The Idea of Prehistory Glyn Daniel, 1988 *The Idea of History* Robin George Collingwood, 1993 The Idea of History is the best known work of the great Oxford philosopher historian and archaeologist R G Collingwood Published posthumously in 1946 it examines how the idea of history has evolved from the time of Herodotus to the twentieth century and offers Collingwood s own view of what history is This revised edition has a substantial new introduction which discusses how scholars have responded to Collingwood s classic over the last fifty years It also makes available for the first time some of Collingwood s lectures on the philosophy of history essential for a fuller understanding of his thought and in particular for the interpretation of The Idea of History itself Contemporary Archaeology in Theory Robert W. Preucel, Stephen A. Mrozowski, 2011-10-04 The second edition of Contemporary Archaeology in Theory The New Pragmatism has been thoroughly updated and revised and features top scholars who redefine the theoretical and political agendas of the field and challenge the usual distinctions between time space processes and people Defines the relevance of archaeology and the social sciences more generally to the modern world Challenges the traditional boundaries between prehistoric and historical archaeologies Discusses how archaeology articulates such contemporary topics and issues as landscape and natures agency meaning and practice sexuality embodiment and personhood race class and ethnicity materiality memory and historical silence colonialism nationalism and empire heritage patrimony and social justice media museums and publics Examines the influence of American pragmatism on archaeology Offers 32 new chapters by leading archaeologists and cultural anthropologists *The Concept of Inclusive Pluralism* Cirilo Boloron Jr., 2022-05-16 When people of different cultures and religious traditions are being constantly drawn closer together interreligious dialogue becomes not only a strategy to understand the Others but also an attitude to deepen one s faith Christian faith acknowledges other religious traditions as

genuine ways and channels of salvation for their adherents and that religions have a place in God's universal plan of salvation for humankind. The plausibility of this assertion can be exemplified by the concept of inclusive pluralism, a theological model developed by the Belgian-born Jesuit theologian Jacques Dupuis. This book expounds that concept and reflects on its implication for the Catholic Church's unwavering commitment to interreligious dialogue. *Deep-Time Images in the Age of Globalization* Oscar Moro Abadía, Margaret W. Conkey, Josephine McDonald, 2024-05-13. This open access volume explores the impact of globalization on the contemporary study of deep time art. The volume explores how early rock art research's Eurocentric biases have shifted with broadened global horizons to facilitate new conversations and discourses in new post-colonial realities. The book uses seven main themes to explore theoretical, methodological, ethical, and practical developments that are orienting the study of Pleistocene and Holocene arts in the age of globalization. Compiling studies as diverse as genetics, visualization, with the proliferation of increasingly sophisticated archaeological techniques means that vast quantities of materials and techniques are now incorporated into the analysis of the world's visual cultures. *Deep Time Images in the Age of Globalization* aims to promote critical reflection on the multitude of positive and negative impacts that globalization has wrought in rock art research. The volume brings new theoretical frameworks as well as engagement with indigenous knowledge and perspectives from art history. It highlights technical, methodological, and interpretive developments and showcases rock art characteristics from previously unknown in the global north geographic areas. This book provides comparative approaches on rock art globally and scrutinises the impacts of globalization on research, preservation, and management of deep time art. This book will appeal to archaeologists, social scientists, and art historians working in the field as well as lovers of rock art. *Archaeological Theory in a Nutshell* Adrian Praetzelis, 2023-06-21. This book provides a brief, readable introduction to archaeological theory. Adrian Praetzelis demystifies a pile of tricky contemporary concepts for the theory-phobic undergraduate or beginning graduate student. This new edition adds chapters on Indigenous cognitive and behavioral archaeologies and now covers 15 contemporary theories from neoevolutionism to queer theory. Each chapter begins with a description of the concept, its origin, and significance. Next up is an example of how an archaeologist has used the idea to understand their site, making the connection between the idea and the archaeology plain and unambiguous. Each chapter ends with discussion questions and suggestions for further reading. A glossary of postmodern discourse, including that word, concludes the book. Using plain English to clarify some of the more baffling ideas used in contemporary archaeology, this book is a vital resource for students studying archaeological theory and the discipline as a whole. *The Bloomsbury Handbook of the Philosophy of the Historical Sciences and Big History* Aviezer Tucker, David Cernín, 2025-08-21. This handbook examines the philosophy of the historical sciences and their synthesis in concepts like Big or Deep History. Written by interdisciplinary philosophers, historians, and scientists, it acts as a valuable guide for anybody interested in scientific knowledge of the deep past. Big History and the philosophy of science. *The Bloomsbury Handbook of the Philosophy*

of the Historical Sciences and Big History is the first philosophical reference work to recognize that History is not what it used to be the historical sciences Deep History Big History and even the history of the Anthropocene have now expanded the scope of historiography beyond that of literate civilizations to cover all scientific inferences about the past from the Big Bang through the history of the planet and the history of life to the history of humanity Different views about the scope of History have ontological epistemic methodological explanatory ethical and educational reasons and implications The historical sciences and the knowledge they have generated are founded on theories of knowledge of the past epistemology of history The contributions in this book consider whether there are common epistemic properties to all the historical sciences that distinguish them from non historical or theoretical sciences The first part of the handbook examines the recent expansion of the scope of the historical sciences in Big History natural history global history and environmental history and older broader concepts of history like universal history and philosophy of history The second part of the handbook addresses the ontology and epistemology of the past including the basic concepts of the historical sciences such as origins the end of history determination and underdetermination contingency and necessity historical predictions and counterfactuals and historical pseudoscience The third part examines the philosophies of the special historical sciences historical linguistics textual criticism geology evolutionary biology systematics archaeology cosmology history of the environment and most significantly their integrations and combinations for example how genetics archaeology and historical linguistics have generated a whole new knowledge of deep human history This collection offers an overview of what the philosophy of the historical sciences is and is becoming for students and experts alike

Archaeological Theory Norman Yoffee, Andrew Sherratt, 1993-07-22 This volume assesses the real achievements of archaeology in increasing an understanding of the past Without rejecting the insights either of traditional or more recent approaches it considers the issues raised in current claims and controversies about what is appropriate theory for archaeology The first section looks at the process of theory building and at the sources of the ideas employed The following studies examine questions such as the interplay between expectation and evidence in ideas of human origins social role and material practice in the formation of the archaeological record and how the rise of states should be conceptualised further papers cover issues of ethnoarchaeology visual symbols and conflicting claims to ownership of the past The conclusion is that archaeologists need to be equally wary of naive positivism in the guise of scientific procedure and of speculation about the unrecorded intentions of prehistoric actors

Prehistoric Britain Timothy Darvill, 2010-07-02 Britain has been inhabited by humans for over half a million years during which time there were a great many changes in lifestyles and in the surrounding landscape This book now in its second edition examines the development of human societies in Britain from earliest times to the Roman conquest of AD 43 as revealed by archaeological evidence Special attention is given to six themes which are traced through prehistory subsistence technology ritual trade society and population Prehistoric Britain begins by introducing the background to prehistoric studies in Britain presenting it in terms of the development of interest in the subject and the changes wrought by new techniques such as radiocarbon dating and new theories such as the emphasis on social archaeology The central sections trace the development of society from the hunter gatherer groups of the last Ice Age through the adoption of farming the introduction of metalworking and on to the rise of highly organized societies living on the fringes of the mighty Roman Empire in the 1st century AD Throughout emphasis is given to documenting and explaining changes within these prehistoric communities and to exploring the regional variations found in Britain In this way the wealth of evidence that can be seen in the countryside and in our museums is placed firmly in its proper context It concludes with a review of the effects of prehistoric communities on life today With over 120 illustrations this is a unique review of Britain's ancient past as revealed by modern archaeology The revisions and updates to Prehistoric Britain ensure that this will continue to be the most comprehensive and authoritative account of British prehistory for those students and interested readers studying the subject

range of writing from earlier periods and on recent narrative theory Gillian Beer looks at the work of writers as diverse as Thomas Carlyle and Philip Sydney Samuel Richardson and George Eliot Three chapters on Virginia Woolf demonstrate how Woolf's reading of past literature philosophy and science gave her an intellectual and emotional purchase on problems of feminism and modernism Beer examines how writers create dialogues with past writing how readers of the present day engage with the difference of past literature and how we make contact with the desires and debates of past readers

Theory and Practice in Archaeology Ian Hodder, 2004-08-02 An overview of the way the archaeological debate has developed over the last 10 years Hodder aims to break down the separation between theory and practice and reconcile the division between the intellectual and the dirt archaeologist

Artifacts and Ideas Bruce Trigger, 2017-09-08 Prehistoric archaeologists cannot observe their human subjects nor can they directly access their subjects' ideas Both must be inferred from the remnants of the material objects they made and used In recent decades this incontrovertible fact has encouraged partisan approaches to the history and method of archaeology An empirical discipline emphasizing data classification and chronology has given way to a behaviorist approach that interprets finds as products of ecologically adaptive strategies and to a postmodern alternative that relies on an idealist cultural relativist epistemology based on belief and cultural traditions In *Artifacts and Ideas* Bruce G Trigger challenges all partisan versions of recent developments in archaeology while remaining committed to understanding the past from a social science perspective Over 30 years Trigger has addressed fundamental epistemological issues and opposed the influence of narrow theoretical and ideological commitments on archaeological interpretation since the 1960s Trigger encourages a relativistic understanding of archaeological interpretation Yet as post-processual archaeology influenced by postmodernism became increasingly influential Trigger countered nihilistic subjectivism by laying greater emphasis on how in the long run the constraints of evidence could be expected to produce a more comprehensive and objective understanding of the past In recent years Trigger has argued that while all human behavior is culturally mediated the capacity for such mediation has evolved as a flexible and highly efficient means by which humans adapt to a world that exists independently of their will Trigger agrees that a complete understanding of what has shaped the archaeological record requires knowledge

both of past beliefs and of human behavior He knows also that one must understand humans as organisms with biologically grounded drives emotions and means of understanding Likewise even in the absence of data supplied in a linguistic format by texts and oral traditions at least some of the more ecologically adaptive forms of human behavior and some general patterns of belief that display cross cultural uniformity will be susceptible to archaeological analysis Advocating a realist epistemology and a materialist ontology Artifacts and Ideas offers an illuminating guide to the present state of the discipline as well as to how archaeology can best achieve its goals
