Hines,2011-04-22 Figure skating is the most popular televised sport at the Olympic Winter Games and is the oldest of the winter sports having first been contested at the Games of the fourth Olympiad in London in 1908 No other sport creates such a perfect balance between athleticism and artistry and the athletes many of them household names like Oksana Baiul Brian Boitano Nancy Kerrigan Evan Lysacek Katarina Witt and Kristi Yamaguchi spend years in training to make it look effortless The Historical Dictionary of Figure Skating relates the history of the sport through a chronology an introductory essay an extensive bibliography appendixes and over 800 cross referenced dictionary entries on hundreds of skaters past and present but also on skating countries governing bodies skating disciplines technical elements skating styles and many other subjects This book is an excellent access point for students researchers and anyone wanting to know more about the history of figure skating *Encyclopedia of Contemporary British Culture* Peter Childs,Michael Storry,2013-05-13 Boasting more than 970 alphabetically arranged entries the Encyclopedia of Contemporary British Culture surveys British cultural practices and icons in the latter half of the twentieth century It examines high and popular culture and encompasses both institutional and alternative aspects of British culture It provides insight into the whole spectrum of British contemporary life Topics covered include architecture pubs film internet and current takes on the monarchy Cross referencing and a thematic contents list enable readers to identify related articles The entries range from short biographical synopses to longer overview essays on key issues This Encyclopedia is essential reading for anyone interested in British culture It also provides a cultural context for students of English Modern History and Comparative European Studies

Technical Merit: A History of Figure Skating Jumps Ryan Stevens,2023-01-18 Nowadays figure skating is largely about

jumps and the impressiveness of how many spins you can make in the air However the jumps have not always been figure skating s most prominent feature When did the jumps emerge how and why Who invented them if that is even possible to know These questions are addressed in Ryan Stevens book Anna Maria Hellborg Department of Sport Sciences Malm University Idrottsforum Much has been written about figure skating jumps over the years but most of it has focused on technique Precious little has been written from a historical perspective Jam packed with fascinating information about the origins and international evolution of figure skating jumps Technical Merit A History of Figure Skating Jumps includes Essays on the waltz jump toe loop Salchow loop flip Lutz Axel pairs throws twists and side by side jumps There is even a chapter devoted to the history of the backflip Data on a wide variety of technical firsts achieved under the International Skating Union s IJS system Dozens of compelling little known facts about the people who have been responsible for some of the biggest technical achievements in the world s most exciting winter sport If you love figure skating you will not be able to put this book down Order your copy today *Children's Illustrated Encyclopedia* DK,2016-07-19 Over three million copies and 25 years later Children s Illustrated Encyclopedia is revised and updated with the latest facts figures and technologies Covering more than 380 topics from dinosaurs to digital technology this highly visual guide engages young readers with photographic spreads and illustrations annotated with amazing trivia Featuring full color photographs maps cutaway diagrams charts and more Children s Illustrated Encyclopedia is written in a clear and child friendly style with updates that include recent space missions scientific breakthroughs and the latest significant events Children s Illustrated Encyclopedia is perfect for reports homework and independent research A great addition to any bookshelf Children s Illustrated Encyclopedia is the essential book for curious young readers who want to know about everything [Collier's Encyclopedia](#) ,1986 **The Publishers Weekly** ,1911 *Meet Your Artistic and Athletic Mind* Mark Abraham,2011-06-06 The Interactions Between Instinct and Intellect and its Impact on Human Behavior Length 324 Pages The oldest musical instrument found is a flute made of bone that is estimated to be over 50 000 years old Aristotle wrote the first book on arts poetics Since then it has been debated what art is at the highest levels However the world of philosophy admits that we still have not been able to articulate a definition for this seemingly simple word of art that would be acceptable to all This shows that we do not understand it well enough to properly define it This confusion stems from an inadequate philosophical understanding of it and thus we have been relishing that which we do not comprehend One of the reasons for this lasting confusion stems from the fact that we try to understand arts by studying art objects in the physical world However without being able to identify what in the mind longs for art in its metaphysical realm and why we will never grasp it This is why we have been mixing novel painting music acting perfume architecture Persian rugs and poetry and so on and try to devise a definition to define them all Although they all are art they have nothing in common This shows but a small fraction of our profound misconception of the world of art Based on what mental force longs for which group of arts coupled with the

structure of the art forms they divide into three distinct and logical categories of 1 Rhythmic Arts 2 Imitative Arts and 3 Abstract Arts Each of these categories connects with a particular mental faculty Then through this understanding we also get to see that there exists an inequity in the sensitivity and excitability of these corresponding mental faculties and we experience different intensities of pleasure from different arts For example some arts like live music performed even by average artists will invoke emotions in many who may scream cry and even faint at concerts but they never react that way by observing the works of true masters of arts such as Michelangelo Picasso or others in museums This results form the imparity in the sensitivities of the corresponding mental faculties mentioned above This view carries us deep into arts as a phenomenon and helps artists to further refine their arts and the art lovers to appreciate it even more In the realm of sports we learn that all sports have three things in common aiming speed and power or endurance Yet these are the skills required for successful hunting Hunting and warring is one of the male instincts as they acted these responsibilities through out the human evolution Because instincts do not disappear in time they have survived and find expression in different sports and thus aiming speed and power find their way into all sports Females not being pressed by this instinct did not hunt or fight wars It is for these organic reasons that males so readily become sport fanatics at the dismay of the women in their lives
