Miller, 1999-04 This volume includes contributions from scholars examining conceptual development in a variety of scientific domains It will be of interest to all who study children's thinking whether from psychological educational or philosophical perspectives

**An Introduction to Theories of Personality** Robert B. Ewen, 2014-01-21 This 7th Edition helps students unravel the mysteries of human behavior through its highly readable introduction to the ideas of the most significant personality theorists Engaging biographical sketches begin each chapter and unique capsule summaries help students review key concepts Theories come alive through the inclusion of quotations from the theorists writings and numerous applications such as dream interpretation psychopathology and psychotherapy Significant changes in the 7th edition include an extended discussion of the practical applications of personality theory with an emphasis on guidelines that can help people increase their self knowledge make better decisions and live more fulfilling lives Fictionalized but true to life examples illustrating the perils of inadequate self knowledge include college students parents terrorists business executives and politicians while other examples show the positive outcomes that can result from a better understanding of one's unconscious This 7th edition also includes a more extensive discussion of how a lack of self understanding caused difficulties for such noted theorists as

Freud and Erikson and a new section that explains how behavior can be strongly influenced by the situation as well as by one's personality. Finally, a new interactive web site provides practice test questions and other topics of interest. Children's Language K. E. Nelson, 2014-03-18. First published in 1983. This series Children's Language reflects the conviction that extensive work on entirely new fronts along with a great deal of reinterpretation of old front data will be necessary before any persuasive and truly orderly account of language. For all volumes in the series there is a common scheme of operation with two tactics. First to give authors sufficient planning time and freedom to arrive at a chapter length account of their area of thinking which vividly shows both the progress and the problems in that area with the author of each chapter free to find a workable proportion of new experimental contributions, review and theory. The second tactic concerns the selection of topics for each volume. This is Volume 4. Structures about language and thought and children as employed in certain other fields may well be shaken and stimulated particularly in education, sociology, anthropology, literature and language remediation.

Category Specificity in Brain and Mind Emer Forde, Glyn Humphreys, 2005-07-22. This book aims to provide converging evidence as to how knowledge about different categories is represented in the brain and how this knowledge develops.

**Learner Contributions to Language Learning** Michael Breen, 2014-09-15. Since it was first established in the 1970s the Applied Linguistics and Language Study series has become a major force in the study of practical problems in human communication and language education. Drawing extensively on empirical research and theoretical work in linguistics, sociology, psychology and education, the series explores key issues in language acquisition and language use. What the learner contributes is central to the language learning process. *Learner Contributions to Language Learning* provides a uniquely comprehensive account of learners' personal attributes, their thinking, their feelings and their actions that have been shown to have an impact upon language learning. Containing specific chapters from leading names in the field, this book provides both a review of what has been discovered from previous research and identifies important future directions for research on learner contributions. It is a landmark volume setting the agenda for language learning research in the 21st century and it provides invaluable information for all those engaged in language teaching. The contributors to the volume are Michael P. Breen, Bonny Norton, Anna Chamot, Rebecca Oxford, Rod Ellis, Anna Pavlenko, James P. Lantolf, Anita Wenden, Diane Larsen Freeman.

**Clinician's Handbook of Child Behavioral Assessment** Michel Hersen, 2011-04-28. Given the vast amount of research related to behavioral assessment, it is difficult for clinicians to keep abreast of new developments. In recent years, there have been advances in assessment, case conceptualization, treatment planning, treatment strategies for specific disorders, and considerations of new ethical and legal issues. Keeping track of advances requires monitoring diverse resources limited to specific disorders, many of which give short shrift to child assessment, overlooking developmental considerations. Much of the existing literature is either theoretical research in focus or clinical in nature. Nowhere are the various aspects of child behavioral assessment placed in a comprehensive research/clinical context nor is there much integration as to

conceptualization and treatment planning The Clinician's Handbook of Child Behavioral Assessment was created to fill this gap summarizing critical information for child behavioral assessment in a single source The Clinician's Handbook of Child Behavioral Assessment provides a single source for understanding new developments in this field cutting across strategies techniques and disorders Assessment strategies are presented in context with the research behind those strategies along with discussions of clinical utility and how assessment and conceptualization fit in with treatment planning The volume is organized in three sections beginning with general issues followed by evaluations of specific disorders and problems and closing with special issues To ensure cross chapter consistency in the coverage of disorders these chapters are formatted to contain an introduction assessment strategies research basis clinical utility conceptualization and treatment planning a case study and summary Special issue coverage includes child abuse assessment classroom assessment behavioral neuropsychology academic skills problems and ethical legal issues Suitable for beginning and established clinicians in practice this handbook will provide a ready reference toward effective child behavioral assessment

*Self-Regulated Learning and Academic Achievement* Barry J. Zimmerman, Dale H. Schunk, 2013-05-13 This volume brings together internationally known researchers representing different theoretical perspectives on students self regulation of learning Diverse theories on how students become self regulated learners are compared in terms of their conceptual origins scientific form research productivity and pedagogical effectiveness This is the only comprehensive comparison of diverse classical theories of self regulated learning in print The first edition of this text published in 1989 presented descriptions of such differing perspectives as operant phenomenological social learning volitional Vygotskian and constructivist theories In this new edition the same prominent editors and authors reassess these classic models in light of a decade of very productive research In addition an information processing perspective is included reflecting its growing prominence Self regulation models have proven especially appealing to teachers coaches and tutors looking for specific recommendations regarding how students activate alter and sustain their learning practices Techniques for enhancing these processes have been studied with considerable success in tutoring sessions computer learning programs coaching sessions and self directed practice sessions The results of these applications are discussed in this new edition The introductory chapter presents a historical overview of research and a theoretical framework for comparing and contrasting the theories described in the following chapters all of which follow a common organizational format This parallel format enables the book to function like an authored textbook rather than a typical edited volume The final chapter offers an historical assessment of changes in theory and trends for future research This volume is especially relevant for students and professionals in educational psychology school psychology guidance and counseling developmental psychology child and family development as well as for students in general teacher education

**Moral Psychology** Daniel K Lapsley, 2018-10-08 This book a review of the psychological literatures with allied traditions in ethics emphasizes parenting and educational strategies for influencing moral behavior reasoning and character

development and charts a line of research for the post Kohlbergian era in moral psychology

**The De Gruyter Handbook of Robots in Society and Culture** Leopoldina Fortunati, Autumn Edwards, 2024-09-23 The De Gruyter Handbook of Robots in Society and Culture provides a comprehensive discussion of how social robots take form function and meaning for individuals relationships cultures and societies Through a path breaking integration of perspectives coming from sociology communication and media psychology cognitive neuroscience anthropology political science and science and technology studies it focuses on the critical and social meaning of present developments in social robotic technologies This book looks at artificial agents from voice based assistants to humanoid robots as their use transforms private and public contexts and gives rise to both new possibilities and new perils for human being and becoming organizations as well as social structures and institutions The handbook traces the consequences and key problems of social robotics across broad social contexts in both public and political as well as domestic and intimate spaces Further it attends carefully to the implications of social robotics for various human identity groups including those based on gender ethnicity culture class ability and age Deep attention to interdisciplinarity inclusivity ethics and socio cultural futures serves as the guiding inspiration behind each contribution within this handbook

Personal Coping Bruce N. Carpenter, 1992-10-13 This volume presents current models of coping describes the coping process and relates that process to environmental factors person variables and desirable outcomes Unlike most treatments of coping which are organized around stress this volume emphasizes features of the coping process that have broad relevance across many potential stressors Although each model in the book tends to emphasize different aspects of coping the organization around models gives each chapter a theoretical focus which will be attractive to researchers and to those applying current research to applied problems such as interventions The most obvious audience is made up of researchers and scholars in the broad area of stress and coping With the emerging emphasis within applied programs on more common psychological and health problems coping theory is well suited to train students in the principles and issues relevant to everyday problems and functioning This volume is well suited to assist in such training

*Stress, Coping, and Relationships in Adolescence* Inge Seiffge-Krenke, 2013-05-13 Unique and comprehensive this volume integrates the most updated theory and research relating to adolescent coping and its determinants This book is the result of the author's long interest in and study of stress coping and relationships in adolescence It begins with an overview of research conducted during the past three decades and contrasts research trends in adolescent coping in the United States and Europe over time Grounded on a developmental model for adolescent coping the conceptual issues and major questions are outlined Supporting research ties together the types of stressors the ways of coping with normative and non normative stressors and the function that close relationships fulfill in this context More than 3 000 adolescents from different countries participated in seven studies that are built programmatically on one another and focus on properties that make events stressful on coping processes and coping styles on internal and social resources and on stress buffering and adaptation A variety of assessment

procedures for measuring stress and coping are presented including semi structured interviews questionnaires and content analysis This multimethod multivariate approach is characterized by assessing the same construct via different methods replicating the measures in different studies including cross cultural samples using several informants and combining standardized instruments with very open data gathering The results offer a rich picture of the nature of stressors requiring adolescent coping and highlight the importance of relationship stressors Age and gender differences in stress appraisal and coping style are also presented Mid adolescence emerges as a turning point in the use of certain coping strategies and social resources Strong gender differences in stress appraisal and coping style suggest that females are more at risk for developing psychopathology The book demonstrates how adolescents make use of assistance provided by social support systems and points to the changing influence of parents and peers It addresses controversial issues such as benefits and costs of close relationships or the beneficial or maladaptive effects of avoidant coping Its clear style innovative ideas and instruments make it an excellent textbook for both introductory and advanced courses Without question it may serve as a guide for future research in this field This book will be of value to researchers practitioners and students in various fields such as child clinical and developmental psychology and psychopathology
