The Pleasures and Horrors of Eating Marion Gymnich, 2010-09-15

Browsing through books and TV channels we find people pre occupied with eating cooking and competing with chefs Eating and food in today's media have become a form of entertainment and art A survey of literary history and culture shows to what extent eating used to be closely related to all areas of human life to religion eroticism and even to death In this volume

early modern ideas of feasting banqueting and culinary pleasures are juxtaposed with post 18th and 19th century concepts in which the intake of food is increasingly subjected to moral theological and economic reservations In a wide range of essays various images rhetorics and poetics of plenty are not only contrasted with the horrors of gluttony they are also seen in the context of modern phenomena such as the anorexic body or the gourmandizing b te humaine It is this vexing binary approach to eating and food which this volume traces within a wide chronological framework and which is at the core not only of literature art and film but also of a flourishing popular culture

The Oxford Handbook of Early Modern European History, 1350-1750 Hamish Scott, 2015-07-23 This Handbook re examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume II is devoted to Cultures and Power opening with chapters on philosophy science art and architecture music and the Enlightenment Subsequent sections examine Europe beyond Europe with the transformation of contact with other continents during the first global age and military and political developments notably the expansion of state power

Dilemma of the Modern in Japanese Fiction Dennis C. Washburn, 1995-03-11 This book looks at modernity in Japanese literary culture as a continuing historical dynamic rather than as merely the product of the intense Westernization of the nineteenth and early twentieth centuries. The author links the modern in Japan to a sense of cultural discontinuity that may be located in fictional narratives before the encounter of Japan with the West and he argues that modernity in Meiji Japan can be understood in terms of cultural conflict not only Japan versus the West but also Japan's present versus its past. Washburn compares readings from Meiji literature with readings from pre-Meiji and post-Meiji works. He begins with *Genji monogatari* (early eleventh century) and the *Hojoki* (1212), continues with stories by Saikaku (late seventeenth century) and ends with a consideration of selected texts from the Meiji period (1868-1912) through the end of the Second World War. Washburn focuses on common thematic elements that recur over time and on such formal considerations as voice and perspective that evolve historically to give expression to the sense of the modern. Using this approach, he is able to look at many individual authors in a new way and to present significant reevaluations of many important texts. This book is also a study of the East Asian Institute, Columbia University.
