talented but troubled Eugene Aserinsky whose discovery of REM sleep revealed the astonishing activity of the dreaming brain and William Dement a jazz bass playing revolutionary who became known as the father of sleep medicine Dement in turn mentored the brilliant maverick Mary Carskadon who uncovered an epidemic of sleep deprivation among teenagers and launched a global movement to fight it Award winning journalist Kenneth Miller weaves together science and history to tell the story of four outsider scientists who took sleep science from fringe discipline to mainstream obsession through spectacular experiments technological innovation and single minded commitment Readers will walk away with a comprehensive understanding of sleep and why it affects so much of our lives A propulsive utterly engrossing history None of it is simple and all of it is captivating The New York Times Mapping the Darkness offers two narratives at once a sweeping journey of discovery about dreams sleep and the terra incognita of unconsciousness and a wake up call about the dangers of chronic exhaustion It s time Mr Miller tells us to take our sleep back The Wall Street Journal *Modern General Psychology, Second Edition (revised And Expanded) (in 2 Vols.)* M.
