological evaluation of potential new drugs The principles and methodology of toxicological evaluation of other types of compounds are essentially similar
