Language Use and Social Change Wilfred Whiteley,2017-09-18 The social implications of multilingualism is a field of study on whcih systematic research began only in the second half of the 20th century in Africa This book originally published in 1971 contains papers which concentrate on East Africa but it also discusses theoretical problems and methods arising from socio linguistic studies outside the African field These include studies on national languages and languages of wider communication in developing nations the communication role of languages in multilingual societies and social and cognitive aspects of bilingualism

The Relevance of Models for Social Anthropology Michael Banton,1968 Language and Social Justice Kathleen C. Riley,Bernard C. Perley,Inmaculada M. García-Sánchez,2024-02-22 Language whether spoken written or signed is a powerful resource that is used to facilitate social justice or undermine it The first reference resource to use an explicitly global lens to explore the interface between language and social justice this volume expands our understanding of how language symbolizes frames and expresses political economic and psychic problems in society thus contributing to visions for social justice Investigating specific case studies in which language is used to instantiate and or challenge social injustices each chapter provides a unique perspective on how language carries value and enacts power by presenting the historical contexts and ethnographic background for understanding how language engenders and or negotiates specific social justice issues Case studies are drawn from Africa Asia Europe North and South

America and the Pacific Islands with leading experts tackling a broad range of themes such as equality sovereignty communal well being and the recognition of complex intersectional identities and relationships within and beyond the human world Putting issues of language and social justice on a global stage and casting light on these processes in communities increasingly impacted by ongoing colonial neoliberal and neofascist forms of globalization Language and Social Justice is an essential resource for anyone interested in this area of research *Towards a Social Grammar of Language* Mathew C. Grayshon, 2019-07-22 No detailed description available for *Towards a Social Grammar of Language* *The Sierra Leone Royal Gazette* Sierra Leone, 1926 *The Voice of Prophecy* Edwin Ardener†, 2007 Ardener is the Czerny of anthropology concerned with technical training with how to think productively within the discipline He should be read above all by postgraduates and postdoctoral researchers whose formation is not yet completed As exercises to form the anthropological mind these papers are both unique and irreplaceable JRAI The intellectual bequest of a brilliant and compassionate human being Michael Herzfeld Harvard University His voice is as deeply needed as ever Ardener anticipated numerous central issues in the social sciences today This publishing event will achieve something much more significant still a long overdue recognition that Ardener not only forged ahead of today's mainstream but bequeathed a legacy of ideas that can regenerate and redirect anthropological thought today This new edition will allow a new and more receptive audience to come to grips with Ardener's distinctive mode of analysis and understanding bringing it more clearly into the mainstream of anthropological thought not only as a historical contribution but also and especially as a source of new reflections From the Foreword Edwin Ardener was one of the most important social anthropologists in Britain of his time working on social economic demographic and political problems and particularly influential in his sustained effort to bring together social anthropology and linguistics in a highly original attempt to reconcile scientific and humanistic approaches to the study of society This volume offers the best of Ardener's papers and forms a theoretically and conceptually coherent body of work by this innovative and profound thinker which will continue to excite and stimulate new generations of students and researchers as it did in the past **Language**, 1929 Proceedings of the annual meeting of the Society in v 1 11 1925 34 After 1934 they appear in Its Bulletin Multidisciplinary Approach in Research Area (Volume-7) Chief Editor- Biplab Audhya, Editor- Dr. Tarannum Khan, Bijanamula Supriya, Dr. Jyotsana Khandelwal, Mrs. V.Geetha, Smt. Padmini Kaji, Mercy Varshney, 2024-03-14 Philosophy of Linguistics Ruth M. Kempson, Tim Fernando, Nicholas Asher, 2012-04-20 Philosophy of linguistics investigates the foundational concepts and methods of linguistics the scientific study of human language It brings together philosophers scientists and historians to map out both the basic assumptions set during the second half of the last century and the unfolding shifts in perspective in which more functionalist perspectives are explored *Language Learners as Ethnographers* Celia Roberts, 2001 This book looks at the role of cultural studies and intercultural communication in language learning The book argues that learners who have an opportunity to stay in the target language country can be

trained to do an ethnographic project while abroad Borrowing from anthropologists the idea of cultural fieldwork and writing culture language learners develop their linguistic and cultural competence through the study of a local group This book combines a theoretical overview of language and cultural practices with a description of ethnographic approaches and materials specifically designed for language learners *The Problem of Context* Roy Dille, 1999 The apparently simple notion that it is contextualization and invocation of context that give form to our interpretations raises important questions about context definition Moreover different disciplines involved in the elucidation and interpretation of meanings construe context in different ways How do these ways differ And what analytical strategies are adopted in order to suggest that the relevant context is self evident The notion of context has received less attention than is due such a central key concept in social anthropology as well as in other related disciplines This collection of contributions from a group of leading social anthropologists and anthropological linguists addresses the question of how the idea of context is constructed invoked and deployed in the interpretations put forward by social anthropologists The ethnographic focus embraces peoples from regions such as Bali Europe Malawi and Zaire Primarily theoretical in its aims the work also draws on expertise from anthropological linguistics and philosophy in order to set the issue as much in a comparative disciplinary perspective as in a comparative cross cultural one *Language and Social Justice in Practice* Netta Avineri, Laura R. Graham, Eric J. Johnson, Robin Conley Riner, Jonathan Rosa, 2018-12-12 From bilingual education and racial epithets to gendered pronouns and immigration discourses language is a central concern in contemporary conversations and controversies surrounding social inequality Developed as a collaborative effort by members of the American Anthropological Association's Language and Social Justice Task Force this innovative volume synthesizes scholarly insights on the relationship between patterns of communication and the creation of more just societies Using case studies by leading and emergent scholars and practitioners written especially for undergraduate audiences the book is ideal for introductory courses on social justice in linguistics and anthropology

Linguistic Anthropology of Education Stanton E.F. Wortham, Betsy Rymes, 2003 Over the years linguistic anthropological research has shown how classrooms are socializing institutions and how language functions as one medium through which this socialization is accomplished Early work in the field has captured the immediacy of social practice and language use in educational contexts and has created useful characterizations of variations in communicative competence The present work builds on the strengths of prior work showing how new theoretical concepts and empirical methods developed in linguistic anthropology over the last decade can further illuminate educational settings The authors introduce an updated Linguistic Anthropology of Education which recognizes that in the rapidly changing field of cultural production within which children and teachers operate today the exploration of multiple pre existing forms of communicative competence is not enough This volume elaborates theory and illustrates the tools and practices of the Linguistic Anthropology of Education to account for today's research context in which the multiplicity of identity and the multiple ways language can be used to represent it have

important ramifications for how learning and social reproduction emerge within educational contexts
