Supporting Play Birth Through Age Eight:

Supporting Play Dorothy Justus Sluss, 2005 Helping young people learn through play is the focus of this publication aimed at teachers and future teachers of children from birth through age eight Current research presented here examines the positive effects of play on children's social emotional cognitive and physical development The reader will learn how to assess a child's learning through play making play a more practicable teaching mechanism They also will learn step by step recommendations for establishing a classroom that promotes play and developing play based programs designed for children in specific age groups infants and toddlers preschoolers kindergarten children and primary age children Incorporating play into the program of special needs children not only is addressed in each age specific section the author pays particular attention to this topic in a stand alone section Educators also will value the list of recommended Web sites for further research on the subject as well as lists of materials and books perfect for play centers

The Handbook of Developmentally Appropriate Toys Doris Bergen, 2021-03-20 The handbook is composed of chapters by authors who discuss the important features of particular types of toys provide information related to the developmental importance of this type of toy discuss social and cultural issues engendered by play with such toys and review the available research on the characteristics and potential impact on children's developmental progress of toys of that type Both traditional toys and technological toys are discussed The handbook is expected to serve both as a reference for educators parents toy designers and other interested readers and as a catalyst for further research and ongoing toy development Its purpose includes helping readers to gain knowledge that enables them to more fully appreciate the value of children's toy play find out more about the favorite toys they had in childhood and relive those satisfying play experiences and learn how to foster the learning physical development and social emotional growth that comes from such toy play

The Handbook of the Study of Play James E. Johnson, Scott G. Eberle, Thomas S. Henricks, David Kuschner, 2015-02-05 The Handbook of the Study of Play brings together in two volumes thinkers whose diverse interests at the leading edge of scholarship and practice define the current field Because play is an activity that humans have shared across time place and culture and in their personal developmental timelines and because this behavior stretches deep into the evolutionary past no single discipline can lay claim to exclusive rights to study the subject Thus this handbook features the thinking of evolutionary psychologists ethologists and biologists neuroscientists developmental psychologists psychotherapists and play therapists historians sociologists and anthropologists cultural psychologists philosophers theorists of music performance and dance specialists in learning and language acquisition and playground designers Together but out of their varied understandings the incisive contributions to The Handbook take on vital questions of educational policy of literacy of fitness of the role of play in brain development of spontaneity and pleasure of well being and happiness of fairness and of the fuller realization of the self These volumes also comprise an intellectual history retrospective looks at the great thinkers who have made possible the modern study of play

Play development in children with disabilities Serenella Besio, Daniela Bulgarelli, Vaska

Stancheva-Popkostadinova, 2016-01-01 This book is the result of the first two year work of Working Group 1 of the network LUDI Play for children with disabilities LUDI is an Action 2014 2018 financed by COST it is a multidisciplinary network of more than 30 countries and almost 100 researchers and practitioners belonging to the humanistic and technological fields to study the topic of play for children with disabilities within the framework of the International Classification of Functioning Disability and Health WHO 2001 The principal objective of this book is to bring the LUDI contribution to the important topic of play in children with disabilities because today an international consensus on the definition of play and disabilities is still lacking The process of ensuring equity in the exercise of the right to play for children with disabilities requests three actions to approach this topic through a common language at least all over Europe to put play at the centre of the multidisciplinary research and intervention regarding the children with disabilities to grant this topic the status of a scientific and social theme of full visibility and recognized authority Children with disabilities face several limitations in play due to several reasons impairments playgrounds toys and other play tools that are not accessible and usable environments and contexts that are not accessible nor inclusive lack of educational awareness and intentionality lack of specific psycho pedagogical and rehabilitative competence lack of effective intervention methodologies Moreover disabled children's lives are dominated by medical and rehabilitative practices in which play is always an activity aiming to reach an objective or to provoke an improvement play for the sake of play is considered a waste of time The concept of play for the sake of play strongly refers to the distinction between play activities and play like activities Play activities are initiated and carried out by the player alone with peers with adults etc for the only purpose of play itself fun and joy interest and challenge love of race and competition illness and dizziness etc They have of course consequences on growth and development but these consequences are not intentionally pursued Play like activities are initiated and conducted by an adult with one or more children in educational clinical social contexts they are playful and pleasant but their main objective is other than play e.g cognitive learning social learning functional rehabilitation child's observation and assessment psychological support psychotherapy etc This book then contributes to a clear distinction between play and play like activities that hopefully will bring to new developments in play studies
